

MANAGEMENT REPORT OF FUND PERFORMANCE
FIERA CANADIAN PREFERRED SHARE REGISTERED FUND
(FORMERLY NATIXIS CANADIAN PREFERRED SHARE REGISTERED FUND)

For the year ended December 31, 2019

This annual management report of fund performance contains financial highlights, but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling us toll free at 1-866-378-7119, by writing to us at Fiera Investments LP (the "Manager"), 145 King Street West, Suite 1500, Toronto, ON., M5H 1J8, or by visiting our website at fierainvestments.com or SEDAR at www.sedar.com. Securityholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and conditions. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological changes, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events.

We stress that the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.

Management Discussion of Fund Performance

The Fiera Canadian Preferred Share Registered Fund (the "Fund") will seek to achieve its investment objective through the investment of substantially all of its portfolio assets in the non-publicly offered debt and shares of the Inter-Fund of the Fiera Canadian Preferred Share Class (the "Tax Class Fund"). Accordingly, the Management Discussion of Fund Performance that follows represents generally that of the Tax Class Fund with the exception of the sections titled Investment Objective and Strategies, Risk, Financial Highlights, Management Fees and Series Description and Past Performance which are specific to the Fund. Within the section titled Results of Operations, the net asset value and performance figures discussed relate to the Fund. For information specific to the Tax Class Fund, please refer to the Management Report of Fund Performance of the Tax Class Fund.

Investment Objective and Strategies

The investment objective of the Tax Class Fund is to pursue a steady flow of income primarily through investment in Canadian preferred shares.

Effective October 18, 2019 Fiera Capital Corporation ("Fiera Capital") was appointed as the subadvisor of the Fund and the Tax Class Fund.

Fiera Capital conducts a thorough assessment of macroeconomic factors followed by extensive credit and relative value analysis. Using this analysis, Fiera Capital will seek to invest in a high-quality, relatively conservative diversified portfolio of preferred shares with the potential to deliver returns in excess of industry indices through Fiera Capital's long-term positioning and approach, trading process, duration management and understanding of technical factors specific to preferred shares.

Although the Fund is expected to primarily invest in preferred share securities, Fiera Capital may, at times, utilize other fixed income securities including money market securities and government bonds, preferred share ETFs, agency and/or corporate bonds to a maximum of 40% of the net assets of the Fund.

Risk

No changes affecting the overall level of risk associated with investing in the Fund were made during the period. The risk rating of this Fund remain as discussed in the Fund's most recent simplified prospectus, annual information form or any amendments and fund facts.

Results of Operations

The Fund's net asset value (rounded to the nearest thousand) decreased during the year from \$78,259,000 to \$52,913,000. This decrease was a result of a combination of net redemptions and negative return on investments.

The Series A of the Fund returned -1.1% compared to a 3.5% return on its benchmark, the S&P/TSX Preferred Share Total Return Index (the "Benchmark"), from which fees and expenses are not deducted. See the section titled "Past Performance" for a detailed summary of the performance of the Fund.

Market impacts on Fund performance

Preferred shares started the year strong, following the Christmas rally in December 2018. In February, the preferred share market finally rebounded following five consecutive months of losses. A lack of new issues combined with stable bond yields encouraged preferred share investors to bargain hunting.

However, in March, the preferred share market appeared to be fearing a repeat of 2015 when dividend rates were slashed and share prices plummeted following a drop in bond yields. The prices of floating rate preferred shares were also weak in March because of the change in expectations for future Bank of Canada interest rate moves.

Preferred shares were fairly stable to start the second quarter, with dividend income more than offsetting the small price declines that occurred in April. However, in early May, global financial markets experienced considerable volatility when the U.S.-China trade talks collapsed. Investors worried that increased trade restrictions between the world's two largest economies were going to have a substantial negative impact on global economic activity. Preferred shares did not perform well in the ensuing economic uncertainty.

MANAGEMENT REPORT OF FUND PERFORMANCE
FIERA CANADIAN PREFERRED SHARE REGISTERED FUND
(FORMERLY NATIXIS CANADIAN PREFERRED SHARE REGISTERED FUND)

For the year ended December 31, 2019

The fund underperformed the benchmark in the first half of the year. A major factor behind the shortfall were the holdings of issues that either reset their dividends or will be doing so later this year.

Preferred shares in September recovered much of the losses they suffered in August.

Sub-Advisor Change

The sub-advisor changed to Fiera Capital Corporation on October 18, 2019. Fiera Capital Corporation immediately began implementing their investment philosophy in the portfolio. For the period prior to October 18, 2019, rate reset preferred shares made up the largest portion of the portfolio, with perpetual issues comprising much of the remainder. Following the change in sub-advisor, the fund is overweight floating rate preferred shares, which contributed to positive relative performance and overweight perpetual preferred shares which hurt relative performance in the rising rate environment.

Bond markets softened in the final quarter of the year. Ten-year Canada bond yields rose 34 basis points to close at 1.70%. Economic growth was subdued but some important risks were partially resolved. Most importantly the U.S. and China reached an agreement in principal that appears to avoid doing further harm to global trade. The threat of a hard Brexit was also reduced following a majority victory by the pro-Brexit Conservatives in the U.K.'s general elections. Central bankers in North America took comfort from these developments and have signalled that current policy settings are likely to remain appropriate for the time being. The Federal Reserve cut its target rate by 0.25% in October but, in Chair Powell's words, believes policy is now "in a good place". The Bank of Canada met twice in the quarter and both times left its target overnight rate unchanged at 1.75%. These developments encouraged a risk-on tone to the bond market. The yield curve inversion was mostly unwound as 'recession' risks receded. Credit spreads also rallied strongly and approached post-financial crisis lows.

The Canadian preferred share market outperformed in Q4 under this higher interest rate environment along a strong credit sentiment despite some mixed flows due to the tax-loss selling season. The S&P/TSX Preferred Share Index returned +3.89% while the Solactive Laddered Canadian Preferred Share Index (100% rate reset) returned +4.32% in Q4. Floating rate and rate reset issues with low or mid reset level outperformed in Q4 while fixed rate perpetual and rate reset with high reset level underperformed. Real estate, energy, diversified financials outperformed in Q4 while banks underperformed.

Changes made by the sub-advisor

The sub-advisor continued to improve the quality of issues within the portfolio by increasing the average reset level on our fixed reset issues. We also reduced our allocation to floating rate issues and increased our allocation to perpetual issues.

Outlook

A tentative U.S./China trade deal has lifted immediate concerns about global economic conditions, but the lingering impact of trade uncertainty and the limited scope of the apparent deal will continue to weigh on business conditions. Manufacturing and business investment in particular remain weak. In Canada, the passage of the USMCA trade agreement will bring some relief on this front. We look for moderate overall growth to continue, including a modest lift from federal tax cuts and spending. With inflation running near target we expect the Bank of Canada will remain in wait-and-see mode before adding stimulus to the economy but is biased to easing should growth disappoint. In this environment we do not expect to see significant upward pressure on longer term bond yields from current levels. The low yield environment is set to continue, and we believe demand for higher yielding investments will remain a dominant theme in 2020. However, credit spreads have narrowed from earlier attractive levels and provide less break-even protection than in the recent past. Given the elevated state of economic and geo-political risks we could see increased volatility going forward and will remain disciplined at managing credit risk exposures.

Despite the strong performance of the preferred shares market in Q4, the performance of the asset class continued to lag other asset classes like credit (IG and HY) and equity. With the tax loss selling season behind us, the FED and the Bank of Canada on the sideline and some positive development on trades deals, we are expecting a total performance of the preferred share market stronger than the average coupon in 2020. We are expecting preferred share buyers to be back as the yield pick up continued to be at the top end of the range since 2015 versus other fixed income products. We expect non-financial issuers to limit preferred share funding in the near-term as the hybrid structure remains more attractive on a funding cost basis while providing a stronger institutional investor base. Subject to regulatory capital requirements, we expect financial issuers to continue issuing additional tier 1 capital including preferred shares, but we expect financial issuers to monitor closely the funding cost spread between Canadian preferred shares and US AT1 perpetual structures (ex: Bank of Montreal and Bank of Nova Scotia). As a result, we expect supply to be quiet (lower than expected) over the few next quarters which should be a technical positive for the asset class. Flows into the ETFs will continue to be an important driver of daily volatility. In this environment, fixed reset issues with mid reset level should outperform fixed reset issues with high reset level, fixed reset issues with floor and fixed rate perpetual issues.

The sub-advisor is continuously monitoring the Fund's portfolio due to the increased volatility in the equity and fixed income markets caused by macroeconomic uncertainties, ongoing global trade disputes, oil price wars and the economic impact caused by the COVID-19 virus. These could have an adverse impact on economic and market conditions and trigger a period of economic slowdown in Canada and internationally. However, the uncertainty around this precludes the sub-advisor from making predictions on the ultimate impact each one of these will have on the net assets and performance of the Fund. The sub-advisor seeks to mitigate or minimize any negative impact through active portfolio management and diversification.

Change of Securities Offerings

Effective June 5, 2018, the securities of Deferred Load and Low Load purchase options of the units of Series A are no longer available for purchase.

Investors may continue to own these securities, redeem their investment, or switch their investment to securities of the Fund or another Fiera Fund that is available for purchase and for which they qualify. Investors may also switch their Deferred Load and Low Load purchase option securities for other Deferred Load and Low Load purchase option securities, respectively.

MANAGEMENT REPORT OF FUND PERFORMANCE
FIERA CANADIAN PREFERRED SHARE REGISTERED FUND
(FORMERLY NATIXIS CANADIAN PREFERRED SHARE REGISTERED FUND)

For the year ended December 31, 2019

Related Party Transactions

The Manager provides investment management, distribution and administrative services to the Fund. These services are provided in the normal course of operations and are recorded at the amount of consideration agreed to by the Manager and the Fund. National Instrument 81-107 requires the Fund, to establish an independent review committee ("IRC") to whom the Fund must refer all conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintain records in respect of these matters, and provide assistance to the IRC in carrying out its functions. . The Manager has retained Fiera Capital Corporation, a related party, as sub-advisor to the Fund.

Management Fees

In consideration for the investment advisory services provided, the Manager receives a monthly management fee based on the daily average net assets of each series of the Fund, other than Series I. From its management fees, the Manager pays the cost of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds.

From time to time, the Manager may reduce the effective management fee payable by some shareholders by reducing the management fee it charges to the Fund, directing the Fund to make management fee distributions to these shareholders, or by rebating these fees back to the Fund in amounts equal to the management fee reduction. Management fee distributions are automatically reinvested in additional shares of the Fund and are accounted for as distributions for financial statement purposes.

Contingent Tax Management Fee

Effective June 4, 2018, the Manager eliminated the annual contingent tax management fee associated with all series of securities of the Compound Growth class of each of the Tax Class Funds.

Fund Operating Expenses

Each Fund is responsible for the payment of all operating expenses including, but not limited to, taxes, accounting fees, legal fees, audit fees, trustee fees, IRC fees, custodial fees, administrative costs, investor servicing costs, broker commissions, interest and bank charges, and costs of reports and prospectuses. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds. The Manager allocates to the Fund certain overhead costs which are directly related to the operation of the Fund (excluding marketing and sales). Those overhead costs would include a portion of the Manager's IT computer software, systems and staff salaries, facilities, insurance (property and liability only), depreciation on fixed assets, data and telephone, printing, office and other general administrative costs.

Operating expenses are attributed to a Fund, or a Fund's series. Common operating expenses of the Funds may be allocated among each fund based on the average number of securityholders or the average daily net assets value of that fund, or other methods of allocation that the Manager deems appropriate, depending on the type of operating expenses being allocated.

Expenses Absorbed

The Manager may waive or absorb a portion of the management fees or operating expenses for certain funds. The decision to absorb these expenses is reviewed periodically and determined at the discretion of the Manager, without notice to shareholders.

The related party fees charged are as follows:

	December 31, 2019	December 31, 2018
Management fees	485,205	624,779
Administrative services provided by the Manager	42,619	50,805
Fund expenses absorbed by the Manager	(85,533)	(99,920)

Other Information

Change of control of the Manager

On July 3, 2019 Fiera Capital Corporation acquired all of the outstanding common shares of Natixis Investment Managers Canada Corp., the parent of the Manager, thereby resulting in an indirect change of control of the Manager. Subsequent to the change of control, the following name changes were made:

Previous Name	New Name
Natixis Investment Managers Canada Corp.	Fiera Investments Corp.
Natixis Investment Managers Canada Limited	Fiera Investments Limited
Natixis Investment Managers Canada LP	Fiera Investments LP

On September 1, 2019, Fiera Investments Corp. was amalgamated with Fiera Capital Corporation.

MANAGEMENT REPORT OF FUND PERFORMANCE
FIERA CANADIAN PREFERRED SHARE REGISTERED FUND
(FORMERLY NATIXIS CANADIAN PREFERRED SHARE REGISTERED FUND)

For the year ended December 31, 2019

Management Fees and Series Description

The Fund currently offers three series of units: Series A, Series F and Series I. The following securities are no longer available for purchase: Deferred Load and Low Load purchase options of Series A, and Regular Front End Load, Deferred Load and Low Load.

Management fees differ among the Fund's series of units. The Fund pays the Manager an aggregate management fee. Management fees for Series I shares are negotiated and paid directly by the investor, not by the Fund. From its management fees, the Manager pays the costs of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund.

Series	As a Percentage of Management Fees		
	Management Fee (%)	Dealer Compensation (%)	General Administration, Investment Advice and Profit (%)
Series A	1.00	43	57
Series F	0.50	0	100

For Series I Units, separate Series I fees are negotiated and paid by each Series I investor. The combined management, administrative and any service fees charged for Series I Units will not exceed the management fee charged for Series F Units.

Summary of Investment Portfolio at December 31, 2019

The Fund invests directly in the non-publicly offered debt and shares of the Inter-Fund of the Tax Class Fund. The top 25 largest holdings by percentage of net asset value and sector allocation of the Tax Class Fund are listed below. The prospectus and other information about the Tax Class Fund is available at fierainvestments.com or www.sedar.com.

The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund. MANAGEMENT REPORT OF FUND PERFORMANCE
FIERA CANADIAN PREFERRED SHARE REGISTERED FUND
(FORMERLY NATIXIS CANADIAN PREFERRED SHARE REGISTERED FUND)

For the year ended December 31, 2019

Past Performance

The past performance shows historical performance of each series of units of the Fund. This information is provided to show the past performance only and does not necessarily indicate how the Fund will perform in the future. The past performance information assumes that all distributions were reinvested in additional units of the same series of the Fund. The past performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Effective on June 9, 2017, the annual management fee applicable to all of the sales options of the Series A units of the Fund was lowered by up to 25 basis points.

On October 18, 2019 Fiera Capital Corporation ("Fiera Capital") was appointed as the subadvisor of the Fund and the Tax Class Fund. The investment strategies of the Tax Class Fund were also changed on that date in order to reflect Fiera Capital's investment style and to provide Fiera Capital more flexibility in achieving the investment objectives of the Fund and the Tax Class Fund, which remain unchanged.

This change could have affected the performance of the Fund had it been in effect throughout the performance measurement periods presented.

Year-by-Year Returns

The following chart illustrates the annual performance of each series of units of the Fund since its retail inception date - August 26, 2013. Performance of Series A reflects the past performance of the Deferred Load Series. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have increased or decreased by the last day of each financial period.

Annual Compound Returns

The following table shows the annual compounded total return for each class and series currently offered by the Fund for each of the years shown, ending on December 31, 2019. The annual compound total return is also compared to the Benchmark on the same compound basis.

Series ¹	1 year	3 year	5 year	Since Inception ³
Series A	-1.1%	-0.3%	-0.4%	1.2%
Series F	-0.5%	0.3%	0.3%	2.0%
Series I	0.3%	2.0%	1.6%	3.1%

	1 year	3 year	5 year	Since Inception ³
Return of Benchmark ²	3.5%	2.7%	-0.3%	1.0%

¹ Net of all fees and expenses paid by the Fund other than Series I where performance is reported gross of fees negotiated and paid directly by the investor.

² The S&P/TSX Preferred Share Total Return Index is comprised of preferred stocks trading on the Toronto Stock Exchange that meet criteria relating to size, liquidity and issuer rating.

³ Annual compound returns since inception for all classes and series are from the Inception Date.

Financial Highlights

* Financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). As at December 31, 2019 there was no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

Net Assets Per Unit footnotes

- ¹ This information is derived from the Fund's audited annual financial statements as at December 31 of the years shown.
- ² Net assets and distributions are based on the actual amount of units at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.
- ³ Distributions were reinvested in additional units of the Fund, unless the investor requested payment in cash.
- * This is not a reconciliation of the beginning and ending net assets per unit as the increase (decrease) from operations data is based on the weighted average number of units during the period rather than actual unit amounts at the relevant time.

Ratios and Supplemental Data footnotes

- ¹ The information is provided as at December 31 of the years shown.
- ² The management expense ratio (MER) is calculated in accordance with National Instrument 81-106 and is based on total expenses (excluding distributions, commissions, portfolio transaction costs and forward fees as applicable) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In a period where a series is established, the management fee ratio is annualized from the date of inception to the end of the period.

The Manager may authorize a reduction in the management fees and/or operating expense rates generally for certain investors of the Fund who pay or incur distribution or other expenses normally paid by the Fund or the Manager. In this case, if the Manager reduces or rebates a portion of the management fee, the Fund or the Manager pays an amount equal to the reduction either as a distribution or as a direct rebate. The MER does not take this type of reduction into account.

The Manager may temporarily reduce or absorb all or any portion of the management fee and/or operating expenses of the Fund and can terminate the reduction or absorption at any time. The Manager expects to continue to absorb these fees or expenses until such time as the Fund is of sufficient size to reasonably absorb all fees and expenses.
- ³ The Fund invests in shares and debt of the Tax Class Fund and does not directly incur portfolio transaction costs. The trading expense ratio represents total commissions and other portfolio transaction costs of the underlying Tax Class Fund expressed as an annualized percentage of the daily average Transactional NAV of the Tax Class Fund during the period.
- ⁴ The Fund's portfolio turnover rate is represented by its proportionate share of that of the Tax Class Fund. The Tax Class Fund's portfolio turnover rate indicates how the portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Tax Class Fund buying and selling all of the securities in its portfolio once in the course of the period. Typically, the higher a fund's portfolio turnover rate, the greater the trading costs payable by a fund. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
