

**AMENDMENT NO. 1 DATED OCTOBER 18, 2019
TO THE AMENDED AND RESTATED SIMPLIFIED PROSPECTUS DATED
JULY 12, 2019, AMENDING AND RESTATING THE SIMPLIFIED PROSPECTUS
DATED JUNE 14, 2019
(the “Prospectus”)**

in respect of:

**Fiera Canadian Bond Fund (formerly Natixis Canadian Bond Fund)
Fiera Intrinsic Balanced Registered Fund (formerly Natixis Intrinsic Balanced Registered
Fund)
Fiera Canadian Dividend Registered Fund (formerly Natixis Canadian Dividend
Registered Fund)
Fiera U.S. Dividend Registered Fund (formerly Natixis U.S. Dividend Plus Registered
Fund)
Fiera Canadian Preferred Share Registered Fund (formerly Natixis Canadian Preferred
Share Registered Fund)
Fiera Canadian Bond Class (formerly Natixis Canadian Bond Class)
Fiera Intrinsic Balanced Class (formerly Natixis Intrinsic Balanced Class)
Fiera Canadian Dividend Class (formerly Natixis Canadian Dividend Class)
Fiera U.S. Dividend Class (formerly Natixis U.S. Dividend Plus Class)
Fiera Canadian Preferred Share Class (formerly Natixis Canadian Preferred Share Class)**

(each a “Fund” and collectively, the “Funds”)

Unless otherwise specifically defined, the terms used in this amendment have the meanings given to those terms in the Prospectus.

Introduction

The Prospectus is hereby amended to reflect that, effective October 18, 2019, the sub-advisor for each of the Funds will change to Fiera Capital Corporation (“**Fiera Capital**”). Concurrent with the sub-advisor change, the investment strategies of the Funds will be changed to reflect Fiera Capital’s investment style and to provide Fiera Capital more flexibility in achieving the Funds’ investment objectives.

Details of Amendment

The following technical amendments are made to the Prospectus to reflect these changes:

- (a) The rows related to J. Zechner Associates Inc., Galibier Capital Management Ltd. and Ziegler Capital Management LLC in the table under the sub-heading “**Sub-Advisors**” under the heading “**Organization and Management of the Funds**” on page 21 of the Prospectus are deleted and replaced with the following:

Fiera Capital Corporation (“ Fiera Capital ”)	Fiera Capital is the sub-advisor in respect of Fiera Canadian Bond Fund, Fiera Canadian Bond Class, Fiera Intrinsic Balanced Registered Fund, Fiera
--	---

Montreal, Québec	Intrinsic Balanced Class, Fiera Canadian Dividend Registered Fund, Fiera Canadian Dividend Class, Fiera U.S. Dividend Registered Fund, Fiera U.S. Dividend Class, Fiera Canadian Preferred Share Registered Fund and Fiera Canadian Preferred Share Class. As sub-advisor, Fiera Capital will give advice and make investment recommendations to Fiera Investments for these Funds. Fiera Capital is an affiliate of the Manager.
------------------	---

- (b) The row related to Cidel Asset Management Inc. in the table under the sub-heading “**Sub-Advisors**” under the heading “**Organization and Management of the Funds**” on page 21 of the Prospectus is deleted and replaced with the following:

Cidel Asset Management Inc. (“ Cidel ”) Toronto, Ontario	As sub-advisor to Fiera Investments in respect of Fiera Strategic Balanced Registered Fund, Fiera Strategic Balanced Class, Fiera Core Global Equity Registered Fund and Fiera Core Global Equity Class, Cidel gives advice and makes investment recommendations to Fiera Investments for these Funds. Cidel is not an affiliate of the Manager.
--	--

- (c) The row related to the sub-advisor in the table under the sub-heading “**Fund Details**” in respect of the Fiera Canadian Bond Funds on page 60 of the Prospectus is deleted and replaced with the following:

Sub-Advisor	Fiera Capital Corporation
-------------	---------------------------

- (d) All of the bullets under the sub-heading “**Fiera Canadian Bond Fund**” in the “**Investment Strategies**” section on page 61 of the Prospectus are deleted and replaced with the following:

- The Sub-Advisor will deploy investment strategies based on fundamental, technical, sentiment and seasonality-based analysis. Using this analysis, the Sub-Advisor will seek to identify macroeconomic and medium to long term economic trends, exploit short and medium-term investment opportunities, avoid market excess and help identify contrarian positioning as well as recognize seasonal movements in the Canadian bond market.
- The Fund may invest up to 100% of its net assets in fixed income securities issued or guaranteed by the Government of Canada.
- The Fund may invest up to 75% of its net assets in fixed income securities issued or guaranteed by Canadian provincial governments.

- The Fund may invest up to 25% of its net assets in fixed-income securities issued by or guaranteed by municipalities and other government-backed securities.
 - The Fund may invest up to 45% of its net assets in fixed income securities issued by corporations.
 - The Fund may invest up to 10% of its net assets in foreign bonds denominated in Canadian dollars.
 - The Fund may invest up to 49% of its net assets in foreign securities.
 - The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See “*Income Tax Considerations for Investors – Portfolio Turnover.*”
 - The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
 - The Fund may use derivatives for both hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.
- (e) The row related to the sub-advisor in the table under the sub-heading “**Fund Details**” in respect of the Fiera Canadian Preferred Share Funds on page 77 of the Prospectus is deleted and replaced with the following:

Sub-Advisor	Fiera Capital Corporation
-------------	---------------------------

- (f) All of the bullets under the sub-heading “**Fiera Canadian Preferred Share Class**” in the “**Investment Strategies**” section on page 78 of the Prospectus are deleted and replaced with the following:
- The Sub-Advisor conducts a thorough assessment of macroeconomic factors followed by extensive credit and relative value analysis. Using this analysis, the Sub-Advisor will seek to invest in a high-quality, relatively conservative diversified portfolio of preferred shares with the potential to deliver returns in excess of industry indices through the Sub-Advisor’s long-term positioning and approach, trading process, duration management and understanding of technical factors specific to preferred shares.
 - Although the Fund is expected to primarily invest in preferred share securities, the Sub-Advisor may, at times, utilize other fixed income securities including money market securities and government bonds, preferred share ETFs, agency and/or corporate bonds to a maximum of 40% of the net assets of the Fund.
 - The Fund may invest up to 20% of its net assets in foreign securities.

- The Fund may engage in short selling, as described in the introduction to Part B of the simplified prospectus.
 - The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
 - The Fund may use derivatives for both hedging and non-hedging purposes, as described in the introduction to Part B of the simplified prospectus.
- (g) The row related to the sub-advisor in the table under the sub-heading “**Fund Details**” in respect of the Fiera Intrinsic Balanced Funds on page 88 of the Prospectus is deleted and replaced with the following:

Sub-Advisor	Fiera Capital Corporation
-------------	---------------------------

- (h) The footnote “*” immediately under the table under the sub-heading “**Fund Details**” in respect of the Fiera Intrinsic Balanced Funds on page 88 of the Prospectus is deleted.
- (i) All of the bullets under the sub-heading “**Fiera Intrinsic Balanced Class**” in the “**Investment Strategies**” section on pages 88-89 of the Prospectus are deleted and replaced with the following:
- The Sub-Advisor seeks to employ an asset allocation approach to managing a balanced portfolio of Canadian equity and fixed income securities. The Fund’s relative positioning in equity and fixed income securities is actively managed and will each range between 25% and 75% of the Fund’s assets. The asset allocation process is based on the Sub-Advisor’s research and analysis of Central Banks’ monetary policies, economic fundamentals, market valuations, market sentiment and technical indicators, with the goal of achieving an optimal portfolio positioning throughout all parts of an economic cycle.
 - For the fixed income portion of the Fund, the Sub-Advisor will deploy investment strategies based on fundamental, technical, sentiment and seasonality-based analysis. Using this analysis, the Sub-Advisor will seek to identify macroeconomic and medium to long term economic trends, exploit short and medium-term investment opportunities, avoid market excess and help identify contrarian positioning, as well as recognize seasonal movements in the Canadian fixed income market.
 - For the equity portion of the Fund, the Sub-Advisor focuses on owning high quality businesses trading at attractive valuations, with a significant focus on capital preservation. The Sub-Advisor seeks to identify good businesses that are durable and run by management teams that have demonstrated an ability to operate efficiently and allocate capital, thereby building intrinsic value over time for investors. The portfolio construction process is based on a dynamic sizing of portfolio positions based on the level of conviction of the Sub-Advisor, the relative valuation of the stocks, and the overall risk assessment.

- The Fund may invest up to 30% of its net assets in foreign securities.
 - The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See “*Income Tax Considerations for Investors – Portfolio Turnover.*”
 - The Fund may engage in short selling, as described in the introduction to Part B of the simplified prospectus.
 - The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
 - The Fund may use derivatives for both hedging and non-hedging purposes as described in the introduction to Part B of the simplified prospectus.
- (j) The row related to the sub-advisor in the table under the sub-heading “**Fund Details**” in respect of the Fiera Canadian Dividend Funds on page 93 of the Prospectus is deleted and replaced with the following:

Sub-Advisor	Fiera Capital Corporation
-------------	---------------------------

- (k) All of the bullets under the sub-heading “**Fiera Canadian Dividend Class**” in the “**Investment Strategies**” section on pages 93-94 of the Prospectus are deleted and replaced with the following:
- The Sub-Advisor focuses on owning high quality, dividend growing businesses trading at attractive valuations, with a significant focus on capital preservation. The Sub-Advisor seeks to identify good businesses that are durable and run by management teams that have demonstrated an ability to operate efficiently and allocate capital, thereby building intrinsic value over time for investors. The portfolio construction process is based on a dynamic sizing of portfolio positions based on the level of conviction of the Sub-Advisor, the relative valuation of the stocks, and the overall risk assessment.
 - The Fund may invest up to 30% of its net assets in foreign securities.
 - The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See “*Income Tax Considerations for Investors – Portfolio Turnover.*”
 - The Fund may engage in short selling, as described in the introduction to Part B of the simplified prospectus.
 - The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.

- The Fund may use derivatives for both hedging and non-hedging purposes as described in the introduction to Part B of the simplified prospectus.
- (l) The row related to the sub-advisor in the table under the sub-heading “**Fund Details**” in respect of the Fiera U.S. Dividend Funds on page 102 of the Prospectus is deleted and replaced with the following:

Sub-Advisor	Fiera Capital Corporation
-------------	---------------------------

- (m) All of the bullets under the sub-heading “**Fiera U.S. Dividend Class**” in the “**Investment Strategies**” section on page 103 of the Prospectus are deleted and replaced with the following:

- The Sub-Advisor seeks to employ a systematic investment approach that exploits the persistent valuation anomaly in developed equity markets where companies that are less sensitive to broad market indexes (low systematic risk) tend to outperform on a risk adjusted basis compared to companies that are highly sensitive to broad market indexes (high systematic risk).
- The Sub-Advisor will seek to invest the Fund’s assets in such a way as to have the Fund diversified across high conviction stocks and will focus on identifying and investing in companies that exhibit a combination of low systematic risk and superior dividend payout.
- The Sub-Advisor will seek to emphasize investment in low systematic risk companies, characterized by a combination of lower volatility and lower correlation to broad U.S. market indices.
- The Fund, in anticipation of, or in response to adverse market conditions, for cash management purposes, for defensive purposes or for purposes of a merger or other transaction, may temporarily hold up to 20% of its net assets in cash, money market instruments, securities of affiliated money market funds, preferred share securities, bonds or other debt securities. As a result, the Fund may not be fully invested in accordance with its fundamental investment objective and may not participate in stock market advances or declines to the same extent as if was fully invested in equity securities.
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may engage in short selling, as described in the introduction to Part B of the simplified prospectus.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.

- The Fund may use derivatives for both hedging and non-hedging purposes, as described in the introduction to Part B of the simplified prospectus.

Purchasers' Statutory Rights

Securities legislation in some provinces and territories gives unitholders the right to withdraw from an agreement to buy securities of a mutual fund within two business days of receiving the simplified prospectus or fund facts, or to cancel a purchase within forty-eight hours of receiving confirmation of an order.

Securities legislation in some provinces and territories also allows securityholders to cancel an agreement to buy securities of a mutual fund or to get their money back, or to make a claim for damages, if the simplified prospectus, annual information form, fund facts or financial statements misrepresent any facts about the Funds. These rights must usually be exercised within certain time limits.

For more information, securityholders should refer to the securities legislation of their province or territory or consult a lawyer.

Certain of the Funds are part of an integrated investment structure designed in part to facilitate distributions on a tax preferred basis. Investors should consult with their financial advisors prior to purchasing, switching or redeeming securities of the Funds.

Simplified Prospectus Summary

The following is a summary of the principal features of the securities offered under this simplified prospectus and should be read together with more detailed information contained elsewhere in this simplified prospectus.

Introduction

The following securities of each of the mutual funds managed by Fiera Investments LP (*formerly Natixis Investment Managers Canada LP*) (the "**Manager**" or "**Fiera Investments**") described on the cover (the "**Funds**") are offered for sale under this simplified prospectus:

A. Single Trust Funds - a group of 4 open-end mutual fund trusts for **All Investors** (those investors whose investment activity is conducted within registered plans and non-registered accounts) consisting of:

- Series A, Series F and Series I units of
 - Fiera Canadian Bond Fund,
 - Loomis Sayles Global Diversified Corporate Bond Fund, and
 - Loomis Sayles Strategic Monthly Income Fund.

Fiera Canadian Bond Fund and Loomis Sayles Global Diversified Corporate Bond Fund are known collectively as (the "**Fixed Income Funds**");

- Series A, Series F and Series I units of the Ordinary Class and Series A (Hedged) and Series F (Hedged) units of the Hedged Class of Gateway Low Volatility U.S. Equity Fund (the "**Gateway Fund**").

The Fixed Income Funds, Loomis Sayles Strategic Monthly Income Fund and the Gateway Fund collectively are known as the "**Single Trust Funds**".

The Single Trust Funds are appropriate investments for registered and taxable investors. Each of the Single Trust Funds will make all of its portfolio investments directly.

In each calendar year, each of the Single Trust Funds will distribute income and capital gains to the extent necessary to eliminate any tax liability of the Fund. Individual distributions may consist of interest income, foreign source income, Canadian dividends, other income and capital gains to the extent necessary to eliminate any tax liability to the Fund. Some Single Trust Funds will make a fixed distribution and others will not. To the extent the fixed distributions paid during the year exceed income and capital gains of the Fund, the excess portion will be designated as a return of capital. See "*Part B: Specific Information About Each Mutual Fund Described in the Document – Distribution Policy*" for more information.

B. Registered Funds - a group of 10 open-end mutual fund trusts for **Registered Investors** (those investors whose investment activity is conducted within registered plans) consisting of:

- Series A, Series F and Series I units of
 - Fiera Strategic Balanced Registered Fund,
 - Fiera Intrinsic Balanced Registered Fund,
 - Fiera Canadian Dividend Registered Fund,
 - Fiera Intrinsic Growth Registered Fund,
 - Fiera U.S. Dividend Registered Fund,

- Fiera U.S. Growth Registered Fund,
 - Fiera Core Global Equity Registered Fund,
 - Fiera Canadian Preferred Share Registered Fund,
 - Oakmark U.S. Equity Registered Fund, and
 - Oakmark International Equity Registered Fund
- (collectively, the "**Registered Funds**").

The Registered Funds are appropriate investments for registered investors.

Each Registered Fund has a similar investment objective to its respective Class Fund (defined below). Each of the Registered Funds invests substantially all its portfolio assets, which consists primarily of cash received from investors, in a combination of non-publicly offered debt and Inter-Fund class shares of the underlying Class Fund having a similar investment objective to the Registered Fund.

C. Class Funds - a group of 12 open-end investment portfolios offered through various series and classes of Fiera Investments Capital Corporation (*formerly Natixis Investment Managers Canada Capital Corporation*) (the "**Corporation**"), a mutual fund corporation for **Taxable Investors** (those investors whose investment activity is conducted outside of registered plans), consisting of:

- Series A, Series F and Series I shares of the following classes: Return of Capital, Dividend and Compound Growth (collectively, the "**Tax Classes**") of
 - Fiera Canadian Bond Class,
 - Loomis Sayles Global Diversified Corporate Bond Class,
 - Fiera Strategic Balanced Class,
 - Fiera Intrinsic Balanced Class,
 - Fiera Canadian Dividend Class,
 - Fiera Intrinsic Growth Class,
 - Fiera U.S. Dividend Class,
 - Fiera U.S. Growth Class,
 - Fiera Core Global Equity Class,
 - Fiera Canadian Preferred Share Class
 - Oakmark U.S. Equity Class, and
 - Oakmark International Equity Class; and
- Series F shares of the Return of Capital and Dividend classes of the following Class Funds (as defined below) are also available for registered investors:
 - Fiera Strategic Balanced Class,
 - Fiera Intrinsic Balanced Class,
 - Fiera Canadian Dividend Class,
 - Fiera Intrinsic Growth Class,
 - Fiera U.S. Dividend Class,
 - Fiera U.S. Growth Class,
 - Fiera Core Global Equity Class,
 - Fiera Canadian Preferred Share Class,
 - Oakmark U.S. Equity Class, and
 - Oakmark International Equity Class.

Fiera Canadian Bond Class and Loomis Sayles Global Diversified Corporate Bond Class are collectively known as the "**Bond Class Funds**". The Bond Class Funds, Fiera Strategic Balanced Class, Fiera Intrinsic Balanced Class, Fiera Canadian Dividend Class, Fiera Intrinsic Growth Class, Fiera U.S. Dividend Class, Fiera U.S. Growth Class, Fiera Core Global Equity Class, Fiera Canadian Preferred Share Class, Oakmark U.S. Equity Class and Oakmark International Equity Class

collectively are known as the “**Class Funds**”. The Single Trust Funds, the Registered Funds and the Class Funds collectively are known as the “**Funds**”.

The Corporation is a tax-efficient investment structure. It facilitates investment by taxable investors whose goal is to maximize the after-tax value of their investment portfolio and its distributions in a structure not currently offered by any other publicly offered Canadian mutual fund.

The Manager created the Corporation and its Tax Classes and is solely responsible for the administration and operation of the Corporation, including all matters relating to taxation. In accordance with the investment sub-advisory agreement, all investment Sub-Advisors act solely as Sub-Advisors to the Funds and are not responsible for, and do not provide any services in respect of, tax matters relating to the Corporation.

The Manager has filed a patent application describing various aspects of the multi-class structure. The patent application, including all its corresponding rights and benefits, would entitle the Manager to the exclusive use in Canada of the multi-class structure as described and claimed in the patent application until 2025, if and when the application proceeds to grant.

Each Class Fund represents a separate investment portfolio and consists of the following classes of shares:

- three publicly offered Tax Classes, being (i) Return of Capital, (ii) Dividend, and (iii) Compound Growth; and
- five classes of shares that are not available for sale to the public, being (i) Inter-Fund class (not applicable for the Bond Class Funds), (ii) M class, (iii) Capital Gains class (shares of which are no longer available for sale to the public effective May 9, 2017) (not applicable to Oakmark U.S. Equity Class and Oakmark International Equity Class); (iv) Return of Capital 6 class of Fiera Canadian Bond Class (shares of which are no longer available for sale to the public effective June 5, 2018); and (v) Dividend 6 class of Fiera Canadian Bond Class (shares of which are no longer available for sale to the public effective June 5, 2018).

Each Class Fund currently has 9 series of shares.

D. Not Offered For Sale Under a Simplified Prospectus

Fund-on-Fund Arrangements - Certain securities are used to facilitate the fund-on-fund structure of the Corporation and for other fund-on-fund arrangements but are not available for purchase under a prospectus:

- Two non-publicly offered classes of shares of each Class Fund, being (i) Inter-Fund (other than for the Bond Class Funds) and (ii) M class.
- The Corporation also issues non-publicly offered limited recourse debt in respect of each Class Fund (other than the Bond Class Funds).
- An additional series of units of each Registered Fund and Fixed Income Fund, being M series, is also a non-publicly offered series of units.

Each of Inter-Fund and M class and M series were created to facilitate:

- in the case of Inter-Fund shares, the investment by the Registered Funds in the corresponding Class Funds; and
- in the case of M class and M series shares and units, inter-fund investments and derivative transactions.

See the sub-heading "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*" for greater details respecting the fund-on-fund arrangements, Inter-Fund and M class and M series.

E. Classes and Series No Longer Offered For Sale

The Deferred Load purchase option and Low Load purchase option previously available for Series A securities of the Funds are no longer available effective June 5, 2018, other than to existing investors who hold Series A securities under the Deferred Load or Low Load purchase options and who wish to switch into Series A of another Fund under the same purchase option.

Securities of the following series and classes of the Funds are outstanding but are no longer available for sale to the public:

- All series of shares of Capital Gains class of each of the Class Funds;
- All series of shares of Return of Capital 6 class and Dividend 6 class of Fiera Canadian Bond Class;
- Series F1 shares of the Dividend class and the Return of Capital class of Loomis Sayles Global Diversified Corporate Bond Class, Fiera Strategic Balanced Class and Fiera Intrinsic Balanced Class;
- Series H securities of Fiera Canadian Bond Fund, Loomis Sayles Global Diversified Corporate Bond Fund, Loomis Sayles Strategic Monthly Income Fund, Gateway Low Volatility U.S. Equity Fund, Fiera Strategic Balanced Registered Fund, Fiera Intrinsic Balanced Registered Fund, Fiera Canadian Dividend Registered Fund, Fiera Intrinsic Growth Registered Fund, Fiera U.S. Dividend Registered Fund, Fiera U.S. Growth Registered Fund, Fiera Core Global Equity Registered Fund, Fiera Canadian Bond Class (Return of Capital, Dividend and Compound Growth), Loomis Sayles Global Diversified Corporate Bond Class (Return of Capital, Dividend and Compound Growth), Fiera Strategic Balanced Class (Return of Capital, Dividend and Compound Growth), Fiera Intrinsic Balanced Class (Return of Capital, Dividend and Compound Growth), Fiera Canadian Dividend Class (Return of Capital, Dividend and Compound Growth), Fiera Intrinsic Growth Class (Return of Capital, Dividend and Compound Growth), Fiera U.S. Dividend Class (Return of Capital, Dividend and Compound Growth), Fiera U.S. Growth Class (Return of Capital, Dividend and Compound Growth) and Fiera Core Global Equity Class (Return of Capital, Dividend and Compound Growth);
- Series HF securities of Fiera Canadian Bond Class (Return of Capital 6, Dividend 6, Return of Capital, Dividend and Compound Growth), Loomis Sayles Global Diversified Corporate Bond Class (Compound Growth), Fiera Strategic Balanced Class (Compound Growth), Fiera Intrinsic Balanced Class (Compound Growth), Fiera Canadian Dividend Registered Fund, Fiera Canadian Dividend Class (Return of Capital, Dividend and Compound Growth), Fiera Intrinsic Growth Registered Fund, Fiera Intrinsic Growth Class (Return of Capital, Dividend and Compound Growth), Fiera U.S. Dividend Registered Fund, Fiera U.S. Dividend Class (Return of Capital, Dividend and Compound Growth), Fiera U.S. Growth Registered Fund,

Fiera U.S. Growth Class (Return of Capital, Dividend and Compound Growth), Fiera Core Global Equity Registered Fund and Fiera Core Global Equity Class (Return of Capital, Dividend and Compound Growth); and

- Ultra High Net Worth Series securities of Fiera Canadian Bond Fund, Loomis Sayles Global Diversified Corporate Bond Fund, Fiera Strategic Balanced Registered Fund, Fiera Intrinsic Balanced Registered Fund, Fiera Canadian Dividend Registered Fund, Fiera Intrinsic Growth Registered Fund, Fiera U.S. Dividend Registered Fund, Fiera U.S. Growth Registered Fund, Fiera Core Global Equity Registered Fund, Fiera Canadian Bond Class (Capital Gains, Return of Capital 6, Dividend 6, Return of Capital, Dividend and Compound Growth), Loomis Sayles Global Diversified Corporate Bond Class (Capital Gains, Return of Capital, Dividend and Compound Growth), Fiera Strategic Balanced Class (Capital Gains, Return of Capital, Dividend and Compound Growth), Fiera Intrinsic Balanced Class (Capital Gains, Return of Capital, Dividend and Compound Growth), Fiera Canadian Dividend Class (Capital Gains, Return of Capital, Dividend and Compound Growth), Fiera Intrinsic Growth Class (Capital Gains, Return of Capital, Dividend and Compound Growth), Fiera U.S. Dividend Class (Capital Gains, Return of Capital, Dividend and Compound Growth), Fiera U.S. Growth Class (Capital Gains, Return of Capital, Dividend and Compound Growth) and Fiera Core Global Equity Class (Capital Gains, Return of Capital, Dividend and Compound Growth).

Investment Structure

Each of the Registered Funds and the Class Funds is part of an integrated investment structure, which has been designed to provide investors with certain investment benefits that differ depending upon whether the investor purchases securities of a Registered Fund or securities of a Class Fund.

The transactions and the resulting investment structure are as follows:

- (i) Each Registered Fund invests substantially all its portfolio assets, which consists primarily of cash received from registered investors, in a combination of non-publicly offered limited recourse debt and Inter-Fund class shares of the underlying Class Fund having a similar investment objective, pursuant to a fund-on-fund arrangement.
- (ii) Each Class Fund invests the proceeds that it receives from share issuances and the portfolio proceeds from the Registered Funds in its portfolio.

The integrated investment structure described above, between the Registered Funds and the Class Funds, is designed to increase the tax efficiency of the Corporation. See the sub-heading "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*" for further details regarding the fund-on-fund arrangements.

Description of the Tax Classes

An objective of the Manager is to provide effective tax planning tools at the product level to maximize the after-tax returns of taxable investors. The Manager believes that the multi-class tax structure of the Corporation achieves that objective. Specifically, as each of the Tax Classes and the non-publicly offered classes, being Inter-Fund, M and Capital Gains class, in respect of each investment mandate share a single investment portfolio and constitute a separate mutual fund, each Class Fund may allocate and distribute income and capital gains of the Corporation in accordance with the tax objectives of the investors of a particular class.

Each Tax Class has a distinct tax planning objective. As a result, taxable investors may integrate their investment and tax objectives by purchasing shares of a specific class which fit their tax profile. This feature simplifies individual investor tax planning strategies.

The Tax Classes and the distribution strategies embedded in the multi-class structure of the Corporation are as follows:

Return of Capital - The objective of this class is to provide a fixed monthly distribution, consisting primarily of a return of capital. The applicable distribution rate varies by Class Fund and may be adjusted annually based upon the annual distribution as a percentage of net asset value per share at the date of adjustment. For the distribution rates for each Return of Capital class of the applicable Class Funds, see the table under the sub-heading "*Purchases, Switches and Redemptions*".

These shares are suitable investments for: (i) higher-income investors seeking tax efficient cash flow from an equity, balanced or fixed income portfolio; (ii) investors who invest through a holding corporation and need tax efficient cash flow to fund a corporately owned permanent insurance policy; (iii) retired investors who require additional cash flow but want to manage "clawback" on old age security payments; and (iv) philanthropic investors in need of a tax-efficient vehicle to facilitate charitable giving.

A return of capital distribution is not taxable. However, the distribution decreases the adjusted cost base of the shares, resulting in an increased capital gain (or smaller capital loss) when the shares are eventually sold. If the distribution causes the investor's adjusted cost base to become negative at any time, the negative amount is taxed as a capital gain returning the adjusted cost base of the shares to zero.

Monthly distributions may also include capital gains dividends and Canadian taxable dividends to the extent that the Corporation is required to declare capital gains dividends and Canadian taxable dividends to eliminate the overall tax liability of the Corporation.

Dividend - The objective of this class is to provide a fixed monthly dividend, consisting primarily of taxable Canadian dividends. The applicable distribution rate varies by Class Fund and may be adjusted annually based upon the annual distribution as a percentage of net asset value per share at the date of adjustment. For the distribution rates for each Dividend class of the applicable Class Funds, see the table under the sub-heading "*Purchases, Switches and Redemptions*".

These shares are suitable investments for: (i) investors seeking to take advantage of the preferential tax treatment of Canadian eligible dividends; (ii) investors interested in income splitting with low income family members; (iii) individuals in the lowest tax brackets who wish to receive tax efficient investment income; and (iv) investors who invest through a holding corporation and need a tax efficient income to flow through the corporation.

Approximately the first \$52,070 (\$39,500 in the Province of Quebec) of Canadian eligible dividend income may be received on a tax-free basis by individual investors with no other sources of income in 2019. This threshold may vary significantly depending upon your province or territory of residence.

Monthly dividends may also include capital gains dividends to the extent that the Corporation is required to declare capital gains dividends to eliminate the overall tax liability of the Corporation.

Dividend and Return of Capital classes provide for fixed distributions. To the extent that an investor in any of these Tax Classes receives distributions which exceed the income and capital appreciation

made on their investment, that difference will be a return of a portion of the original amount invested and reduce that invested amount.

Compound Growth - The objective of this class is to maximize the after-tax value of an investor's portfolio, by minimizing, to the extent possible, the amount and frequency of taxable distributions to the investor. This class may declare an annual distribution of capital gains dividends and/or Canadian taxable dividends to the extent that the Corporation is required to declare capital gains dividends and/or Canadian taxable dividends to reduce or eliminate the annual tax liability of the Corporation. For the distribution rates for each Compound Growth class of the applicable Class Funds, see the table under the sub-heading "*Purchases, Switches and Redemptions*".

These shares are suitable investments for investors who wish to focus on capital growth while paying tax in respect of the investment on a disposition of this investment in the Class Funds or if an annual distribution is declared.

PART A: GENERAL DISCLOSURE

Introduction

This simplified prospectus contains selected important information to help you make an informed investment decision about investing in the Funds and to help you to understand your rights as an investor.

This simplified prospectus is divided into two parts. The first part, Part A, from pages 7 through to 50, contains general information applicable to all the Funds. The second part, Part B, from pages 51 through to 126, contains specific information about each of the Funds contained in this simplified prospectus.

Additional information about each Fund is available in the following documents:

- the annual information form;
- most recently filed Fund Facts;
- most recently filed annual financial statements;
- any interim financial statements filed after those annual financial statements;
- most recently filed annual management report of fund performance; and
- any interim management report of fund performance filed after that annual management report of fund performance.

These documents are incorporated by reference into this simplified prospectus, which means that they legally form part of this simplified prospectus just as if they were printed as a part of this document. You can get a copy of these documents, at your request, and at no cost, by calling the Manager at (416) 775-3727 (Toronto area) or 1 866-378-7119 (toll free) or from your dealer.

These documents are available on the Manager's website at im.natixis.ca or by contacting the Manager at info.canada@natixis.com.

These documents and other information about the Funds are available at www.sedar.com.

What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?

What is a Mutual Fund?

- A mutual fund is an investment vehicle which invests monies it receives from you and other investors in an "investment portfolio" or pool of various securities. Each mutual fund has a different investment objective and, as a result, has different securities in its investment portfolio. For example, the investment portfolio of a Canadian balanced fund will typically contain Canadian equity and fixed income securities, while a foreign equity fund will contain primarily foreign equity securities.
- Your interest in the mutual fund is represented by "units" if the mutual fund purchased is a trust or "shares" if the mutual fund purchased is part of a corporation. The number of shares or units you own in comparison to the total number issued by the mutual fund determines your ownership interest in the fund.
- The value of the securities in the investment portfolio goes up and down with market conditions. As a result, the value of your investment also goes up and down. You make money if you sell your units or shares and their value (caused by changes in the value of the investment portfolio) is greater than their value at the date of purchase.

A mutual fund offers the following benefits:

- **Professional Management** - The person who invests the monies received by investors in the investment portfolio is a professional money manager, who is trained and qualified to manage money and who has access to information and research that is typically not available to smaller retail investors.
- **Diversification** - As the mutual fund receives money from numerous investors, it is able to pool that money and invest in numerous securities, which, depending upon the specific investment objective, may represent interests in different companies, industries and countries. As a result, although the value of those securities will go up and down, they will typically go up and down individually at different times and in different amounts. The right amount of diversification within an investment portfolio reduces the risk that a drop in value of a few securities within the portfolio will materially impact the value of the entire portfolio. It also has a corresponding effect on the upside.
- **Liquidity** - Retail mutual funds are required by securities regulatory authorities to comply with certain investment restrictions which ensure that the underlying investment portfolio is comprised predominantly of securities which are marketable and liquid. Consequently, you can sell all or part of your investment at any time, subject to a suspension of redemption rights in exceptional circumstances.
- **Record Keeping** - As an investor, you will receive from the mutual fund or your dealer financial reports, confirmations, tax slips and investment statements on a regular basis.
- **Convenience** - For Series A, Series A (Hedged), you are able to invest in the Funds for a minimum of \$5,000 and \$100 as a subsequent investment. For Series F and Series F (Hedged), you are able to invest in the Funds for a minimum of \$500 and \$100 as a subsequent investment. You may redeem securities of the Funds in any dollar amount subject to a \$100 minimum per request.

What are the General Risks of Investing in a Mutual Fund?

All investments entail risk. As a general rule, the more risk you assume the greater your potential return and the greater your potential loss. The amount of risk you can tolerate will depend on several factors, including the nature of the proposed investment, your investment time horizon and goals and the composition of your existing portfolio. The following section describes the various risks of investing in the Funds so that you can assess, in consultation with your financial advisor, which Fund is appropriate for you, given your risk tolerance.

To assist you in assessing the risk associated with an investment in the Funds, we have classified the risk according to the type of the investment. The detailed summaries of each Fund contained in Part B of this simplified prospectus identify the specific risks which apply to each Fund.

General Risks

The following are general risks that apply regardless of the type of mutual fund in which you invest.

Not Guaranteed - The full amount of your investment in a Fund is not guaranteed. Unlike bank accounts or guaranteed investment certificates, mutual fund securities are not covered by the Canada Deposit Insurance Corporation or any other government deposit insurer.

Volatility - Generally, the value of a Fund, and the price of your units or shares will vary with the market value of the Fund's underlying investments. As a result, the value of your investment in a Fund at the time of sale may be more or less than your purchase amount.

Suspension of Redemptions - Under exceptional circumstances, a Fund may suspend your right to sell your units or shares of the Fund. See the heading "*Purchases, Switches and Redemptions - Suspension of Sale or Redemption*" for greater details.

Change in Legislation - Tax, securities and other laws may change in a manner that could adversely affect the Funds and their investors.

Fixed Income Investments Risks

Fixed income investments generally tend to be less volatile and risky than equity investments.

Interest Rate Risk - Fixed income securities, which include bonds, treasury bills, and commercial paper, generally pay a fixed rate of interest. As a result, changes in the interest rates during the term of the investment will change its price. If interest rates rise, the value of the fixed income investment generally will fall. If interest rates fall, the value of the investment generally will increase. Longer term fixed income instruments are generally more affected by changes in long term interest rates.

The value of zero-coupon securities and securities with longer maturities are generally more sensitive to fluctuations in interest rates than other fixed income securities. In addition, an economic downturn or period of rising interest rates could adversely affect the market of these securities and reduce the fund's ability to sell them, negatively impacting the performance of the fund.

Investment Risk - Fixed income securities may be adversely affected by developments impacting the issuer of the security. For example, developments that affect a particular corporation may adversely affect the value of the fixed income securities issued by such corporation. The same

principle applies for fixed income securities issued by different countries, which may be adversely affected by general financial, political and economic conditions within that country.

Credit Risk - An issuer of a fixed income investment may not be able to meet its financial obligations, including making interest and principal payments. The risk of default may vary with the credit rating of the issuer or the security and generally is higher if the fixed income investment has a low credit rating. As a result, the interest rate paid by the issuer generally varies depending on the level of risk of default.

Corporate and government issued debt securities are rated by specialized debt rating agencies including DBRS and Standard & Poor's who provide an indication of the credit quality of a specific issue. Credit ratings are only estimates and there is no guarantee the rating accurately reflects the inherent credit quality. Due to changing market conditions a higher return may be necessary to compensate for the higher risk and lower rating, resulting in a decline in the value of the investment.

Below Investment Grade Fixed Income Securities Risk - A Fund's investments in below investment grade fixed income securities, also known as "junk bonds", may be subject to greater risks than other fixed income securities, including being subject to greater levels of interest rate risk, credit risk (including a greater risk of default) and liquidity risk. The ability of the issuer to make principal and interest payments is predominantly speculative for below investment grade fixed income securities.

Mortgage Related and Asset-Backed Securities Risk - In addition to the risks associated with investments in fixed income securities generally (for example, credit, liquidity and valuation risk), mortgage-related and asset-backed securities are subject to the risks of the mortgages and assets underlying the securities as well as prepayment risk, the risk that the securities may be prepaid and result in the reinvestment of the prepaid amounts in securities with lower yields than the prepaid obligations. Conversely, there is a risk that an unexpected rise in interest rates will extend the life of a mortgage-related or asset-backed security beyond the expected prepayment time, typically reducing the security's value. A Fund also may incur a loss when there is a prepayment of securities that were purchased at a premium. A Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

Equity Investments Risks

Equity investments generally tend to be more volatile and risky than fixed income investments.

Equity Risk - General investment risks may adversely affect the value of an equity investment and would include risks resulting from specific developments relating to a company and general economic and financial conditions and developments which impact a specific industry or company. As a result of those developments, the equity securities within the Fund's investment portfolio may lose value and the value of your investment may also go down. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of the issuer's bonds generally take precedence over the claims of those who own preferred stock or common stock.

Preferred Share Risk - Preferred shares generally tend to be less volatile and risky than equity investments but more volatile and risky than fixed income investments. They share similar risks to fixed income investments that include interest rate risk, credit risk and liquidity risk.

In addition, preferred share risks can differ depending on their structure, term, and any dividend reset mechanism. These include:

Call Risk - Preferred shares can have redemption features that permit the issuer to redeem all or part of the issue. Redemption occurs when it is in the issuer's interest, which may not be in an investor's best interest.

Extension Risk - Preferred shares can have an initial redemption date, however an issuer may choose not to redeem on the expected date and keep the issue outstanding.

Specialization Risk - Investment in a specific industry or region generally increases risk as there may be less diversification than in a more generalized portfolio. Although the investment returns may be greater if the industry or region is doing well, the losses may also be greater if these industries or regions are doing poorly.

Small Company Risk - Depending upon the particular company, small companies may offer greater investment opportunity in terms of potential profit than larger more established companies, but typically the investment risk is significantly greater. The increased risk may result from numerous factors, including limited financial resources and more specialized products and services.

Commodity Risk - To varying degrees, certain Funds will invest in companies engaged in commodity focused industries, such as energy and natural resources. As a result, the portfolios of these Funds will be affected by the prices of the underlying commodities which may fluctuate significantly thereby affecting the net asset values of such Funds.

In addition, certain Funds invest directly or indirectly in precious metals such as gold or silver. The net asset value of these Funds will be affected by changes in the price of those commodities caused by several factors, including but not limited to speculation, supply and demand, changes in interest rates and central bank activities.

Style Risk - Investing in "growth" or "value" or other types of stocks presents the risk that the stocks may never reach the full market value that the portfolio manager or sub-advisor believes they should, either because the market fails to recognize the value that the portfolio manager or sub-advisor considers to be the companies' true business value or because the portfolio manager or sub-advisor misjudged that value. In addition, growth or value stocks may fall out of favour with investors and underperform other investments during given periods.

Focused Portfolio Risk - Each of the Funds' portfolios tends to be invested in a relatively small number of securities - thirty to sixty rather than hundreds. As a result, the appreciation or depreciation of any one security held by a Fund will have a greater impact on the Fund's net asset value than it would if the Fund invested in a larger number of securities. Although that strategy has the potential to generate attractive returns over time, it also potentially increases the Fund's volatility and may lead to greater losses.

REIT Risk - Investments in the real estate industry, including REITs, are particularly sensitive to economic downturns and are sensitive to factors such as changes in real estate values, property taxes and tax laws, interest rates, cash flow of underlying real estate assets, occupancy rates, government regulations affecting zoning, land use and rents and the management skill and creditworthiness of the issuer. Companies in the real estate industry also may be subject to liabilities under environmental and hazardous waste laws. In addition, the value of a REIT is affected by changes in the value of the properties owned by the REIT or mortgage loans held by the REIT. REITs are subject to default and prepayment risk. Many REITs are highly leveraged, increasing their risk. A Fund will indirectly bear its proportionate share of expenses, including management fees, paid by each REIT in which it invests in addition to the expenses of the Fund.

Foreign Investments Risks

Foreign investments may be more or less volatile and risky than domestic investments, depending upon the nature of the security and the country of investment.

Foreign Investment Risk - Certain Funds will invest in securities of foreign issuers to varying degrees. Such issuers, like domestic issuers, will be affected by the general financial, political and economic conditions of the country in which they operate. Depending on the foreign jurisdiction, the regulatory standards, reporting practices and disclosure requirements imposed upon such issuers may be different than those in North America. Certain foreign stock markets may not be sufficiently regulated and may have lower trading volumes and suffer greater volatility than those in North American markets. As a result, the value of foreign securities could be adversely affected.

Emerging Markets Risk - In addition to the risks of investing in foreign investments generally, emerging markets investments are subject to greater risks arising from political or economic instability, nationalization or confiscatory taxation, currency exchange restrictions, sanctions by the U.S. government and an issuer's unwillingness or inability to make principal or interest payments on its obligations. Emerging markets companies may be smaller and have shorter operating histories than companies in developed markets.

Foreign Currency Risk - The Funds are valued in Canadian dollars. If a Fund purchases a foreign security, it will be purchased and valued for investment purposes in a foreign currency. As a result, to the extent there are changes in the value of the foreign currency in relation to the Canadian currency, the value of the foreign security will be affected. The value will rise if the relative value of the foreign currency compared to the Canadian dollar rises and similarly will fall in the case of a drop in the relative value of the foreign currency. A Fund may elect not to hedge currency risk, or may hedge such risk imperfectly, which may cause the Fund to incur losses that would not have been incurred had the risk been hedged.

Other Investment Risks

Concentration Risk - Some Funds concentrate their investment holdings in specialized industries, market sectors, asset classes or in a limited number of issuers. Investments in these Funds involve greater risk and volatility than broadly based investment portfolios since the performance of one particular industry, market, asset class or issuer could significantly and adversely affect the overall performance of the entire Fund.

Series Risk - Each Fund issues several series of shares or units, each priced separately. Each series is responsible for its own expenses (being those expenses that relate specifically to that series). However, if a Fund is unable to pay the specific expenses of a series from the Fund portfolio assets which are attributable to that series, the Fund may be required to use the assets attributable to another series to pay those expenses. As a result, the value of the other series may be adversely affected. The Manager will seek to manage the Funds to prevent this from happening.

Liquidity Risk - Certain securities held by a Fund may be illiquid as the Fund may be unable to sell the security in the market easily at a value which approximates the value at which the security was valued by the Fund for pricing purposes. As a result, these securities may sell at a discount which could adversely affect the value of the investment portfolio. The securities regulatory authorities restrict the percentage of assets of a Fund that may be invested in illiquid securities.

Income Trust Risk - Income trusts generally hold securities in, or are entitled to receive royalties from, an underlying active business. To the extent that an underlying business is susceptible to business or industry risks, interest rate fluctuations, commodity prices and other economic factors,

investment returns from an income trust may be similarly affected. Although their returns are neither fixed nor guaranteed, income trusts are structured in part to provide a constant stream of income to investors. As a result, an investment in an income trust may be subject to interest rate risk. There is also a risk that where claims against an income trust are not satisfied by that trust, investors in that trust could be held liable for any outstanding obligations. As well, tax changes have been made which reduce the tax efficiency of income trusts.

Management Risk - A strategy used by a Fund's portfolio manager or Sub-Advisor may fail to produce the intended result.

ETF Risk - A Fund may invest in an underlying fund whose securities are listed for trading on an exchange (an "**exchange traded fund**" or "**ETF**"). The investments held by ETFs may include stocks, bonds, commodities and other financial instruments. Some ETFs, known as index participation units ("**IPUs**"), attempt to replicate the performance of a widely quoted market index. Not all ETFs are IPUs. While investment in an ETF generally presents the same risks as investment in a conventional mutual fund that has the same investment objective and strategies, it also carries the following additional risks, which do not apply to investment in conventional mutual funds:

- An ETF's securities may trade at a premium or a discount to their net asset value. In addition, commissions may apply to the purchase or sale of an ETF's securities. Therefore, investment in an ETF's securities may produce a return that is different than the change in the net asset value of these securities.
- An active trading market for an ETF's securities may fail to develop or fail to be maintained.
- There is no assurance that the ETF will continue to meet the listing requirements of the exchange on which its securities are listed for trading.

Short Selling Risk - Certain Funds may engage in a limited amount of short selling at a future date. A "**short sale**" is where a Fund borrows securities from a lender which are then sold in the open market (or "**sold short**"). At a later date, the same number of securities are repurchased by the Fund and returned to the lender. In the interim, the proceeds from the first sale are deposited with the lender. If the value of the securities declines between the time that the Fund borrows the securities and the time it repurchases and returns the securities, the Fund makes a profit for the difference (less any interest the Fund is required to pay to the lender). Short selling involves certain risks. There is no assurance that securities will decline in value during the period of the short sale sufficient for the Fund to make a profit, and securities sold short may instead appreciate in value. The Fund also may experience difficulties repurchasing and returning the borrowed securities if a liquid market for the securities does not exist. The lender from whom the Fund has borrowed securities may go bankrupt and the Fund may lose the collateral it has deposited with the lender. Each Fund that engages in short selling will adhere to controls and limits that are intended to offset these risks by short selling only securities of larger issuers for which a liquid market is expected to be maintained and by limiting the amount of exposure for short sales. The Funds will also deposit collateral only with lenders that meet certain criteria for creditworthiness and only up to certain limits.

Depository Receipt Risk - Banks or other financial institutions, known as depositories, issue depository receipts that represent the value of securities issued by foreign companies. These receipts are most often known as ADRs (American Depository Receipts), GDRs (Global Depository Receipts), or EDRs (European Depository Receipts), depending on the location of the depository. Funds may invest in depository receipts to obtain indirect ownership of foreign securities without trading on foreign markets. There is a risk that the value of the depository receipts may be less than the value of the foreign securities. This difference can result from several factors: fees and

expenses related to the depositary receipts, fluctuations in the exchange rate between the currency of the depositary receipts and the currency of the foreign securities; differences in taxes between the depositary receipts' and the foreign securities' jurisdictions; and the impact of the tax treaty, if any, between the depositary receipts' and the foreign securities' jurisdictions. Also, a Fund faces the risks that depositary receipts may be less liquid, that the holders of depositary receipts may have fewer legal rights than if they held the foreign securities directly, and that the depositary may change the terms of a depositary receipt, including terminating the depositary receipt, in such a way that a Fund is forced to sell at an inopportune time.

Derivatives Risk - Each of the Funds may use derivative investments to help them achieve their investment objectives.

A derivative is an investment instrument whose value fluctuates with the value of an underlying asset which may be a currency, a security, a stock index or a commodity. Some derivatives trade on organized stock exchanges while others are traded through the over-the-counter market. The securities regulatory authorities have stipulated the permitted types of derivative instruments that a Fund may use and the manner in which they may be used. Generally, the Funds may use four types of derivatives, being options, futures, forwards and swaps for both hedging purposes (for defensive purposes to limit or hedge potential losses) and non-hedging purposes (for non-defensive purposes) such as obtaining exposure to financial markets, reducing transaction costs, creating liquidity and increasing the speed of portfolio transactions.

The use of derivatives by a Fund carries several risks:

- Although the Fund may use derivatives for hedging or defensive purposes, the strategy may not always be effective. There may be an imperfect correlation between changes in the market value of the investment being hedged and the hedging derivative. Hedging does not eliminate changes in the prices of the Fund securities or necessarily prevent losses if the prices of such securities decline. Lastly, a hedge may reduce the opportunity for gain if the value of the hedged asset should rise.
- There is no guarantee that a market will exist for some derivatives at the time that the Fund wishes to buy or sell the derivative contract. This may prevent the Fund from closing out its position at the desired time. As a result, the Fund may be unable to realize its profits or limit its losses.
- It is possible that the other party to the derivative contract will not meet its obligations under the contract.
- When entering into a derivative contract, the Fund may be required to deposit funds with the contract counterparty and, as a result, the Fund is subject to the credit risk of such counterparty. If the counterparty goes bankrupt, the Fund could lose those monies.
- Securities and commodities exchanges could set daily trading limits on options and futures. This could prevent the Fund or the counterparty from carrying out its obligations under those derivative contracts. Alternatively, an exchange may stop trading in a derivative contract. This could prevent the Fund from closing out its position in that contract.
- The price of a derivative may not reflect the true value of the underlying asset.

Tax Treatment of Certain Derivatives Risk - In determining their income for tax purposes, the Funds will treat on capital account derivatives that are (A) used to hedge risks associated with securities held on capital account, and (B) not used (i) to speculate, (ii) to seek to increase returns

independent of the risks hedged, or (iii) to generate independent income. The practice of the Canada Revenue Agency ("CRA") is not to grant advance income tax rulings on the characterization of items as capital or income. No advance income tax ruling has been sought or received from the CRA. Accordingly, there is a risk that the CRA may disagree with the tax treatment adopted by the Funds. In such case, the net income of the Funds for tax purposes and the taxable component of distributions to investors could subsequently be determined to be more than originally reported. Investors could be reassessed or the Funds could be liable for income tax. Also, the Funds could become liable for unremitted withholding taxes on prior distributions made to non-resident investors. Any liability imposed on the Funds may reduce the value of the Funds and the value of an investor's investment in the Funds.

Options Risk - Options can be used to acquire or transfer the risk and returns of a security or other asset without buying or selling the security or asset. The value of a Fund's positions in index options will fluctuate in response to changes in the value of the underlying index. Writing index call options or purchasing put options can reduce the risk of owning stocks. Writing call options limits the opportunity to profit from an increase in the market value of stocks in exchange for up-front cash at the time of selling the call option. A Fund also risks losing all or part of the cash paid for purchasing index put options. Unusual market conditions or the lack of a ready market for any particular option at a specific time may reduce the effectiveness of a Fund's option strategies, and for these and other reasons a Fund's option strategies may not reduce the Fund's volatility to the extent desired.

Option Tax Risk (applicable to the Gateway Fund only) - As described in Part B of the simplified prospectus, the Gateway Fund writes index call options and buys index put options pursuant to its investment strategy. If the Gateway Fund's investment strategy was considered to give rise to a "synthetic disposition arrangement" ("SDA") in respect of equity securities of the Fund, the Fund may be considered for tax purposes to have disposed of such securities at the time the relevant SDA is entered into rather than the time that the securities are actually sold or otherwise disposed of, and there is a risk that the tax consequences to the Fund and investors may be materially and adversely different than if the strategy did not give rise to an SDA.

Large Investor Risk - Certain Funds may have investors who have invested substantial amounts in the Funds, including those investments made in fund-on-fund arrangements. In addition, the Manager may invest a significant amount of seed capital in each of the Funds. Depending upon the circumstances, redemption of the securities of a Fund by these investors may adversely affect the investment returns of a Fund. The Fund may be required to sell a large number of portfolio securities at unfavourable prices to pay the redemption proceeds.

Repurchase and Reverse Repurchase Transactions and Securities Lending Risk - The securities regulatory authorities permit a Fund to enter into security lending, repurchase and reverse repurchase transactions subject to certain conditions imposed to minimize risk. Essentially, these transactions permit a Fund to earn fees or income in exchange for an agreement to: (i) lend securities to a third party which are returnable to the Fund on demand in exchange for prescribed collateral (securities lending); (ii) sell securities to a third party for cash with an obligation to repurchase such securities (typically at a higher price) for cash at a later date (repurchase agreements); and (iii) purchase securities from a third party for cash with an obligation to resell such securities (typically at a higher price) for cash at a later date (reverse repurchase agreements). Engaging in these transactions carries the following risks:

- The Fund is subject to the credit risk that the other party to the transaction may default on its obligations under the agreement or go bankrupt.

- In the case of a repurchase or securities lending transaction, the Fund could suffer a loss if the value of the securities sold or loaned rises in value relative to the cash or collateral held.
- In a reverse repurchase agreement, the Fund may also suffer a loss if it is not able to resell the securities or the sale price is less than the purchase price.

The Funds do not currently engage in securities lending repurchase or reverse repurchase transactions nor is there any current intention to do so. If that intention changes, the Funds will effect such transactions in accordance with applicable securities legislation.

Cyber Security Risk

As the use of technology has become more prevalent in the course of business, the Funds have become potentially more susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Funds to lose proprietary information, suffer data corruption, or lose operational capacity. This in turn could cause the Funds to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures, and/or financial loss. Cyber security breaches may involve unauthorized access to the Funds' digital information systems (e.g., through "hacking" or malicious software coding), but may also result from outside attacks such as denial-of-service attacks (i.e., efforts to make network services unavailable to intended users). In addition, cyber security breaches of the Funds' third-party service providers (e.g., Portfolio Managers, Sub-Advisors, Custodian, Registrar and Securities Lending Agent) or issuers in which the Funds invest can also subject the Funds to many of the same risks associated with direct cyber security breaches. As with operational risk in general, the Manager has established risk management systems designed to reduce the risks associated with cyber security. However, there is no guarantee that such efforts will succeed, especially since the Manager does not directly control the cyber security systems of issuers in which the Funds invest or third-party service providers.

Company Structure Risks

The Class Funds are offered through a corporate structure which has numerous advantages which are discussed in this document. The structure also has the following risks. In addition, the Registered Funds are subject to Class and Fund Risk, outlined below, as a result of the investment structure and the investment of a Registered Fund's assets in the underlying Class Fund.

Class and Fund Risk - The Class Funds are separate investment portfolios comprised of several classes of shares of the Corporation. As a result, the liabilities of each of these classes and of the investment portfolio comprising each Class Fund are liabilities of the Corporation. If a class of a Class Fund or the investment portfolio which comprises the Fund is unable to pay the liabilities attributable to that class or Fund, including in the case of the Inter-Fund classes the limited recourse debt, the Corporation may be required to use the assets attributable to another class of the Class Fund or, except for the limited recourse debt, another Class Fund, to pay those liabilities. As a result, the value of the other Class Funds, including their respective classes, and indirectly a Registered Fund, to the extent its assets are invested in a class of the underlying Class Fund, may be adversely affected.

The Manager will seek to manage the Class Funds to prevent this from happening. In respect of the Inter-Fund classes, the Manager has implemented the following restrictions. Firstly, the debt issued by the Corporation in respect of the Inter-Fund class of each Class Fund to its corresponding Registered Fund is limited in its recourse to the assets of that Inter-Fund class. Secondly, the Manager has designed the debt to equity structure within the Inter-Fund classes to address a decline in the equity markets which would adversely affect the value of the Inter-Fund class shares.

Specifically, the value of the aggregate debt of each Inter-Fund class (represented by the limited recourse debt issued to its corresponding Registered Fund) to the value of the aggregate equity (represented by the Inter-Fund class shares issued to the Registered Fund) is maintained at a ratio of one to one within prescribed tolerance levels of plus or minus 5%. As a result, if the value of the aggregate equity of any Inter-Fund class declines to 45% of the aggregate value of the combined debt and equity or increases to 55% of such value, an equivalent portion of the existing debt will be sold or increased to ensure that the debt to equity ratio of such Inter-Fund class will always be maintained within the prescribed tolerance levels and returned to a ratio of 1 to 1.

Taxation of the Corporation Risk - Investment income and capital gains earned and expenses paid by the Class Funds are aggregated within, and reported by, the Corporation. Tax liabilities on investment income and capital gains earned by the Corporation cannot be mitigated nor can they be fully managed in all circumstances. A mutual fund corporation is permitted to flow through capital gains and dividends from taxable Canadian corporations to investors but is prohibited from flowing other forms of income including interest and foreign source dividend income ("**Non-Distributable Income**"). As a result, if the Non-Distributable Income of the Corporation is greater than the expenses of the Corporation including interest expense on the debt issued in respect of the Inter-Fund classes and available non-capital loss carry forwards, the Corporation would become taxable. If the Corporation becomes taxable any resulting tax liability would be allocated to the various Class Funds, Tax Classes and series of the Class Funds on an equitable basis, in the discretion of the Manager.

The likelihood of the Corporation becoming taxable should generally: (i) increase, the greater proportion of the assets of the Corporation invested in securities generating interest and foreign source dividend income; and (ii) lessen, the greater the assets of the Registered Funds and therefore the assets of the Inter-Fund classes, resulting in higher interest expense deductions.

Tax Class Distributions Risk - Each Class Fund currently offers the following three Tax Classes of shares under this simplified prospectus with specific tax objectives: Compound Growth, Dividend and Return of Capital.

Tax liabilities on investment income and capital gains earned by the Corporation cannot be mitigated nor can they be fully managed in all circumstances. This risk increases the greater the investment returns earned by a Class Fund and is impacted by the returns of other Class Funds. Accordingly, a Class Fund may from time to time be required to make taxable distributions to investors in one or more of the Tax Classes to eliminate or reduce the overall tax liability of the Corporation which are not optimal or in accordance with the tax objectives of such Tax Classes. The consequences of such distributions will vary considerably based on an investor's personal tax circumstances and should be discussed with your financial advisor.

The Manager believes, based upon, among other matters, the current capital gains and Canadian dividend income within the Corporation, that there is an increased likelihood that investors in one or more of the Tax Classes will receive a non-optimal taxable distribution (the "**Non-Optimal Distributions**") in 2019.

The tax efficiency of the Return of Capital, Dividend and Compound Growth classes should generally be enhanced the greater the demand for Inter-Fund class shares (as a result of demand for units of the Registered Funds). Demand for these shares will result in a greater amount of capital gains being distributed on the Inter-Fund Class Shares, thus reducing the likelihood of capital gains being distributed to the holders of shares of the following classes: Return of Capital, Dividend and Compound Growth.

The tax efficiency of the Return of Capital and Compound Growth classes should generally be enhanced the greater the demand for shares with a preference for Canadian taxable dividends, including for Dividend and Inter-Fund class shares (as a result of demand for units of the Registered Funds). Demand for these shares will result in a greater amount of Canadian taxable dividends being distributed to holders of such shares reducing the likelihood of distributions of Canadian taxable dividends to the Return of Capital and Compound Growth classes.

To the extent that the Corporation earns insufficient dividend income to satisfy the objectives of the Dividend class, the Corporation may declare Canadian taxable dividends in excess of the Canadian taxable dividends received by the Corporation.

Taxation Structure Risk - The Corporation's corporate fund structure provides several tax planning solutions to investors which are not available through traditional mutual funds. Certain aspects of the corporate fund structure are described and claimed in a pending Canadian patent application. Although the Manager believes that the tax benefits of the current structure are based upon proven legal and tax principles that have been accepted by the CRA, there is no assurance that the CRA will not review the current structure or certain of the tax principles underlying the structure or adopt or change tax policies which will adversely affect or alter the tax efficiency of the current structure.

Exchange Transaction Risk

Triggering Capital Gains on Redemption Risk - Investors who have provided Exchangeable Securities (as defined below) to subscribe for Series I shares of the Class Funds and have filed a joint election that is made with the Corporation under subsection 85(1) of the *Income Tax Act (Canada)* ("**Tax Act**") (the "**Joint Tax Election**") to defer all or a portion of the capital gain on the disposition of the Exchangeable Securities will acquire the Series I Shares at a cost less than fair market value and may realize a deferred capital gain when they redeem their Series I shares, regardless of whether such Series I shares have increased in value.

Accrued Capital Gains may be Realized by the Corporation Risk- Where a Joint Tax Election is filed, the cost of the Exchangeable Securities to the Corporation will be equal to the elected amount which will be less than the fair market value of the Exchangeable Securities such that the Corporation may realize the accrued gain on the ultimate disposition of the Exchangeable Securities (or property identical to the Exchangeable Securities).

Adverse Tax Treatment Risk – An investor who provided Exchangeable Securities to the Corporation to subscribe for Series I shares and who does not enter into a Joint Tax Election with the Corporation generally will realize a capital gain (or a capital loss) in the taxation year of the investor in which the disposition of Exchangeable Securities takes place, to the extent that the proceeds of disposition for such Exchangeable Securities, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base of such Exchangeable Securities to the investor.

Tax Risks Applicable to Single Trust Funds and Registered Funds

Loss Restriction Event - A trust is subject to a "loss restriction event" for the purposes of the Tax Act if a person becomes a "majority-interest beneficiary" of the trust, or a group of persons becomes a "majority-interest group of beneficiaries" of the trust, as those terms are defined in the Tax Act. Generally, a majority-interest beneficiary of a trust is a unitholder who, together with persons and partnerships with whom the unitholder is affiliated, owns units with fair market value that is greater than 50% of the fair market value of all units of the trust. If a trust experiences a "loss restriction event" (i) it will be deemed to have a year-end for tax purposes (which would result in an allocation of the trust's taxable income at such time to unitholders so that the trust is

not liable for income tax on such amounts), and (ii) it will become subject to the loss restriction rules generally applicable to corporations that experience an acquisition of control, including a deemed realization of any unrealized capital losses and restrictions on their ability to carry forward losses. As a result of the application of these rules, the amount of distributions paid by the trust after a loss restriction event may be larger than it otherwise would have been. However, no person or group of persons should become a majority-interest beneficiary or majority-interest group of beneficiaries of a trust as long as the trust qualifies as an “investment fund” under the Tax Act by satisfying certain investment diversification and other conditions. While it is expected that each Single Trust Fund and Registered Fund will qualify as an investment fund, there can be no assurance that any such Fund will not cease to qualify in which case such status would be permanently lost.

Allocation of Gains to Redeemers - The 2019 Canadian federal budget proposes amendments to the Tax Act that will eliminate the ability of a mutual fund trust to distribute ordinary income as part of the redemption price of units and will restrict the ability of a mutual fund trust to distribute capital gains as part of the redemption price of units to an amount not exceeding the unitholder’s accrued gain on the units redeemed. Certain of the Single Trust Funds have allocated capital gains on the redemption of units. The result of the proposed amendments may be that the Single Trust Funds will not be able to allocate as much, or any, capital gains to unitholders on the redemption of units and will be required to make larger taxable distributions to unitholders that remain in the Fund.

Organization and Management of the Funds

The table below provides the name of the persons who provide services to the Funds and the nature of those services.

Manager	
Fiera Investments LP 145 King Street West Suite 1500 Toronto, ON M5H 1J8 im.natixis.ca	The Manager is responsible for the day to day undertaking and operations of the Funds, including selecting the portfolio manager, providing administration services and marketing and sales support. The Manager hires third parties to perform certain services for it and the Funds.
Principal Distributor	
Fiera Investments LP Toronto, Ontario	Fiera Investments arranges for sales of the Funds’ securities through dealers and brokers in all the provinces and territories of Canada.
Trustee	
Fiera Investments LP Toronto, Ontario	Some of the Funds are trusts (as opposed to classes that are part of a mutual fund corporation), which require the appointment of a trustee. The trustee holds title to the investments of the Funds structured as trusts on behalf of the investors.
Portfolio Managers	
Loomis, Sayles & Company, L.P. (“ Loomis Sayles ”) Boston, Massachusetts	Loomis Sayles is the portfolio manager of the Loomis Sayles Strategic Monthly Income Fund. As Loomis Sayles is resident in the United States and all of its assets are outside Canada, it may be difficult to enforce legal rights against it. Loomis Sayles is not an affiliate of the Manager.

<p>Gateway Investment Advisers, LLC ("Gateway") Cincinnati, Ohio</p>	<p>Gateway is the portfolio manager of the Ordinary Class of the Gateway Fund. As Gateway is resident in the United States and all its assets are outside Canada, it may be difficult to enforce legal rights against it. Gateway is not an affiliate of the Manager.</p>
<p>Fiera Investments LP Toronto, Ontario</p>	<p>Fiera Investments is the portfolio manager of the remaining Funds, including the Hedged Class of the Gateway Fund.</p> <p>As portfolio managers, Fiera Investments, Loomis Sayles and Gateway provide investment advice directly to the applicable Funds.</p> <p>Fiera Investments may provide investment advice directly to the Funds and/or retain third-party sub-advisors to provide it with advice in respect of the Funds. Fiera Investments is responsible for the investment advice provided by the sub-advisors.</p>
<p>Sub-Advisors</p>	
<p>J. Zechner Associates Inc. ("Zechner") Toronto, Ontario</p>	<p>As sub-advisor to Fiera Investments in respect of Fiera Canadian Bond Fund, Fiera Canadian Bond Class, Fiera Canadian Preferred Share Registered Fund, Fiera Canadian Preferred Share Class, Fiera Intrinsic Balanced Registered Fund (fixed income portion only) and Fiera Intrinsic Balanced Class (fixed income portion only), Zechner gives advice and makes investment recommendations to Fiera Investments for these Funds. Zechner is not an affiliate of the Manager.</p>
<p>Galibier Capital Management Ltd. ("Galibier") Toronto, Ontario</p>	<p>As sub-advisor to Fiera Investments in respect of Fiera Intrinsic Balanced Registered Fund (equity portion only), Fiera Intrinsic Balanced Class (equity portion only), Fiera Intrinsic Growth Registered Fund and Fiera Intrinsic Growth Class, Galibier gives advice and makes investment recommendations to Fiera Investments for these Funds. Galibier is not an affiliate of the Manager.</p>
<p>Cidel Asset Management Inc. ("Cidel") Toronto, Ontario</p>	<p>As sub-advisor to Fiera Investments in respect of Fiera Strategic Balanced Registered Fund, Fiera Strategic Balanced Class, Fiera Canadian Dividend Registered Fund, Fiera Canadian Dividend Class, Fiera Core Global Equity Registered Fund and Fiera Core Global Equity Class, Cidel gives advice and makes investment recommendations to Fiera Investments for these Funds. Cidel is not an affiliate of the Manager.</p>
<p>Harris Associates L.P. ("Harris") Chicago, Illinois</p>	<p>As sub-advisor to Fiera Investments in respect of Oakmark U.S. Equity Class and Oakmark International Equity Class (the "Oakmark Class Funds"), Harris gives advice and makes recommendations to Fiera Investments in respect of these Funds. Given that Oakmark U.S. Equity Registered Fund and Oakmark International Equity Registered Fund invest substantially all their respective assets in the underlying Oakmark Class Funds, their returns will be determined by the</p>

	<p>performance of the Oakmark Class Funds in which all the active management is conducted.</p> <p>Harris is not an affiliate of the Manager. As Harris is resident in the United States and all of its assets are outside Canada, it may be difficult to enforce legal rights against it.</p>
<p>Loomis Sayles Boston, Massachusetts</p>	<p>As sub-advisor to Fiera Investments in respect of Loomis Sayles Global Diversified Corporate Bond Fund and Loomis Sayles Global Diversified Corporate Bond Class, Loomis Sayles gives advice and makes investment recommendations to Fiera Investments for these Funds.</p> <p>Loomis Sayles is not an affiliate of the Manager. As Loomis Sayles is resident in the United States and all of its assets are outside Canada, it may be difficult to enforce legal rights against it.</p>
<p>Ziegler Capital Management LLC ("Ziegler") Chicago, Illinois</p>	<p>As sub-advisor to Fiera Investments in respect of Fiera U.S. Dividend Registered Fund and Fiera U.S. Dividend Class, Ziegler gives advice and makes investment recommendations to Fiera Investments for these Funds.</p> <p>Ziegler is not an affiliate of the Manager. As Ziegler is resident in the United States and all of its assets are outside Canada, it may be difficult to enforce legal rights against it.</p>
<p>JPMorgan Asset Management (Canada) Inc. ("JPMAMC") Vancouver, British Columbia</p>	<p>As sub-advisor to Fiera Investments in respect of Fiera U.S. Growth Class, JPMAMC gives advice and makes recommendations to Fiera Investments for this Fund. Given that Fiera U.S. Growth Registered Fund invests substantially all of its assets in Fiera U.S. Growth Class, its returns will be determined by the performance of the Class Fund in which all the active management is conducted.</p> <p>JPMAMC is not an affiliate of the Manager.</p>
<p>J.P. Morgan Investment Management Inc. ("JPMIM") New York, New York</p>	<p>JPMAMC has retained JPMIM to act as an advisor to it in respect of Fiera U.S. Growth Class's investment portfolio. JPMAMC, as the sub-advisor to Fiera U.S. Growth Class, has responsibility for the investment advice provided to it by JPMIM.</p> <p>JPMIM is not an affiliate of the Manager. As JPMIM is resident in the United States and all of its assets are outside Canada, it may be difficult to enforce legal rights against it.</p>
<p>Custodian</p>	
<p>State Street Trust Company Canada Toronto, Ontario</p>	<p>The custodian is responsible for the safekeeping of the assets of the Funds. It may retain the services of sub custodians in Canada and throughout the world to hold the assets of the Funds. The custodian is not an affiliate of the Manager.</p>
<p>Registrar</p>	
<p>International Financial Data Services (Canada) Limited Toronto, Ontario</p>	<p>The registrar keeps track of the security holders of each of the Funds and processes changes in ownership. The registrar is not an affiliate of the Manager.</p>

Securities Lending Agent

State Street Bank and Trust Company
Toronto, Ontario

The securities lending agent administers the securities lending, repurchase and reverse repurchase transactions entered into by each Fund. Currently, the Funds do not engage in securities lending or repurchase or reverse repurchase transactions and there is no current intention to do so. The securities lending agent is not an affiliate of the Manager.

Auditor

Deloitte LLP
Toronto, Ontario

The auditor reports on the annual financial statements of the Funds. Deloitte LLP is an independent firm of Chartered Professional Accountants.

Independent Review Committee

Current Members:
Alan Hutton (Chairman)
Edward Zinger
Graham Turner

National Instrument 81-107 - Independent Review Committee for Investment Funds ("**NI 81-107**") requires all investment funds that are reporting issuers, including the Funds, to establish an independent review committee to whom the Manager must refer all conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintain records in respect of these matters and provide assistance to the independent review committee in carrying out its functions. The independent review committee must be comprised of a minimum of three independent members, adopt a written charter setting forth its mandate, responsibilities and functions and the policies and procedures it will follow when performing its functions and will be subject to requirements to conduct regular assessments and provide reports to the Manager and the Funds' securityholders in respect of its functions.

The independent review committee prepares at least annually a report of its activities for Fund securityholders which is available on the Manager's internet site at im.natixis.ca or at the securityholder's request, free of charge, by calling toll-free: 1-866-378-7119, by sending an email to: info.canada@natixis.com or by mailing: Fund Administration, Fiera Investments, 145 King Street West, Suite 1500, Toronto, Ontario M5H 1J8. The 2018 report is now available.

Each member of the independent review committee receives an annual retainer. The costs and expenses relating to the independent review committee are paid for by the Funds.

Additional information about the independent review committee, including the names of the members, is available in the annual information form.

Fund-on-Fund Arrangements

Each Registered Fund invests substantially all of its assets in its respective underlying Class Fund. Each of the Bond Class Funds invests substantially all of its respective assets in units of Fiera Canadian Bond Fund or Loomis Sayles Global Diversified Corporate Bond Fund. In addition, other top Funds may invest in securities of other underlying Funds managed by us. In all such circumstances, we will not vote the securities of the underlying Fund owned by the top Fund. We may, in our discretion, choose to flow through the voting rights attached to securities of our underlying Fund to investors in the top Fund.

As a result of these fund-on-fund arrangements: (i) investment returns in the Registered Funds will be determined by the investment performance of the corresponding Class Fund in which all the active management is conducted; and (ii) investment returns in the Bond Class Funds will be determined by the investment performance of the corresponding Single Trust Fund in which all the active management is conducted.

Certain Changes Without Securityholder Approval

A Fund may: (i) engage in a reorganization or transfer of assets with another investment fund managed by us or an affiliate that meets certain criteria set out in National Instrument 81-102; or (ii) change its auditors, each without securityholder approval, if the reorganization or transfer, or the change in auditors, as the case may be, is approved by the Independent Review Committee and the Fund sends written notice of the change to its securityholders at least 60 days prior to making the change.

Purchases, Switches and Redemptions

You may purchase securities of the Funds through various purchase options. The options selected will depend upon numerous factors, including your investment horizon, your existing investment portfolio, whether you are a taxable or non-taxable investor, your tax objectives, the nature of the fees and expenses and the amount invested. The available purchase options and decision flow are as follows:

1. ***Account Type (applicable to all investors)*** - If you are a non-taxable investor and are purchasing the Funds for investment in a registered account, you must purchase units of the Single Trust Funds or the Registered Funds. You may also purchase Series F shares of the Return of Capital and Dividend classes of the following Class Funds in a registered account: Fiera Strategic Balanced Class, Fiera Intrinsic Balanced Class, Fiera Canadian Dividend Class, Fiera Intrinsic Growth Class, Fiera U.S. Dividend Class, Fiera U.S. Growth Class, Fiera Core Global Equity Class, Fiera Canadian Preferred Share Class, Oakmark U.S. Equity Class, and Oakmark International Equity Class.

If you are a taxable investor and are purchasing the Funds for investment in a non-registered account, you must purchase shares of any series of any Class Fund or units of any Single Trust Fund.

2. ***Appropriate Fund (applicable to all investors)*** - Following the determination of the account type, you must determine the appropriate Fund for investment. You have a number of different investment mandates to choose from in different asset classes ranging from fixed income to equity portfolios. In consultation with your financial advisor, you should review the Fund profiles in Part B of this document and select the appropriate Fund(s) based on your investment needs and after-tax income requirements.
3. ***Appropriate Tax Class (applicable to taxable investors only)*** - Each of the Class Funds possesses a multi-class structure, containing three Tax Classes of shares (as well as certain non-publicly offered classes of shares) within a Class Fund. This structure permits you to select a

specific class within the Class Fund that meets your tax objectives. The investment structure of the Corporation has embedded the tax planning attributes of the various classes at the product level. Each of these classes, in respect of a Class Fund, shares one investment portfolio and each is divided into multiple series.

The following comments have been provided to help you understand the general applicability of the various Tax Classes. However, because tax rates vary considerably by province and territory and income tax rules are complex and subject to frequent change, you should consult your financial advisor at least annually as to which Tax Class is appropriate for your circumstances. In addition, as individual circumstances change, you may require a mix of shares of different Tax Classes or a rebalancing of that mix within your portfolio. Such rebalancing transactions, however, can no longer be done on a tax deferred basis. Only a switch between series of a class of a Class Fund will continue not to be treated as a disposition for tax purposes.

Tax Classes

The three Tax Classes offered by each Class Fund and the attributes of each such Tax Class are as follows:

- ▶ **Return of Capital** - The objective of this class is to provide a fixed monthly distribution, consisting primarily of a return of investor capital. The applicable distribution rate varies by Class Fund and may be adjusted annually based upon the annual distribution as a percentage of net asset value per security at the date of adjustment. The distribution rates for the Funds are set out in the table below:

Fund (and Tax Class, if applicable)	Monthly Rate	Annual Rate
Fiera Canadian Bond Class	\$0.03	\$0.36
Loomis Sayles Global Diversified Corporate Bond Class	\$0.03	\$0.36
Fiera Canadian Preferred Share Class	\$0.0425	\$0.51
Fiera Strategic Balanced Class	\$0.04	\$0.48
Fiera Intrinsic Balanced Class	\$0.03	\$0.36
Fiera Canadian Dividend Class	\$0.035	\$0.42
Fiera Intrinsic Growth Class	\$0.055	\$0.66
Fiera U.S. Dividend Class	\$0.085	\$1.02
Fiera U.S. Growth Class	\$0.075	\$0.90
Fiera Core Global Equity Class	\$0.07	\$0.84
Oakmark U.S. Equity Class	\$0.06	\$0.72
Oakmark International Equity Class	\$0.045	\$0.54

These shares are suitable investments for: (i) higher-income investors seeking tax efficient cash flow from an equity, balanced or fixed income portfolio; (ii) investors who invest through a holding corporation and need tax efficient cash flow to fund a corporately owned permanent insurance policy; (iii) retired investors who require additional cash flow but want to manage "clawback" on old age security payments; and (iv) philanthropic investors in need of a tax-efficient vehicle to facilitate charitable giving.

A return of capital distribution is not taxable. However, the distribution decreases the adjusted cost base of the shares, resulting in an increased capital gain (or smaller capital loss) when the shares are eventually sold. If the distribution causes the investor's adjusted cost base to become negative at any time, the negative amount is taxed as a capital gain returning the adjusted cost base of the shares to zero.

The monthly distribution may also include capital gains dividends and Canadian taxable dividends to the extent that the Corporation is required to declare capital gains dividends and Canadian taxable dividends to eliminate the overall tax liability of the Corporation.

The Return of Capital class provides for fixed distributions. To the extent that an investor in this Tax Class receives distributions which exceed the income and capital appreciation made on their investment, that difference will be a return of a portion of the original amount invested and reduce that invested amount.

- **Dividend** - The objective of this class is to provide a fixed monthly dividend, consisting primarily of taxable Canadian dividends. The applicable distribution rate varies by Fund and may be adjusted annually based upon annual distribution as a percentage of the net asset value per security at the date of adjustment. The distribution rates for the Funds are set out in the table below:

Fund (and Tax Class, if applicable)	Monthly Rate	Annual Rate
Fiera Canadian Bond Class	\$0.03	\$0.36
Loomis Sayles Global Diversified Corporate Bond Class	\$0.03	\$0.36
Fiera Canadian Preferred Share Class	\$0.0425	\$0.51
Fiera Strategic Balanced Class	\$0.04	\$0.48
Fiera Intrinsic Balanced Class	\$0.035	\$0.42
Fiera Canadian Dividend Class	\$0.035	\$0.42
Fiera Intrinsic Growth Class	\$0.055	\$0.66
Fiera U.S. Dividend Class	\$0.085	\$1.02
Fiera U.S. Growth Class	\$0.075	\$0.90
Fiera Core Global Equity Class	\$0.07	\$0.84
Oakmark U.S. Equity Class	\$0.06	\$0.72
Oakmark International Equity Class	\$0.045	\$0.54

Approximately the first \$52,070 (\$39,500 in the Province of Quebec) of Canadian eligible dividend income may be received on a tax-free basis by individual investors with no other sources of income in 2019. This threshold may vary significantly depending upon your province or territory of residence.

These shares are suitable investments for: (i) investors seeking to take advantage of the preferential tax treatment of Canadian eligible dividends; (ii) investors interested in income splitting with low income family members; (iii) individuals in the lowest tax brackets who wish to receive tax efficient investment income; and (iv) investors who invest through a holding corporation and need a tax efficient income to flow through the corporation.

The monthly dividend may also include capital gains dividends to the extent that the Corporation is required to declare capital gains dividends to eliminate the overall tax liability of the Corporation.

The Dividend class provides for fixed distributions. To the extent that an investor in this Tax Class receives distributions which exceed the income and capital appreciation made on their investment, that difference will be a return of a portion of the original amount invested and reduce that invested amount.

- **Compound Growth** - The objective of this class is to maximize the after-tax value of an investor's portfolio, by minimizing, to the extent possible, the amount and frequency of taxable distributions to the investor. This class may declare an annual distribution of capital gains dividends and/or Canadian taxable dividends to the extent that the Corporation is required to

declare capital gains dividends and/or Canadian taxable dividends to reduce or eliminate the annual tax liability of the Corporation.

These shares are suitable investments for investors who wish to focus on capital growth while paying tax in respect of their investment only on a disposition of their investment in the Class Funds or if an annual distribution is declared.

Exchange Transactions

Series I shares of each class of each of Fiera Strategic Balanced Class, Fiera Canadian Dividend Class and Fiera Core Global Equity Class may be sold to certain investors who enter into an agreement with the Manager pursuant to which the investor purchases such shares by: (i) an exchange of securities of eligible Canadian, U.S. or global public companies (an "**Exchangeable Security**") ("**Exchange Transaction**"), and/or (ii) cash payment. Whether an Exchangeable Security is eligible or not will be in the Manager's sole discretion.

The Exchangeable Securities accepted in payment of the purchase price for Series I shares of a Class Fund will be valued on the subscription date (the "**Subscription Date**") at the last sale price of the Exchangeable Security reported before the valuation time on that business day and, if no sale is reported to have taken place before the valuation time on that business day, then will be valued at the average of the last bid and ask prices of the Exchangeable Security reported before that time on that business day.

A prospective purchaser who subscribes for Class Fund shares using the Exchange Transaction will be required to complete a joint Canadian income tax election made under subsection 85(1) of the Tax Act with the Corporation. This will permit the investor to defer paying tax on all or a portion of any accrued capital gain on the Exchangeable Securities. Investors should consult their own tax advisors for advice with respect to the income tax consequences of investing in Class Fund shares having regard to their own particular circumstances. Neither the Manager nor the Corporation assumes liability in respect of a Joint Tax Election other than to execute an election form prepared by the investor. The investor is solely responsible for the preparation and timely filing of the election form. See "Income Tax Considerations".

Classes and Series Not Available for Purchase under this Prospectus

- ▶ **Capital Gains** - Each of the Class Funds offered shares of various series of a Capital Gains class up until May 9, 2017. The objective of this class is to provide a first preference for annual capital gains dividends up to the increase in the net asset value per share for the calendar year, to the extent sufficient capital gains have been realized. It is the Manager's intention to realize capital gains to meet this objective, to the extent possible. All or any portion of the annual distribution may also consist of Canadian taxable dividends to eliminate the overall tax liability of the Corporation.
- ▶ **Return of Capital 6** – Fiera Canadian Bond Class offered shares of various series of the Return of Capital 6 class up until June 5, 2018. The objective of this class is to provide a fixed monthly distribution, consisting primarily of a return of capital. All or any portion of the monthly distribution may also consist of capital gains dividends and Canadian taxable dividends to eliminate the overall tax liability of the Corporation.
- ▶ **Dividend 6** – Fiera Canadian Bond Class offered shares of various series of the Dividend 6 class up until June 5, 2018. The objective of this class is to provide a fixed monthly dividend, consisting primarily of taxable Canadian dividends. All or any portion of the monthly dividend may also include capital gains dividends to eliminate the overall tax liability of the Corporation.

- ▶ **Inter-Fund** - Each Registered Fund invests substantially all its portfolio assets, which consists primarily of cash received from investors, in a combination of non-publicly offered limited recourse debt and Inter-Fund class shares of the underlying Class Fund having a similar investment objective and strategies to the Registered Fund.

The debt consists of limited recourse notes which are redeemable on demand by the Registered Fund and pay interest at a floating rate equal to the prime rate of interest plus 1%. The debt is secured by, and the recourse will be limited to, the assets of that applicable Inter-Fund class. The value of the aggregate debt of the Inter-Fund class (represented by the limited recourse debt issued to the Registered Fund) to the value of the aggregate equity of the Inter-Fund class (represented by Inter-Fund class shares issued to the Registered Fund) is maintained at a ratio of one to one within prescribed tolerance levels of plus or minus 5%. As a result, if the value of the aggregate equity of an Inter-Fund class declines to 45% of the aggregate value of the combined debt and equity of the Inter-Fund class or increases to 55% of such value, an equivalent portion of the existing debt will be sold or purchased to ensure that the debt to equity ratio of such Inter-Fund class will always be maintained within the prescribed tolerance levels and returned to a ratio of 1 to 1.

- ▶ **M class and M series** - Each Fund may issue and/or purchase M class shares and M series units, as the case may be. The objective of M class shares and M series units is to facilitate investments and derivative transactions by the Funds. To ensure there is no inter-fund duplication of fees, no management fees or sales or redemption fees are paid in respect of M class shares and M series units.

The Manager has established preference-based rules relating to the allocation of Canadian taxable dividends and capital gains dividends among Inter-Fund and M classes. These rules are structured to increase the likelihood that all of the Tax Classes will attain their respective objectives, in a manner believed by the Manager to be equitable to each of such Tax Classes.

4. **Appropriate Foreign Currency (*applicable to investors in the Gateway Fund, Fiera Core Global Equity Class and the Oakmark Class Funds only*)**

Hedged vs. Unhedged - Your investment in the Gateway Fund can be exposed to foreign currency fluctuations against the Canadian dollar or you can seek to minimize this exposure:

- ▶ Series A (Hedged) and Series F (Hedged) securities of the Gateway Fund have the same features as Series A and Series F securities of the Gateway Fund, respectively, except that Series A (Hedged) and Series F (Hedged) securities seek to reflect the performance of the Gateway Fund after hedging substantially all the foreign currency exposure of the Fund.
- ▶ Series A (Hedged) and Series F (Hedged) securities are designed for investors who want exposure to foreign investments, but seek to eliminate the impact of foreign currency risk relating to the Canadian dollar on their investments.
- ▶ Series A and Series F are designed for investors who want exposure to both foreign investments and foreign currency.

US\$ Purchase option - Each series of a Fund is valued and can be purchased in Canadian dollars. However, Series A and Series F units of the Gateway Fund and Series A and Series F shares of the Return of Capital and Compound Growth classes of Oakmark U.S. Equity Class may be purchased and redeemed in U.S. dollars. Series F shares of the Return of Capital and Compound Growth classes of Fiera Core Global Equity Class and Oakmark International Equity Class may also be purchased and redeemed in U.S. dollars.

- ▶ The Canadian dollar net asset value for these series of these Funds is converted to U.S. dollars at the prevailing exchange rate on that valuation day to determine the applicable U.S. dollar net asset value per security.
- ▶ The Canadian dollar value of any distribution declared for these series of these Funds is converted to U.S. dollars at the prevailing exchange rate on that valuation day to determine the applicable U.S. dollar value of that distribution.
- ▶ For tax purposes, capital gains and losses are calculated in Canadian dollars. As a result, if you purchased and redeemed securities under the U.S. dollar purchase option, you need to calculate gains or losses based on the Canadian dollar value of your securities when they were purchased and when they were sold. In addition, although distributions and dividends will be made in U.S. dollars, they must be reported in Canadian dollars for Canadian tax purposes. Consequently, all investment income will be reported to you in Canadian dollars for income tax purposes. You may want to consult your tax advisor regarding this.
- ▶ Purchasing securities of the Gateway Fund, Fiera Core Global Equity Class, Oakmark U.S. Equity Class or Oakmark International Equity Class in U.S. dollars will not affect the investment return of such Funds and will not hedge against changes in the exchange rate between the Canadian and U.S. dollar.

5. **Appropriate Dealer Compensation Method (*applicable to all investors*)** - You can pay your dealer using any one of the following dealer compensation methods:

- ▶ **Series A or Series A (Hedged) Front End Load option** - You may pay a commission, negotiable with your dealer, at the time of purchase, of up to 5% of the purchase amount. No redemption charges will be payable at the time of sale.
- ▶ **Series F or Series F (Hedged) option** - No commission is payable to your dealer for the purchase of Series F or Series F (Hedged) securities, as such securities may only be purchased (i) by investors who participate in a fee-for-service or a wrap account program offered through their dealer or who have accounts with a discount brokerage, or (ii) by other investors for whom we do not incur substantial distribution costs, in each case provided their dealer has entered into a Series F/F (Hedged) agreement with Fiera Investments. No commission is payable at the time of purchase and no trailer fee is payable by Fiera Investments to your dealer in respect of the investment. As a result, these series charge a lower management fee compared to Series A. Series F or Series F (Hedged) are also available to employees of Fiera Investments, its affiliates and sub-advisors.
- ▶ **Series I option** - No sales commission is payable to your dealer on the purchase of Series I securities. Each investor who purchases Series I securities negotiates a separate management fee with the Manager that is paid directly to the Manager and enters into an institutional series client agreement or fund purchase agreement (collectively "**Series I Subscription Agreements**") with Fiera Investments. No trailer fee is payable by Fiera Investments to your dealer in respect of the investment.

See the headings "*Fees and Expenses*" and "*Dealer Compensation*" for greater details of the fees and expenses payable in respect of an investment in the Funds and the compensation payable to your dealer.

6. **Appropriate Investment Amount (*applicable to all investors*)** - The final investment decision is selecting the appropriate amount you wish to invest. The total amount invested in the Funds will, in conjunction with the series selected, affect the amount of management fees you pay.

The options are as follows:

- ▶ **\$5,000 and over (Series A or Series A (Hedged))** - These series are available to all investors.
- ▶ **\$500 and over (Series F or Series F (Hedged))** - Series F or Series F (Hedged) securities may only be purchased (i) by investors who participate in a fee-for-service or a wrap account program offered through their dealer or who have accounts with a discount brokerage, (ii) by other investors for whom we do not incur substantial distribution costs, in each case provided their dealer has entered into a Series F/F (Hedged) agreement with Fiera Investments, or (iii) by employees of Fiera Investments, its affiliates and sub-advisors.
- ▶ **\$2 million and over (Series I)** - The securities of this series are available to institutional and other selected investors and for use in fund-on-fund arrangements. These securities are also available to employees of Fiera Investments and its affiliates without the minimum investment requirement. Series I securities are generally only available to segregated accounts, groups, institutions and selected high net worth individuals which have \$2,000,000 or more to invest in the Funds.

No management fees are paid by the Funds with respect to Series I securities. Each investor who purchases Series I securities negotiates a separate fee for each Fund with the Manager that is paid directly to Fiera Investments, and enters into a Series I Subscription Agreement with Fiera Investments.

The operating expenses of a Fund borne by each series may differ. Operating expenses, expressed as a percentage of net asset value, allocated to the Series I securities are typically lower than the operating expense rate charged to retail series as the costs of servicing these accounts are substantially less than the costs of servicing smaller accounts.

Mechanics of a Purchase

You can buy securities of the Funds through any dealer registered in your province or territory of residence, by completing a purchase order and submitting that order to us through your dealer. We need to receive all the necessary purchase documents properly completed before we can accept and complete your order. It is the responsibility of you and your dealer to make sure that the purchase documentation is completed properly.

In addition, we need to receive the payment for the securities within two business days (or such shorter period of time as may be required by applicable securities regulation) of processing your purchase order. If we do not receive the payment within that time, or if the payment is not honored, we are required to sell your securities on the next business day. If the sale price is more than the purchase price, the Fund keeps the difference. If the sale price is less than the purchase price and any related banking costs (if the payment is not honored), your dealer or broker must pay the difference to the Fund and you may be required to reimburse your dealer or broker depending upon your specific arrangements.

We have the right to reject your purchase order for any reason within one business day of receipt. If we accept the order, you will receive a confirmation of your purchase for your records from us and/or your dealer. If the order is refused, all monies received with the order will be returned immediately to you, without interest.

The minimum initial investment required to purchase securities of a Fund is \$5,000 (\$100 in the case of a pre-authorized chequing plan) for Series A and Series A (Hedged) securities. The

minimum initial investment required to purchase securities of a Fund is \$500 (\$100 in the case of a pre-authorized chequing plan) for Series F and Series F (Hedged) securities. Subsequent investments in any of those series must be at least \$100.

Price or Net Asset Value

The price or net asset value per unit or share (a "**security**") of a Fund is determined at 4 p.m. (Toronto time) or such other time that the Toronto Stock Exchange closes on each day that the Toronto Stock Exchange is open for business. Provided your purchase order is received by us prior to 4 p.m. (Toronto time) or such other time that the Toronto Stock Exchange closes, you will receive the price determined on that business day. If the order is not received by that time, you will receive the price determined on the next business day. Your order must be placed through your dealer. Each dealer has adopted internal procedures for establishing client accounts and trading and these requirements must be satisfied before your dealer can submit your purchase order.

Generally, the price or net asset value for each series of securities of a Fund is determined as follows:

- take the proportionate share of the market value of the assets allocated to the specific series;
- subtract the liabilities of the specific series and the share of the common expenses of the Fund allocated to the specific series; and
- divide the result by the total number of securities held by investors in that specific series.

For the Gateway Fund, the proportionate share of the market value of the assets of the Fund allocated to each series in each of the Hedged Class and the Ordinary Class is as follows:

- For series in the Ordinary Class, the Fund's assets to be allocated to each series in the class do not include the foreign currency hedging derivatives and related expenses entered into specifically for the Hedged Class; and
- For series in the Hedged Class, the Fund's assets to be allocated to each series in the class include:
 - the series' proportionate share of the assets of the Fund, excluding the foreign currency hedging derivatives and related expenses entered into specifically for the Hedged Class; plus
 - the series' proportionate share of the foreign currency hedging derivatives and related expenses entered into specifically for the Hedged Class, which is allocated among only the series in the Hedged Class.

Each of the Funds is valued in Canadian dollars.

Mechanics of a Sale or Redemption

You may sell or redeem (the terms "**sale**" and "**redemption**" are used interchangeably, both meaning sale by you of your securities of a Fund) your securities of a Fund at any time by completing a redemption request form and submitting it to your dealer.

If we receive the redemption request form from your dealer prior to 4 p.m. or such other time that the Toronto Stock Exchange closes, you will receive the sale price determined on that business day. If we receive the request form after 4 p.m. (Toronto time) or such other time that the Toronto Stock Exchange closes, the redemption request will be processed on the next business day and you will receive the sale price determined on that day.

Sale Proceeds

We will pay you the proceeds from the sale of the securities less any applicable redemption charges or other fees payable within two business days (or such shorter period of time as may be required by applicable securities regulation) of receiving complete redemption documentation. If we do not receive all the necessary redemption documentation within 10 business days of receiving your redemption request, we will repurchase your Fund securities on the next business day. If the sale price exceeds the price at which the securities were repurchased, the difference is kept by the Fund. If the sale price is less than the repurchase price, your dealer must pay the difference to the Fund and you may be required to reimburse your dealer depending upon your specific arrangements.

The amounts deducted from the sale proceeds would include any redemption charges payable by you if the securities were purchased under the Deferred Load or Low Load purchase options and sold within seven years or three years, respectively.

If you purchased securities of a Fund under the Deferred Load purchase option, you may redeem up to 10% of your investment in each calendar year without paying a redemption charge at the time of sale. You may not carry forward to future years any unused portion of the 10% free redemption amount. The free redemption amount is reduced by redemptions made and cash dividends or distributions received by you during the calendar year. See the annual information form for additional rules relating to the calculation of redemption charges and the free redemption amount.

If your investment is held in a Fiera Investments registered plan and you are withdrawing the redemption proceeds from the plan, we may be required to withhold a portion of your redemption proceeds to pay the tax required by tax regulatory authorities.

If your investment was made in U.S. dollars, we will pay you the proceeds from the sale of the securities less any applicable redemption charges or other fees payable in U.S. dollars.

Short-Term Trading

The Funds are intended as long-term investments. An objective of Fiera Investments is to promote and reward long term investors in the Funds through reduced management fees. Fiera Investments has policies and procedures to detect and deter short-term trading that include the ability to refuse your present or future orders to buy or switch securities. As a result, the Manager may charge, in its absolute discretion, a short-term trading fee, of up to 2% of the switch or redemption amount, if you conduct trading in securities of a Fund over a short period of time (generally less than 30 days) which the Manager deems prejudicial to the Fund. The fee will be paid to the applicable Fund. We may waive this fee at any time.

See the heading "*Fees and Expenses*" for greater details of the fees payable at the time of sale.

Automatic Sale or Redemption

If the cost amount of your total investment in the Funds falls below \$5,000 for Series A or Series A (Hedged) or \$500 for Series F or Series F (Hedged), we may request that you increase your investment to the purchase limits applicable to the series you hold. If you elect not to increase your investment within 30 days' notice by us, we may sell the securities held in your account and forward the sale proceeds less any applicable fees to you. We will then close your account. A redemption charge may apply if the securities were purchased under the Deferred Load or Low Load purchase options. The Deferred Load and Low Load purchase options are no longer offered.

Suspension of Sale or Redemption

We may suspend your right to redeem or sell your securities of a Fund: (i) for any period during which normal trading is suspended on a stock exchange, options exchange or futures exchange on which securities or derivatives are traded which represent more than 50% of the value, or underlying market exposure, of the assets of the Fund if those securities or derivatives are not traded on any other exchange that represents a reasonably practical alternative for the Fund; or (ii) with the prior consent of the securities regulatory authorities.

During the suspension period, the Funds will not accept orders for the purchase, transfer, switch or sale of securities.

Mechanics of a Switch

Provided you meet any eligibility requirements, you may switch securities among the Funds, different series of shares of a Class Fund or among different series of units of a Registered Fund or a Single Trust Fund.

While taxable investors who switch between series of a Tax Class of a Class Fund will not trigger a disposition for tax purposes, all other switches of shares of a Class Fund will be a disposition of the securities switched for proceeds of disposition equal to the fair market value thereof and taxable investors will be required to include any resulting capital gain in computing income for tax purposes.

A "**switch**" between the series of the same Registered Fund or Single Trust Fund is a redesignation of the units and is not a disposition unless the switch is between series of the Hedged Class and the Ordinary Class of the Gateway Fund. All other switches of securities of a Registered Fund or Single Trust Fund will be a disposition of the securities switched for proceeds of disposition equal to the fair market value thereof and taxable investors will be required to include any resulting capital gain in computing income for tax purposes.

See the heading "*Income Tax Considerations*" for more information.

You may pay a fee, negotiable with your dealer, at the time of a switch, of between 0% and 2% of the switch amount.

Switches among Purchase Options and Series

Each purchase option and series has a different fee structure and rewards an investor to varying degrees depending on the amount and duration of your investment. As a result, you should give careful consideration and consult with your financial advisor prior to switching your investment between purchase options or series to ensure you are not incurring unnecessary fees.

You may generally switch from a series of a Fund to another series of the same Fund or another Fund if you are eligible to purchase securities of the new series.

Except as provided below, all switches must be made within the Class Funds if you are a non-registered or taxable investor and within the Registered Funds if you are a registered or non-taxable investor. Both taxable and registered investors may invest in units of the Single Trust Funds.

Registered investors may invest in the Series F shares of the Return of Capital and Dividend classes of the Class Funds listed below and may switch such shares only to (i) such series of the same or a different Class Fund also listed below, (ii) units of any series of a Single Trust Fund, (iii) Series F or Series F (Hedged) of the Gateway Fund, or (iv) a Registered Fund:

- Fiera Strategic Balanced Class,
- Fiera Intrinsic Balanced Class,
- Fiera Canadian Dividend Class,
- Fiera Intrinsic Growth Class,
- Fiera U.S. Dividend Class,
- Fiera U.S. Growth Class,
- Fiera Core Global Equity Class,
- Fiera Canadian Preferred Share Class,
- Oakmark U.S. Equity Class, and
- Oakmark International Equity Class.

You may no longer switch securities purchased under the Front End Load purchase option for securities purchased under the Deferred Load or Low Load purchase options.

You may switch securities purchased under the Deferred Load or the Low Load purchase options for securities purchased under the Front End Load purchase option, however, you may be subject to a redemption charge payable on the switch. Lastly, your dealer will receive an increased trail commission as described under the heading "*Dealer Compensation - Trail Commissions*" and may be required, in accordance with applicable regulatory requirements, to obtain your prior consent to such a switch.

Securities purchased under the Deferred Load purchase option will be automatically switched into securities of the Front End Load purchase option of Series A of the same Fund previously held, after being held for 7 years from the date of purchase or deemed date of purchase. No fee will be payable by you in connection with the switch, however, your dealer will receive a higher trail commission.

If you are no longer eligible to hold Series F or Series F (Hedged) securities, Fiera Investments will contact your dealer to remedy the situation. If no action is taken within 60 days of such notice, we will switch all Series F or Series F (Hedged) securities held by you into Series A or Series A (Hedged) securities, as applicable, of the same Fund (and in the case of certain Class Funds and the Gateway Fund, the same class) under the Front End Load option, unless you purchased the Class Funds as a registered investor, in which case, Fiera Investments will sell the securities in your account, less applicable fees. No fee will be payable to your dealer for the switch.

If you are no longer eligible to hold Series I securities, Fiera Investments will contact your dealer to remedy the situation. If no action is taken within 60 days of such notice, we will switch all Series I securities held by you into Series A securities of the same Fund (and in the case of certain Class Funds, the same class) under the Front End Load option. No fee will be payable to your dealer for the switch.

You can only switch between securities purchased in the same currency, generally. However, you can switch between securities purchased in U.S. dollars and those securities purchased in Canadian dollars if you are switching between the same series in the same Fund. For securities purchased in U.S. dollars, switches will be processed in U.S. dollars and redemption proceeds will be paid in U.S. dollars.

You should consult with your financial advisor prior to making any switch.

Optional Services

Fiera Investments offers the following optional services which you can use to invest in the Funds.

Pre-authorized Chequing Plan

You may establish a pre-authorized chequing plan with us, where you make purchases on a periodic basis rather than individual lump sum purchases. The minimum purchase amount is \$100 and you must designate whether you wish to make purchases twice monthly, monthly, quarterly, semi-annually or annually. You may change the amount of your regular purchase or the timing of your payments at any time provided you give us a minimum 30 days' prior notice. We do not charge you any fees for this service, but you will pay the normal fees and expenses payable by investors of the Funds.

You will receive the Fund Facts document for the Funds at the time you enroll in the plan. You will not receive a subsequent Fund Facts document unless you request a copy from your dealer. The most recently filed Fund Facts may also be obtained through the SEDAR website at www.sedar.com or the Fiera Investments website at im.natixis.ca. You will not have a right of withdrawal for purchases made under the plan, other than the initial purchase and sale, but you will have the rights described under the heading "*What are Your Legal Rights?*" if any Fund Facts document or any document incorporated by reference contains a misrepresentation.

Registered Plans

You may establish a Fiera Investments registered tax plan with us when you invest in the Registered Funds, the Single Trust Funds or Series F shares of the Return of Capital class or Dividend class of specified Class Funds. See "*Introduction – C. Class Funds*" for a complete list of the Class Funds that can be purchased by registered investors. The Manager offers registered retirement savings plans ("**RRSPs**"), registered retirement income funds ("**RRIFs**") and tax-free savings accounts ("**TFSAs**").

If you have a "self-directed" registered plan established through your broker or dealer or through an intermediary registered plan that permits non-proprietary investments, you may also hold units of the Registered Funds, units of the Single Trust Funds or Series F shares of the Return of Capital class or Dividend class of certain Class Fund in your registered account. See "*Introduction – C. Class Funds*" for a complete list of the Class Funds that can be purchased by registered investors. In this instance, your plan is registered in the name of the sponsoring trustee but your name is provided to the transfer agent of the Fund as the beneficial account holder.

The Custom Portfolio Service

The Custom Portfolio Service allows you to set a specific target allocation among any of the Funds you hold to create your own customized investment portfolio. Fiera Investments will then rebalance your investment portfolio in accordance with your pre-selected target portfolio mix and rebalancing instructions.

To participate in the Custom Portfolio Service, you must have a minimum of \$100,000 invested in any series of the Funds and have completed the required rebalancing service agreement which sets out, among other things, the Funds (and Tax Class in respect of the Class Funds) to be included, your desired target allocation in each Fund and the frequency in which you would like Fiera Investments to rebalance your investment portfolio, which can be quarterly, semi-annually or annually. In addition, you may determine the automatic rebalancing variance percentage as 3%, 5%, 7% or 10%.

Should the amount of your investment within the Custom Portfolio Service fall below \$100,000 as a result of redemptions, we may notify you and give you 30 days to make another investment to bring your total investment amount within the Custom Portfolio Service above the minimum investment amount, otherwise you will no longer be eligible to participate in this program.

No automatic rebalancing will result in short-term trading fees.

If 100% of one or more of the Fund(s) in your account are redeemed or exchanged/transferred from the target allocation without Fiera Investments receiving instructions to amend the Custom Portfolio Service, then at the next scheduled rebalance date, the assets in the remaining Funds in your account will be proportionately reallocated across all the Funds, including the Fund(s) that were redeemed or exchanged/transferred out of the service.

All dividends and/or distributions from the Funds will be reinvested in additional securities of the Funds.

Any redemption of securities through the Custom Portfolio Service may cause you to realize a capital gain or loss. Similarly, switches between Tax Classes of a Class Fund or between Class Funds through the Custom Portfolio Service may cause you to realize a capital gain or loss.

There is no fee for participating in the Custom Portfolio Service. Redemption fees do not apply upon the redemption of securities to effect a rebalancing transaction through the Custom Portfolio Service and no switch fees are applied to any switches made in order to effect the rebalancing of your investment portfolio.

Not all Funds may be held within the Custom Portfolio Service. Further terms and conditions are contained within the rebalancing service agreement. Please ask your financial advisor for further details.

Systematic Withdrawal Plan

You may establish a systematic withdrawal plan with us, where you make withdrawals from your investment on a periodic basis. The minimum investment required in the Funds to establish the plan is \$10,000 and you may designate whether you wish to make withdrawals twice monthly, monthly, quarterly, semi-annually or annually. The minimum withdrawal amount is \$100 or such other amount as we determine from time to time. You may change the amount of your regular withdrawal or the timing of your withdrawals at any time provided you give us a minimum 30 days' prior notice. We do not charge you any fees for this service, but you will pay the normal fees and expenses payable by investors of the Funds. Systematic withdrawal plans are available for retirement income funds with the exception that there is a minimum annual withdrawal amount for these plans and once withdrawals have been initiated, you are required to continue withdrawing the minimum amount on an annual basis.

If you make withdrawals under the plan and the amount of your withdrawals are more than the increase in value of your original investment, the value of your original

investment will deteriorate and your investment will eventually be depleted unless you make further purchases.

Fees and Expenses

The table below lists the fees and expenses that you may have to pay if you invest in the Funds. You may have to pay some of these fees and expenses directly. A Fund may have to pay some of these fees and expenses, which will reduce the value of your investment in the Fund.

Fees and Expenses Payable by the Funds

Management Fees	<p>Each Fund pays Fiera Investments a fee for our management services. The management fee varies by Fund and by series. The management fee for each series is expressed as a percentage of the daily net asset value of the series and is calculated daily and payable monthly. You will find the maximum management fee for the series of each Fund in the "<i>Fund Details</i>" section.</p> <p>Series F and Series F (Hedged) securities have lower management fees than Series A and Series A (Hedged) securities since we do not pay trail commissions on such securities.</p> <p>For Series I securities, separate fees are negotiated and paid for each Series I investor. The combined management fee and operating expenses for Series I securities will not exceed the rate charged on Series F and Series F (Hedged) securities of the same Fund. Fiera Investments does not pay trail commissions on Series I securities.</p> <p>The Manager may temporarily reduce or rebate all or any portion of the management fee and/or operating expenses of a Fund. In addition, the Manager may authorize a reduction in the management fees and/or operating expense rates generally for certain investors of the Funds who pay or incur distribution or other expenses normally paid by a Fund or the Manager. In this case, if the Manager reduces or rebates a portion of the management fee, the Fund or the Manager pays an amount equal to the reduction either as a distribution or as a direct rebate. In either case the distribution or rebate is reinvested in additional securities of the Fund. The level of the reductions in the management fee rate and operating expenses is negotiable between the Manager and the investor. See the heading "<i>Management Fee Distributions</i>" in the annual information form for further details.</p> <p>These fees and expenses are subject to federal goods and services tax ("GST") and harmonized sales tax ("HST"). These taxes will be paid based on a "blended rate" of the 5% GST rate in the non-harmonized jurisdictions and the HST rate applicable in the other harmonized provinces. The rate that is applied during a year for a series of a Fund is determined based on the portion of the net asset value of the series attributable to investors residing in each province or territory at a certain point in time and the applicable rate for each of those provinces or territories. The blended rate may vary from year to year due to investors moving from one province to another, or because of purchases, switches and redemptions.</p> <p>The Manager is responsible for directing the affairs and managing the undertaking of the Funds and for administering or arranging the day to day</p>
------------------------	---

	<p>operations of the Funds. The Manager provides or arranges to provide the following management and administrative services to the Funds: (i) investment management including portfolio security selection and investment, negotiation and use of derivative instruments, execution of portfolio transactions including selection of market, dealer, broker or counterparty, negotiation of brokerage commissions and appointment of investment advisers; (ii) determination of Fund investment programs, restrictions and policies and statistical and research services related to the Fund portfolios; (iii) investment management oversight; (iv) proxy voting in respect of Fund portfolio securities; (v) all administrative and other service and facilities required by the Funds in relation to its security holders, including the preparation and holding of Fund meetings, the determination of net income and net capital gains of the Funds to facilitate distributions and other services for the provision of information to security holders; (vi) compliance with all applicable legislation in connection with the Funds and the issuance of Fund securities; (vii) office accommodation, facilities and personnel, telephone and other communication services, office supplies, banking, custodian and internal accounting and audit services; (viii) co-ordination and supervision of Fund service providers; (ix) approval of Fund expenses and monitoring of Fund agreements; (x) services related to the distribution, advertising and promotion of the Funds; and (xi) all other services necessary or desirable to conduct and operate the business of the Funds.</p> <p>Certain of these services provided to the Funds constitute operating expenses of the Funds and are paid by the Funds. The expenses listed under the heading "<i>Operating Expenses</i>" below are charged separately and directly to the Funds and are in addition to the management fee payable to the Manager. The remaining expenses relating to the management and administrative services provided by the Manager to the Funds are paid by the Manager from its management fee received from the Funds.</p>
<p>Operating Expenses</p>	<p>Each of the Funds pays all its operating expenses including, without limitation:</p> <ul style="list-style-type: none"> • registrar, transfer agency, customer service, safekeeping and custodial fees and expenses; • accounting, audit and legal fees and expenses; • brokerage commission, fees and expenses; • operating and administration fees, costs and expenses; • trustee services; • interest and bank charges and expenses; • regulatory filing fees and expenses including for preparing and distributing fund facts; • applicable taxes; • costs associated with compliance with any new governmental or regulatory requirement introduced after December 1, 2007; and

	<ul style="list-style-type: none"> independent review committee fees and related expenses which would include the cost of any independent counsel or other advisors employed by the IRC, the costs of the orientation and continuing education of the IRC members, the cost and expenses associated with IRC meetings and any taxes associated. Each member of the independent review committee receives an annual retainer of \$20,000 (\$27,500 in the case of the Chairman). Such fees are allocated among the Funds by the Manager. <p>In addition to the operating expenses noted above, the Manager allocates to the Funds certain overhead costs which are directly related to the operation of the Funds (excluding marketing and sales). Those overhead costs would include a portion of the Manager’s IT computer software, systems and staff salaries, facilities, insurance (property and liability only), depreciation on fixed assets, data and telephone, printing, office and other general administrative costs.</p> <p>Each class and series of securities of a Fund is responsible for the operating expenses that relate to that particular class or series (for example, the costs of foreign exchange hedging for a Hedged Class) and for its proportionate share of the operating expenses that are applicable to all the classes or series.</p>
Inter-Fund class	In the case of the investment by the Registered Funds in Inter-Fund class shares of the corresponding Class Funds, the fees and expenses payable in respect of the management of the Class Funds are in addition to those paid by the Registered Funds. However, there is no duplication of management fees, sales fees or redemption fees and no sales or redemption fees payable by the Registered Funds in respect of such investment.
M class and M series	Each Fund may issue and/or purchase M series units and M class shares, as the case may be. The objective of M class shares and M series units is to facilitate investments and/or derivative transactions among the Funds. To ensure there is no inter-fund duplication of fees, no management fees or sales or redemption fees are payable on M class shares and M series units.

Fees and Expenses Payable Directly by You

Front End Load Purchase Option	A sales commission may be payable by you at the time of purchase of Series A or Series A (Hedged) securities under the Front End Load purchase option. The commission, which is negotiated with your dealer, is 0% to 5% of the purchase amount. There is no fee payable to us or your dealer at the time of sale. No commission is payable on the purchase of Series F, Series F (Hedged) or Series I securities.
Switch Fees	You may switch securities among the Funds. A commission, which is negotiated with and payable to your dealer, may be payable at the time of switch. The commission is 0% to 2% of the amount you wish to switch. No commission is payable by you on a switch between series of a Fund or involving Series F, Series F (Hedged) or Series I securities.

	<p>If you switch among the Funds under different purchase options, you may pay additional commissions and redemption charges and your dealer may receive an increased trail commission. See the heading "<i>Switches among Purchase Options and Series</i>" for further details.</p>																
Series I Management Fee	<p>The securities of this series are available to institutional and other select investors who negotiate a separate fee with the Manager and that is paid directly to the Manager. That annual fee, which will not exceed the Series F or Series F (Hedged) management fee of the same Fund, is accrued daily and paid quarterly. Fiera Investments does not pay trail commissions to your dealer in respect of any investment in Series I securities.</p>																
Series F and Series F (Hedged) Fees	<p>The securities of these series are available to investors who participate in a fee-for-service or a wrap account program offered through their dealer or who have accounts with a discount brokerage or by other investors for whom we do not incur substantial distribution costs, in each case provided their dealer has entered into a Series F/F (Hedged) agreement with Fiera Investments. No commission is payable at the time of purchase and no trailer fee is payable by the Manager to your dealer in respect of the investment. Under the terms of the fee-for-service arrangement with your dealer, you will be required to pay the dealer a fee.</p>																
Deferred Load Purchase Option	<p>This purchase option is no longer offered, except for existing investors who wish to switch from Series A securities of a Fund held under the Deferred Load purchase option to Series A securities of another Fund.</p> <p>No sales commission was payable at the time of initial purchase of Series A securities under the Deferred Load purchase option. However, a redemption charge may be payable by the investor at the time of sale. The redemption charge, which is based upon a percentage of the market value of the securities at the time of sale, declines over time as indicated in the table below. The redemption charge, if any, is deducted from the proceeds of sale and the balance is paid to the investor:</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="text-align: center;">Period Sold After Purchase</th> <th style="text-align: center;">Redemption Charge</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Year 1</td> <td style="text-align: center;">5.5%</td> </tr> <tr> <td style="text-align: center;">Year 2</td> <td style="text-align: center;">5.5%</td> </tr> <tr> <td style="text-align: center;">Year 3</td> <td style="text-align: center;">5.0%</td> </tr> <tr> <td style="text-align: center;">Year 4</td> <td style="text-align: center;">4.5%</td> </tr> <tr> <td style="text-align: center;">Year 5</td> <td style="text-align: center;">3.5%</td> </tr> <tr> <td style="text-align: center;">Year 6</td> <td style="text-align: center;">2.5%</td> </tr> <tr> <td style="text-align: center;">Year 7</td> <td style="text-align: center;">1.5%</td> </tr> </tbody> </table> <p>An investor is entitled to sell up to 10% of their securities in the Funds purchased under the Deferred Load purchase option in any calendar year without paying a redemption charge. An investor may not carry forward to future years any unused portion of the 10% free redemption amount.</p> <p>All Series A securities purchased under the Deferred Load purchase option and held for 7 years from the date of purchase or deemed date of purchase (the "Deferred Charge Expiry Date") will automatically be deemed to be held under the Front End Load option of the same Fund no later than the end of the</p>	Period Sold After Purchase	Redemption Charge	Year 1	5.5%	Year 2	5.5%	Year 3	5.0%	Year 4	4.5%	Year 5	3.5%	Year 6	2.5%	Year 7	1.5%

The redemption charge, if any, is deducted from the proceeds of sale and the balance is paid to the investor:</p> <table border="1"> <thead> <tr> <th>Period Sold After Purchase</th> <th>Redemption Charge</th> </tr> </thead> <tbody> <tr> <td>Year 1</td> <td>3.00%</td> </tr> <tr> <td>Year 2</td> <td>2.50%</td> </tr> <tr> <td>Year 3</td> <td>2.00%</td> </tr> </tbody> </table>	Period Sold After Purchase	Redemption Charge	Year 1	3.00%	Year 2	2.50%	Year 3	2.00%
Period Sold After Purchase	Redemption Charge								
Year 1	3.00%								
Year 2	2.50%								
Year 3	2.00%								
Short-Term Trading Fees	If you conduct trading in the Funds within a short period of time (generally less than 30 days) in a manner which the Manager, in its absolute discretion, deems prejudicial to a Fund, a fee of up to 2% of the switch or redemption amount will be paid by you to the Funds.								

Impact of Sales Charges

The following table shows the amount of redemption charges that you would have to pay under the only purchase option available to you if you made an investment of \$1000 in the securities of a Fund, if you held that investment for one, three, five or ten years and redeemed immediately before the end of that period.

	At time of Purchase	1 Year	3 Years	5 Years	10 Years
Front End Load Option ⁽¹⁾	Up to \$50	-	-	-	--

⁽¹⁾ For purposes of calculation and the table, the maximum sales charge of 5% is assumed to be paid by you. You may negotiate a lesser fee with your dealer. There are no sales charges for Series F, Series F (Hedged) or Series I securities; however, investors in Series F or Series F (Hedged) securities will pay a separate fee to their dealer and investors in Series I securities may pay a separate fee to their dealer.

Series A (Hedged), Series F, Series F (Hedged) and Series I securities are not available for purchase under the Deferred Load or Low Load purchase options, except for existing investors who wish to switch from Series A securities of a Fund held under the Deferred Load purchase option or Low Load purchase option to Series A securities of another Fund under the same purchase option.

There are no sales charges for Series F, Series F (Hedged) or Series I securities; however, investors in Series F or Series F (Hedged) securities will pay a separate fee to their dealer and investors in Series I securities may pay a separate fee to their dealer.

Dealer Compensation

For services provided to you in connection with your investment in the Funds, your dealer may receive compensation from Fiera Investments, comprised of two components: (i) sales

commissions, being lump sum payments at the time of purchase; and (ii) trail commissions, being ongoing periodic payments based on the value of your investment. These payments are generally made from the management fee revenue Fiera Investments receives from the Funds. Fiera Investments is entitled to cancel or change the terms of the compensation paid to your dealer at any time. No sales commission or trail commission is payable for Series F, Series F (Hedged) or Series I securities. No trail commission is payable for Series I securities. Details of the compensation are as follows:

Sales Commissions - The type and amount of payment depends upon the purchase option selected by you.

Under the Front End Load purchase option, the commission is paid by you, (as opposed to Fiera Investments) and is negotiated by you with your dealer. That commission ranges from 0% to 5% of the purchase amount and is payable by you to your dealer at the time of purchase. No commission is paid by Fiera Investments to your dealer under the Front End Load purchase option.

The Deferred Load and Low Load purchase options are no longer available to investors, except for existing investors who wish to switch from Series A securities of a Fund held under the Deferred Load purchase option or Low Load purchase option to Series A securities of another Fund under the same purchase option. However, if you previously selected the Deferred Load purchase option or the Low Load purchase option at the time of initial purchase, a commission was payable by Fiera Investments to your dealer at the time of purchase.

Trail Commissions - This commission is payable by the Manager to your dealer monthly based upon the amount of your investment in the Funds. The commission is an annual percentage of the value of the Series A securities of the Funds you own as indicated in the table below. The amount of the payment depends upon the purchase option selected by you, the amount invested in the Funds and the particular Funds.

*Series A (Hedged) has the same trail as its corresponding unhedged Series A

Other Dealer Compensation - The securities regulatory authorities have established rules relating to the types and amount of compensation that we may pay your dealer and how that compensation may be used. Those rules provide as follows:

Cooperative Marketing Practices - We may pay your dealer up to one half of their direct costs relating to a sales communication, investor conferences or seminars prepared by your dealer to educate investors on financial planning or investing in securities or to promote mutual fund investments, including the Funds.

Conferences and Seminars - We may also organize our own educational conferences or seminars for dealers and pay limited dealer expenses. In addition, we may pay the registration fees of an advisor of a dealer who attends an educational conference, seminar or course organized by a third party. We may also pay dealers and certain industry associations up to 10% of their respective direct costs incurred by such dealers and associations in organizing an educational conference or seminar. In all cases, the dealers, not Fiera Investments, decide which advisors will attend such events.

Marketing Materials - We pay for marketing materials we give to dealers to help support their sales efforts. We may also share with dealers up to 50% of their costs in marketing the Funds.

Dealer Compensation from Management Fees

We paid dealers compensation of approximately 27.66% of the total management fees we received from all the Funds for the year ended December 31, 2018. This amount includes all monies paid to dealers for commissions, trailer commissions and other dealer compensation as provided above.

Income Tax Considerations for Investors

This section provides a general summary of the Canadian federal income tax considerations for Canadian resident individuals (other than trusts) who will hold the securities of the Funds as capital property. The comments are based on the current provisions of the Tax Act and the regulations thereunder, proposed amendments to the Tax Act and such regulations publicly announced by the Minister of Finance (Canada) before the date of this prospectus, and the current administrative practices and policies of the Canada Revenue Agency ("**CRA**") published in writing before the date of this prospectus.

As this is a general summary, we are unable to address all the tax consequences that may apply in your particular circumstances and these comments are not intended to constitute legal or tax advice to an investor. **You should consult your own tax advisor about your personal circumstances when you consider purchasing, switching, or redeeming securities of the Funds.**

In this section, an investment in shares of the Corporation is referred to as an investment in a Class Fund. Each Class Fund has one or more classes and series of shares. An investment in units of a Registered Fund is referred to as an investment in a Registered Fund. An investment in units of a Single Trust Fund is referred to as an investment in a Single Trust Fund. The Class Funds, Registered Funds and Single Trust Funds are collectively referred to as the "**Funds**".

This section assumes that only registered or non-taxable investors will purchase securities of the Registered Funds, only non-registered (i.e., taxable) investors will purchase securities of the Class Funds except that registered investors may also purchase Series F shares of the Return of Capital and Dividend classes of Fiera Strategic Balanced Class, Fiera Intrinsic Balanced Class, Fiera Canadian Dividend Class, Fiera Intrinsic Growth Class, Fiera U.S. Dividend Class, Fiera U.S. Growth Class, Fiera Core Global Equity Class, Fiera Canadian Preferred Share Class, Oakmark U.S. Equity Class and Oakmark International Equity Class in a registered account and that both registered and non-registered investors will purchase securities of the Single Trust Funds.

Tax Status of the Funds

The Corporation is a "**mutual fund corporation**" as defined in the Tax Act.

Each Registered Fund and Single Trust Fund is a "unit trust" as defined in the Tax Act. At the date of this prospectus, each Registered Fund (other than Fiera Intrinsic Growth Registered Fund) and Single Trust Fund qualifies as a mutual fund trust as defined in the Tax Act and expects to continue to qualify as a mutual fund trust.

Each of the Registered Funds and the Single Trust Funds is a registered investment under the Tax Act.

Taxation of the Funds

The tax rules applicable to mutual fund corporations and mutual fund trusts differ. Accordingly, the tax treatment of an investment in a Fund will differ depending on whether you make an investment in a Class Fund, a Registered Fund or a Single Trust Fund.

The Corporation is liable to pay tax at the corporate tax rates applicable to mutual fund corporations on all sources of income including taxable capital gains, interest and foreign income, but excluding Canadian dividends. The Corporation has elected pursuant to subsection 39(4) of the Tax Act that the gains or losses realized on the disposition of "**Canadian securities**" will be deemed to be capital gains or capital losses.

Where a Joint Tax Election is filed in respect of the acquisition of Exchangeable Securities, the cost of the Exchangeable Securities to the Corporation will be equal to the elected amount which will be less than the fair market value of the Exchangeable Securities such that the Corporation may realize the accrued gain on the ultimate disposition of the Exchangeable Securities (or property identical to the Exchangeable Securities).

The Corporation will generally be entitled to a refund of tax on its capital gains when shares are redeemed or capital gains dividends are paid to investors. The Corporation intends to pay sufficient capital gains dividends so that it will not have a net tax liability in respect of capital gains realized by the Class Funds.

The Corporation will be subject to a 38^{1/30}% refundable tax on Canadian dividends received by it. The refundable tax will be refunded when the Corporation pays ordinary dividends to its investors. For every \$2.61 of ordinary dividends paid to its investors, approximately \$1 of refundable taxes will be refunded. The Corporation intends to pay sufficient ordinary dividends to its investors so that it will not have a net tax liability on Canadian dividends received by the Class Funds.

In accordance with the Tax Act and administrative policies of the CRA, the Corporation will deduct in computing its income interest on the limited recourse debt payable to the Registered Funds. The Corporation will also deduct management fees and administrative and other expenses incurred to earn income.

The Corporation computes its income for tax purposes as a single entity. The amount of capital gains dividends and ordinary dividends to be paid to investors in respect of a Class Fund will likely differ from the amount of dividends that would be paid to an investor in a mutual fund with the same investment strategy but that did not have a multi-class corporate structure and that had not issued limited recourse debt. For example, if a Class Fund had a net realized capital loss, that loss may be applied to reduce the net realized capital gains of the Corporation as a whole. This could benefit investors that have invested in other Class Funds since the Corporation would be required to declare smaller capital gains dividends to eliminate its net tax liability (thereby resulting in a lower tax liability for investors in the other Class Funds). In addition, the Corporation may be required to modify its investment decisions as a consequence of investors switching between Class Funds. The "suspended loss" rules in the Tax Act may prevent the Corporation from recognizing capital losses on the disposition of securities in certain circumstances which may increase the amount of capital gains dividends that will be paid to investors in the Class Funds.

The Registered Funds and the Single Trust Funds are subject to tax on the amount of their income for tax purposes, including net taxable capital gains, less the amount of income paid or payable to unitholders. The trust indenture for the Registered Funds and the Single Trust Funds provides that a sufficient amount of income and capital gains of each Registered Fund and of each Single Trust

Fund will be paid or payable to its unitholders for each taxation year so that the Fund will not pay ordinary income tax.

A Registered Fund or Single Trust Fund that does not qualify as a "mutual fund trust" as defined in the Tax Act throughout a taxation year may be subject to alternative minimum tax. At any time that a Registered Fund or a Single Trust Fund does not qualify as a mutual fund trust, the Fund will restrict its investments so that, as a registered investment, it will not become liable for tax under Part X.2 of the Tax Act.

The Gateway Fund treats the equity securities purchased by it as capital property for the purposes of the Tax Act. The Gateway Fund treats gains and losses from writing index call options and buying index put options on income account and recognizes income or loss on such options for tax purposes when the Gateway Fund's obligation or rights under the option are ended (including because the option expires or the Gateway Fund repurchases or sells the option, as applicable). Having regard to the risk of loss retained by the Gateway Fund in respect of its equity securities, the Manager believes that such Fund's investment strategy of writing index call options and buying index put options should not give rise to a SDA of the Fund in respect of its equity securities. The CRA has not published any relevant guidance with respect to the meaning of SDA. See the sub-heading "*Other Investment Risks - Option Tax Risk*".

Distribution Policy of the Class Funds

In order to increase the tax efficiency of an investment in the Corporation by investors, the Corporation generally declares dividends and makes distributions pursuant to a policy that recognizes the preferences of investors based on the share classes in which they have invested.

To the extent that the Corporation is required to declare capital gains dividends to eliminate its tax liability in respect of net realized capital gains for a particular year, the Corporation will first pay capital gains dividends to holders of outstanding Capital Gains class shares of the Class Funds (up to the increase in the net asset value per share for the calendar year of such shares). (The Corporation no longer offers Capital Gains class shares as of May 9, 2017.)

The Corporation will pay ordinary dividends to holders of Dividend class shares of the Class Funds in priority to all other classes.

Capital gains dividends and ordinary dividends will be allocated among the Class Funds and the classes and series of the shares of each Class Fund in the sole discretion of the board of directors based on the recommendation of the Manager. The Manager intends to cause the Corporation to realize sufficient capital gains, if available, to meet the primary income distribution objectives of the Capital Gains class and the Inter-Fund class of each applicable Class Fund, and meet the taxable income deferral objectives of the Return of Capital class of each applicable Class Fund, to the extent possible. The Manager also intends to cause the Corporation to minimize the carry forward of unrealized capital gains by triggering capital gains on an annual basis by the Corporation, subject to optimizing the current year's tax deferral objectives of the Return of Capital and Compound Growth classes. To the extent unrealized capital gains are carried forward, the capital gains dividends to be paid relating to such gains when realized will be distributed in whole or in part on future dates.

Taxation Relating to Exchange Transactions to Purchase Securities

A prospective purchaser of Series I shares of a Class Fund who held Exchangeable Securities as capital property and delivered the Exchangeable Securities to the Class Fund in exchange for Series I shares of the applicable Class Fund will not realize a capital gain on such exchange provided a

Joint Tax Election is made under which the purchaser elects proceeds of disposition for the Exchangeable Securities equal to their adjusted cost base. The cost of the Series I shares of the Class Fund received by such purchaser will be equal to such elected amount (plus other costs incurred in connection with the acquisition of such Series I shares) and will be averaged with the adjusted cost base of all other identical Series I shares held as capital property at the time the Series I shares are received.

A purchaser of Series I shares using the Exchange Transaction may obtain an election package from the Manager. The election package will include the forms required so that the Joint Tax Election may be completed.

Neither the Manager nor the Corporation assumes any liability in respect of a Joint Tax Election other than to execute an election form prepared by the investor. The investor is solely responsible for the preparation and timely filing of the election form.

Investor Taxation

Registered Account Holders

The Registered Funds and the Single Trust Funds have been designed as an investment vehicle for tax exempt investors, including registered accounts. Such investors may also acquire Series F shares of the Class Funds.

Units of each of the Registered Funds and the Single Trust Funds and shares of each of the Class Funds are qualified investments for RRSPs, RRIFs, registered education savings plans ("**RESPs**"), registered disability savings plans ("**RDSPs**"), TFSAs and deferred profit sharing plans.

Regardless of their status as a "qualified investment", if the units or shares are a "prohibited investment" for an RRSP, RRIF, RESP, RDSP or TFSA, the annuitant under such RRSP or RRIF, the subscriber of such RESP or the holder of such RDSP or TFSA, as applicable, will be subject to a penalty tax as set out in the Tax Act.

Units of a Registered Fund or a Single Trust Fund will generally not be a prohibited investment for an RRSP, RRIF, RESP, RDSP or TFSA if the annuitant under such RRSP or RRIF, the subscriber of such RESP or the holder of such RDSP or TFSA, deals at arm's length with the Fund and, together with persons and partnerships with whom the annuitant, holder or subscriber does not deal at arm's length, does not, in total, own directly or indirectly, units of that Fund with a fair market value of 10% or more of the total fair market value of units of that Fund. Shares of a Class Fund will generally not be a prohibited investment for an RRSP, RRIF, RESP, RDSP or TFSA if the annuitant under such RRSP or RRIF, the subscriber of such RESP or the holder of such RDSP or TFSA, deals at arms' length with the Corporation for purposes of the Tax Act and does not have a significant interest (within the meaning of the Tax Act) in the Corporation. Units or shares that would otherwise be a prohibited investment will not be a prohibited investment if they are "excluded property" as defined in the Tax Act.

Investors should consult with their own tax advisors as to whether units or shares of a particular Fund are or may become a prohibited investment for their RRSP, RRIF, TFSA, RDSP or RESP.

Provided that units or shares of a Fund are a qualified investment for an RRSP, RRIF, TFSA or other registered account, and are not a prohibited investment in the case of an RRSP, RRIF, TFSA, RDSP or RESP, generally neither the planholder nor the registered account will be subject to tax on

distributions and dividends paid on those units or shares or on capital gains realized when those units or shares are redeemed or switched.

Taxable Account Holders

Class Funds

Investors may be subject to tax in respect of their investment in a Class Fund when the Class Fund pays an ordinary dividend or a capital gains dividend or when a share is disposed of, such as on the redemption of the share or on a switch of shares of a Class Fund (other than between series of a class of a Class Fund). See "*Switching or Redeeming Securities*" below.

Ordinary dividends received, or deemed to be received, by an investor will be subject to the gross up and dividend tax credit rules generally applicable to taxable dividends received by an individual from taxable Canadian corporations. The investor will be entitled to an enhanced gross up and dividend tax credit in respect of "eligible dividends", where these dividends have been designated as eligible dividends by the Corporation.

A capital gains dividend received by an investor will be treated as a capital gain realized by the investor, one-half of which will be included in calculating income as a taxable capital gain.

The amount of any payment received by an investor as a return of capital on a share of a Class Fund will not be included in computing the investor's income but will reduce the adjusted cost base ("**ACB**") of the relevant share. To the extent the investor's ACB of the share would otherwise be a negative amount, the investor will be considered to have realized a capital gain at the time equal to such negative amount and the ACB will be increased to nil.

Management fee rebates received by an investor must be included in income.

If you purchase your securities in U.S. dollars, you must convert the purchase price into Canadian dollars at the exchange rate in effect at the time of purchase in order to calculate your ACB.

Single Trust Funds

Investors in a Single Trust Fund may be subject to tax in respect of their investment when the Fund makes payable an income or capital gains distribution or when a unit is disposed of such as on a redemption of the unit.

A unitholder must include in income for a taxation year the unitholder's share of the net income and the taxable portion of any net capital gains paid or payable to the unitholder by a Single Trust Fund for a taxation year of the Fund ending in the unitholder's taxation year, including those comprised in management fee distributions, whether paid in cash or by reinvestment in additional units. If distributions by a Single Trust Fund in any year exceed the unitholder's share of the net income and net realized capital gains of the Fund for the year, the excess amount paid will not be included in the unitholder's income but will reduce the ACB of the unitholder's units of the Fund by the excess amount. To the extent the unitholder's ACB of the units would otherwise be a negative amount, the unitholder will be considered to have realized a capital gain at the time equal to such negative amount and the ACB will be increased to nil.

To the extent applicable, each Single Trust Fund intends to make designations to ensure that the maximum portion of its dividends from taxable Canadian corporations, foreign income, net realized capital gains and foreign creditable tax will be received by investors as dividends from taxable

Canadian corporations, foreign income or taxable capital gains, as the case may be, or deemed to be paid by investors in the case of foreign creditable tax.

Switching or Redeeming Securities

A redemption of shares or units of a Fund is a disposition for tax purposes and the investor will realize a capital gain (or capital loss) equal to the amount by which the redemption proceeds exceed (or are exceeded by) any costs of disposition (such as a deferred sales charge) and the ACB of the shares or units. One-half of a capital gain will be included in calculating income as a taxable capital gain. Generally, one-half of a capital loss can be deducted against taxable capital gains. If you receive your redemption proceeds in U.S. dollars, you must convert them into Canadian dollars at the exchange rate in effect at the time of redemption.

While taxable investors who switch between series of a class of a Class Fund will not trigger a disposition for tax purposes, all other switches of shares of a Class Fund will be a disposition of the securities switched for proceeds of disposition equal to the fair market value thereof and may give rise to a capital gain or capital loss.

A "switch" between the series of the same Registered Fund or Single Trust Fund is a redesignation of the units and is not a disposition unless the switch is between series of the Hedged Class and the Ordinary Class of the Gateway Fund. All other switches of securities of a Registered Fund or Single Trust Fund will be a disposition of the securities switched for proceeds of disposition equal to the fair market value thereof and may give rise to a capital gain or capital loss.

Generally, the ACB of a share or unit is the weighted average cost (including acquisition costs, such as sales charges) of all identical shares (such as all shares of a particular class and series of a Class Fund) or units owned by the investor and will be increased by the amount of any dividends or distributions reinvested in such identical shares or units and decreased by any returns of capital received.

In certain situations where an investor redeems units of a Single Trust Fund, the Fund may distribute realized capital gains of the Fund ("**Redeemer's Gains**") to the investor as part of the redemption price of the units. The taxable portion of the Redeemer's Gains must be included in the investor's income as described above but the full amount of the Redeemer's Gains will be deducted from the investor's proceeds of disposition of the units redeemed. See "Tax Risks Applicable to Single Trust Funds and Registered Funds - Allocation of Gains to Redeemers."

In certain situations where an investor disposes of shares or units of a Fund and would otherwise realize a capital loss, the loss will be denied. This may occur if the investor, the investor's spouse or another person affiliated with the investor (including a corporation controlled by the investor) has acquired shares or units of the same Fund within 30 days before or after the investor disposes of the investor's shares or units, which are considered to be "substituted property". In these circumstances, the investor's capital loss may be deemed to be a "superficial loss" and denied. The amount of the denied capital loss will be added to the ACB to the owner of the shares or units which are substituted property.

Purchasing Securities Prior to a Distribution or Dividend

If an investor purchases a share or unit of a Fund prior to a dividend or distribution record date, the investor must take into account in computing income the entire dividend or distribution even though the Fund may have earned the income or realized the gain giving rise to the dividend or distribution before the investor acquired the share or unit. As a result, the investor may have to pay tax on his or her proportionate share of the income or net realized capital gains the Fund

earned for the whole year, even though the investor was not invested in the Fund for the whole year.

The details of each Fund's distribution policy are set out under the heading "*Distribution Policy*" in Part B of this simplified prospectus.

Alternative Minimum Tax

In certain situations, an individual who receives ordinary dividends or capital gains dividends from a Class Fund, or distributions from a Single Trust Fund that are designated as ordinary dividends or capital gains, or who realizes capital gains on the disposition of shares or units, may be liable to pay alternative minimum tax.

Series I

Investors who purchase Series I securities should consult their own advisors regarding the deductibility of fees paid to Fiera Investments.

Portfolio Turnover

A Fund's portfolio turnover rate generally indicates how actively a portfolio manager manages the Fund's portfolio. A portfolio rate of 100% means that the Fund is buying and selling each security in the portfolio once during the calendar year.

The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in a year and the greater likelihood that an investor in a Fund will receive an income or taxable capital gains distribution from a Registered Fund or a capital gains dividend from a Class Fund.

General Anti-avoidance Rule

McCarthy Tétrault LLP, special tax counsel to the Funds ("**Special Tax Counsel**"), has reviewed the comments contained in this section. Special Tax Counsel is of the opinion that the general anti-avoidance rule in the Tax Act should not apply to redetermine the expected tax consequences described above of the current structure to the Corporation and the holders of shares of the Corporation.

Exchange of Information

Each of the Registered Funds, the Single Trust Funds and the Corporation is a "reporting Canadian financial institution" as defined in the Tax Act and each, or the Manager as its "sponsoring entity", will comply with the due diligence and reporting requirements imposed by the Tax Act and the Canada-United States Enhanced Tax Information Exchange Agreement. In order to comply with such requirements, certain information must be requested and obtained from investors in order to identify "**US reportable accounts**" (including shares or units held by US citizens and other "**specified US persons**"). Information regarding US reportable accounts will be provided to the CRA which will exchange that information with the *Internal Revenue Service* pursuant to the exchange of information provisions of the Canada-United States Income Tax Convention.

The Tax Act has also been amended to reflect the adoption of the OECD Multilateral Competent Authority Agreement and Common Reporting Standard ("**CRS**") which provides for the implementation of the automatic exchange of tax information. Under the CRS, investors who are residents of countries other than Canada or the United States will be required to provide certain

information including their tax identification numbers for the purpose of such information exchange unless their investment is held within a registered account. The CRA is expected to provide that information to countries that are party to the CRS.

What are Your Legal Rights?

Securities legislation in some provinces and territories gives you the right to withdraw from an agreement to buy securities of a mutual fund within two business days of receiving the simplified prospectus or fund facts, or to cancel your purchase within forty eight hours of receiving confirmation of your order.

Securities legislation in some provinces and territories also allows you to cancel an agreement to buy securities of a mutual fund and get your money back, or to make a claim for damages, if the simplified prospectus, annual information form, fund facts or financial statements misrepresent any facts about the fund. These rights must usually be exercised within certain time limits.

For more information, refer to the securities legislation of your province or territory or consult your lawyer.

PART B: Specific Information About Each of Mutual Funds Described in this Document

Introduction

Part A of this Simplified Prospectus provides you with general information about mutual funds and the Funds. Part B of this document, which is to be read in conjunction with Part A, provides detailed information about each of the Funds including the specific investment objectives and strategies, risk factors and fund performance. This Part B provides you with additional information to make an informed assessment of which Fund(s) are most appropriate, based upon your investment needs and circumstances.

To facilitate your review of Part B, we have provided a general description of the terms used in Part B and explained their importance in the context of the Funds. We have also included in this introduction information which is applicable to each of the Funds rather than repeating that information within each of the Funds' profiles.

As described in Part A of this document, each fund-on-fund structure, consists of: (i) a Registered Fund investing substantially all its portfolio assets in its underlying Class Fund; and (ii) in the case of the Bond Class Funds, a Bond Class Fund investing substantially all its portfolio assets in the underlying Fixed Income Fund. Each Fund comprising that particular fund-on-fund structure has the same investment objective; however, that objective will be pursued by the Registered Fund investing in non-publicly offered debt and Inter-Fund class shares of the underlying Class Fund or, in the case of the Bond Class Funds, by the Bond Class Fund investing in units of its underlying Fixed Income Fund. As a result, to simplify the presentation in this Part B, we have presented the details of each Registered Fund and Class Fund comprising a fund-on-fund structure and each Bond Class Fund and Fixed Income Fund comprising a fund-on-fund structure within a single Fund profile.

The details of Loomis Sayles Strategic Monthly Income Fund and the Gateway Fund are each presented within a separate Fund profile.

Fund Details

Fund type - The fund type indicates the classification of each Fund given its investment portfolio. For example, a fund type of "Canadian equity" indicates that the Fund invests primarily in Canadian equity securities, while a fund type of "Canadian balanced" indicates that the Fund invests primarily in both Canadian equity securities and fixed income securities. A fund type of "US equity" indicates that the fund invests primarily in US equity securities, while a fund type of "US fixed income" indicates that the fund invests primarily in US fixed income securities.

Start Date - The start date indicates the date that each Fund first offered its securities to investors.

Securities Offered - Securities offered indicates the different types of Fund securities you may purchase. For example, if you are a non-taxable or registered investor, you must purchase "units" in a Registered Fund or a Single Trust Fund or shares of the Series F of a Class Fund as opposed to taxable investors who must purchase shares in the Class Funds or units of a Single Trust Fund. In addition, you may, depending upon the purchase option and amount invested, purchase shares or units of different series and, in the case of the Class Funds, different classes.

Registered Tax Plan Status - The registered plan status states whether the Registered Fund, Single Trust or Class Fund is expected to be qualified under the Tax Act for registered tax plans.

Portfolio Sub-Advisor - Portfolio sub-advisor indicates the portfolio sub-advisor, if any, retained by Fiera Investments to provide investment advice to the Fund.

What Do Each of the Funds Invest In?

Investment Objective - The investment objective tells you the investment goals of the Fund and the type of securities in which it invests in pursuit of those goals.

A Fund is not permitted to change its investment objective, unless it receives the prior approval of investors.

Each of the Funds, in anticipation of, or in response to adverse market conditions, for cash management purposes, for defensive purposes or for purposes of a merger or other transaction, may hold all or a portion of its assets in cash, money market instruments, bonds or other debt securities. As a result, each Fund may not be fully invested in accordance with its investment objective and may not participate in stock market advances or declines to the same extent as if fully invested in equity securities.

Investment Strategies - The investment strategy tells you the investment process used by the portfolio manager of the Fund to try to achieve the Fund's objective. Each of the Funds follows the standard investment restrictions and practices established by Canadian securities legislation, unless Canadian securities regulators have given the Fund approval to vary from these restrictions. If Fiera Investments or the Fund has obtained such an approval, we may discuss it here or under "Additional Information" and we also discuss it in the annual information form.

Each Fund may hold cash as a defensive strategy or while waiting to invest in other securities. A Fund may also buy short-term fixed income securities and money market instruments.

A Fund may purchase securities of other mutual funds (or obtain exposure to other mutual funds by entering into derivative transactions), including mutual funds or exchange traded funds that are managed by us or other mutual fund managers including our affiliates or associates. A Fund that purchases securities of other mutual funds will select the underlying funds on the basis that they help the Fund to achieve the same strategies that it uses when investing directly in those securities.

In some cases, the investment strategies section of a Fund may indicate that the Fund has percentage or other restrictions on its investment in certain types of securities. In these cases, if the restriction is adhered to at the time of investment and then later the market value of the investment, the rating of the investment, or the value of the Fund, changes in a manner that causes the restriction to be exceeded, it is not a violation of the restriction.

The Registered Funds have restricted their investment strategy to the investment of their assets in shares and limited recourse debt of the underlying Class Funds in accordance with the parameters described in this simplified prospectus. The Bond Class Funds have also restricted their investment strategy, however, that restriction is to invest in units of the underlying Fixed Income Funds. The Registered Funds and the Bond Class Funds will, however, as a result of these arrangements, be indirectly subject to the investment strategies adopted by the portfolio sub-advisor (or the portfolio manager where no sub-advisor has been appointed) of the underlying Class Fund or Single Trust Fund, as the case may be, in which all the active investment management is conducted. The disclosure in this Part B reflects this arrangement.

Use of Derivatives - Each of the Funds may use, directly or indirectly, derivative investments to help them achieve their investment objectives. As noted in this Part B, although the Registered

Funds will not engage in derivatives transactions directly, these Funds will indirectly do so through their investment in the underlying Class Funds.

Generally, the Funds may use four types of derivatives, being options, futures, forwards and swaps for both hedging purposes (for defensive purposes to limit or hedge potential losses) and non-hedging purposes (for non-defensive purposes) such as obtaining exposure to financial markets, reducing tax and transaction costs, creating liquidity and increasing the speed of portfolio transactions.

We have indicated in each of the Fund's profiles contained in Part B of this document, whether the Fund intends to use derivatives, and if so, the purpose and manner in which those instruments will be used.

Currency Hedging Strategies - Certain Funds buy securities denominated in foreign currencies. The value of these securities will vary with changes in the value of the Canadian dollar. To protect against variations in exchange rates, these funds may buy or sell forward currency contracts or currency futures contracts. Each Fund that engages in currency hedging will exchange currency on a spot basis at prevailing rates or through forward contracts of one year or less. We enter into currency contracts only up to the market value of the assets a Fund holds in that currency. We may adjust the contracts from time to time.

Repurchase and Reverse Repurchase Transactions and Securities Lending - The securities regulatory authorities permit a Fund to enter into securities lending, repurchase and reverse repurchase transactions subject to certain conditions imposed to minimize risk.

Essentially, these transactions permit a Fund to earn fees or income in exchange for an agreement to: (i) lend securities to a third party which are returnable to the Fund on demand in exchange for prescribed collateral (securities lending); (ii) sell securities to a third party for cash with an obligation to repurchase such securities (typically at a higher price) for cash at a later date (repurchase agreements); and (iii) purchase securities from a third party for cash with an obligation to resell such securities (typically at a higher price) for cash at a later date (reverse repurchase agreements).

Each of the Funds may enter into such transactions and engage in such lending activities in accordance with the requirements of the applicable securities regulatory authorities. However, currently, the Funds do not engage in securities lending, repurchase or reverse repurchase transactions and there is no current intention to do so. If such intention changes and the Funds do engage in securities lending, repurchase and reverse repurchase transactions, such transactions will be effected in accordance with applicable securities legislation. As noted in this Part B, although the Registered Funds or the Bond Class Funds may not engage in these securities lending, repurchase and reverse repurchase transactions directly, these Funds may do so indirectly through their investment in the underlying Class Funds or Fixed Income Funds, as the case may be.

Short Selling - Each of the Funds, other than Fiera Canadian Bond Fund, Fiera Canadian Bond Class, Loomis Sayles Global Diversified Corporate Bond Fund and Loomis Sayles Global Diversified Corporate Bond Class, may engage in short selling in the future, which involves borrowing securities from a lender which are then sold in the open market (or "sold short"). At a later date, the same number of securities are repurchased by the Fund and returned to the lender. In the interim, the proceeds from the first sale are deposited with the lender and the Fund pays interest to the lender. If the value of the securities declines between the time that the Fund borrows the securities and the time it repurchases and returns the securities, the Fund makes a profit for the difference (less any interest the Fund is required to pay to the lender). In this way, the Fund has more opportunities for gains when markets are generally volatile or declining.

The Funds may engage in short selling should securities be identified that are trading at a significant premium to their intrinsic value and are anticipated to decline in value. The Funds may also engage in short selling as a means of implementing a "hedge" in an attempt to lessen Fund volatility in declining markets. In this instance, the Fund would sell short securities representing a market index or sub index. The Funds may also sell short a security as a means of capturing a pricing disparity between the security and a related security, which would be purchased or held "long". This process of capturing price differences between related securities is referred to as arbitrage. Examples of such an action would include companies involved in merger or acquisition activity or other corporate action.

The Funds may engage in short selling pursuant to applicable securities legislation, which imposes the following conditions and limits on the Funds' short selling activities. Securities will be sold short only for cash. A security sold short will not be: (i) a security that the mutual fund is otherwise not permitted to purchase at the time of the short sale transaction; (ii) an illiquid asset; or (iii) a security of an investment fund unless the security is an index participation unit.

As well, at the time securities of a particular issuer are sold short by a Fund, (i) the Fund will have borrowed or arranged to borrow from a borrowing agent the security that is to be sold under the short sale transaction; (ii) the aggregate market value of all securities of that issuer sold short will not exceed 5% of the net asset value of the Fund; and (iii) the aggregate market value of all securities sold short by a Fund will not exceed 20% of the net asset value of the Fund. The Fund also will hold cash cover (as defined in NI 81-102) in an amount, including the Fund's assets deposited with borrowing agents as security in connection with short sale transactions, that is at least 150% of the aggregate market value of all securities it sold short on a daily marked to market basis. No proceeds from short sales will be used by a Fund to purchase long positions other than cash cover.

Asset Backed Commercial Paper - Subject to their respective investment objectives, each of the Funds may invest in asset backed commercial paper ("**ABCP**"), which investment may exceed 10% of a Fund's net assets. Generally, such investments may only be made by a Fund if the following conditions exist: (i) global style liquidity backstops; (ii) ratings from at least two rating agencies; (iii) program wide credit support; and (iv) sufficient transparency to track performance of the asset pools on a regular and timely basis. The Manager believes that the imposition of the above noted conditions, plus the sub-advisor's additional credit analysis, should ensure that purchases by the Funds of ABCP will be of sound credit quality.

What are the Risks of Investing in these Funds?

The general risks of investing in the Funds are disclosed in Part A of this document. Part B provides the specific risks that apply to each Fund under the heading "*What are the risks of investing in these Funds?*" in the detailed description of that Fund.

Who Should Invest in these Funds?

This section provides general guidance as to whether a Fund is suitable for you given its investment objective, your risk tolerance and investment needs. This information is only a guide. You should consult your financial advisor to determine the Fund which is appropriate for you given your specific risk tolerance and investment needs.

Fund Risk Classification

We assign an investment risk level to each Fund to provide you with further information to help you determine whether a Fund is appropriate for you. The methodology we use to determine the

investment risk level of a Fund, for purposes of the disclosure in this simplified prospectus and in the fund facts for a Fund, is required to be determined in accordance with a standardized risk classification methodology mandated by the Canadian Securities Administrators that is based on a Fund's historical volatility as measured by the 10-year standard deviation of the monthly returns of the Fund, assuming the reinvestment of all income and capital gains distributions in additional securities of the Fund. However, other types of risk, both measurable and non-measurable, may exist. It is also important to note that a Fund's historical volatility may not be indicative of its future volatility.

Using this methodology, we will generally assign an investment risk level based on a Fund's historical 10-year standard deviation in one of the following categories:

- Low – 0 to less than 6
- Low to medium – 6 to less than 11
- Medium – 11 to less than 16
- Medium to high – 16 to less than 20
- High – 20 or greater

In certain instances, this methodology may produce a result that would require us to assign a lower investment risk level for a Fund which we believe may not be indicative of the Fund's future volatility. As a result, in addition to using the standardized risk classification methodology described above, we may increase a Fund's investment risk level if we determine the increase to be reasonable in the circumstances by taking into account other qualitative factors including, but not limited to, economic climate, portfolio management styles, sector concentration and types of investments made by the Fund and the liquidity of those investments.

In addition, if a Fund does not have at least 10 years of performance history, and if there is another fund with 10 years of performance history that has the same manager, portfolio manager or sub advisor, investment objectives and investment strategies as the Fund, then the return history of the other fund will be used for the remainder of the 10-year period when calculating the standard deviation of the Fund. If such a fund does not exist, then the return history of a reference index that reasonably approximates, or in the case of a newly established Fund is expected to reasonably approximate, the standard deviation of the Fund, will be used for the remainder of the 10-year period when calculating the standard deviation of the Fund. In the case of a Fund that undergoes a change to its investment objectives, the Fund will use its own performance history following the change and use the return history of a reference index that reasonably approximates the standard deviation of the Fund for the remainder of the 10-year period.

This investment risk level may change once the Fund has sufficient performance history. The investment risk level and the reference index or reference fund for each Fund are reviewed at least annually and when it is no longer reasonable in the circumstances, such as where there is a material change in a Fund's investment objectives and/or investment strategies.

The following table sets out a description of the reference index or other fund used for each Fund that has less than 10 years of performance history.

Fund	Reference index or fund
Loomis Sayles Global Diversified Corporate Bond Fund	Bloomberg Barclays Global Aggregate Corporate Index (CAD Hedged)
Loomis Sayles Strategic Monthly Income Fund	Bloomberg Barclays US Aggregate Bond Index (CAD Hedged)
Gateway Low Volatility U.S. Equity Fund (Series A, F and I)	Cboe S&P 500 BuyWrite Index (CAD) ¹
Gateway Low Volatility U.S. Equity Fund (Series A (hedged) and F (hedged))	Cboe S&P 500 BuyWrite Index (CAD Hedged) ¹
Fiera Strategic Balanced Registered Fund	50% FTSE Canada Universe Bond Index (CAD) & 25% S&P/TSX Capped Composite Index (CAD) & 25% MSCI
Fiera Intrinsic Growth Registered Fund	75% S&P/TSX Composite Index (CAD) & 25% S&P 500 Index (CAD)
Fiera U.S. Dividend Registered Fund	Russell 1000 Value Index (CAD)
Fiera U.S. Growth Registered Fund	Russell 1000 Growth Index (CAD)
Fiera Core Global Equity Registered Fund	MSCI World NR Index (CAD)
Fiera Canadian Preferred Share Registered Fund	S&P/TSX Preferred Share Index (CAD)
Oakmark U.S. Equity Registered Fund	S&P 500 Index (CAD)
Oakmark International Equity Registered Fund	MSCI World ex USA NR Index (CAD)

¹ Effective May 1, 2019, the benchmark used to calculate the investment risk classification of Gateway Low Volatility U.S. Equity Fund changed from the S&P 500 TR Index (CAD) to the Cboe S&P 500 BuyWrite Index (CAD) for the unhedged series of the Fund and from the S&P 500 TR Index (CAD Hedged) to the Cboe S&P 500 BuyWrite Index (CAD Hedged) for the hedged series of the Fund because the Cboe index strategy has a higher correlation with the Fund's strategy, resulting in a more aligned risk and return profile between the index strategy and the Fund's strategy.

Benchmark Descriptions:

The **Bloomberg Barclays Global Aggregate Corporate Index** is a flagship measure of global investment grade, fixed-rate corporate debt. This multi-currency benchmark includes bonds from developed and emerging markets within the industrial, utility, and financial sectors.

The **Bloomberg Barclays US Aggregate Bond Index** is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and nonagency).

The **Cboe S&P 500 BuyWrite Index ("BXM")** is a benchmark index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index. Announced in April 2002, the BXM Index was developed by the Cboe in cooperation with Standard & Poor's. To help in the development of the BXM

Index, the Cboe commissioned Professor Robert Whaley to compile and analyze relevant data from the time period from June 1988 through December 2001. Data on daily BXM prices now is available from June 30, 1986, to the present time (see below). The BXM is a passive total return index based on (1) buying an S&P 500 stock index portfolio, and (2) "writing" (or selling) the near-term S&P 500 Index (SPXSM) "covered" call option, generally on the third Friday of each month. The SPX call written will have about one month remaining to expiration, with an exercise price just above the prevailing index level (i.e., slightly out of the money). The SPX call is held until expiration and cash settled, at which time a new one-month, near-the-money call is written.

The **FTSE Canada Universe Bond Index** is a market capitalization-weighted index consisting of a broadly diversified range which may include any or all of federal, provincial, corporate and municipal bonds. The flagship FTSE Canada Universe Bond Index is the most widely used measure of performance of marketable government and corporate bonds in the Canadian market.

The **MSCI World ex USA Index** captures large and mid cap representation across 22 of 23 Developed Markets (DM) countries--excluding the United States. With 1,012 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

The **MSCI World Index**, which is part of The Modern Index Strategy, is a broad global equity index that represents large and mid-cap equity performance across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country and MSCI World Index does not offer exposure to emerging markets.

The **Russell 1000 Growth Index** measures the performance of large and mid-capitalization growth sectors of the US equity market.

The **Russell 1000 Value Index** measures the performance of large and mid-capitalization US equities that exhibit value characteristics.

The **S&P 500 Index** is widely regarded as the best single gauge of large-cap U.S. equities. There is over USD 9.9 trillion indexed or benchmarked to the index, with indexed assets comprising approximately USD 3.4 trillion of this total. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization.

The **S&P/TSX Capped Composite Index** imposes capped weights of 10% on all of the constituents included in the S&P/TSX Composite. The S&P/TSX Composite covers approximately 95% of the Canadian equities market, and has been the primary gauge for Canadian-based, Toronto Stock Exchange-listed companies since 1977.

The **S&P/TSX Composite Index** is the headline index for the Canadian equity market. It is the broadest in the S&P/TSX family and is the basis for multiple sub-indices including but not limited to equity indices, Income Trust Indices, Capped Indices, GICS Indices and market cap based indices. The Toronto Stock Exchange (TSX) serves as the distributor of both real-time and historical data for this index.

The **S&P/TSX Preferred Share Index** is designed to measure the performance of the Canadian preferred stock market, and consists of preferred shares listed and traded in Canadian dollars on the Toronto Stock Exchange.

These investment risk levels do not necessarily correspond to an investor's risk tolerance assessment. A Fund may be suitable for you as an individual component within your entire portfolio, even if the Fund's risk rating is higher or lower than your personal risk tolerance level. When you choose investments with your financial advisor, you should consider your whole portfolio, investment objectives, your time horizon and your personal risk tolerance level.

Please consult your financial advisor for advice regarding your personal circumstances.

Details about the standardized risk classification methodology used to identify the investment risk level of each Fund are available on request, at no cost to you by calling toll free at 1-866-378-7119 or by e-mail at info.canada@natixis.com.

Distribution Policy

The distribution policy indicates when the Funds will pay a distribution or a dividend and the form of that distribution (cash or reinvested securities in the Fund).

Single Trust Funds and Registered Funds

Each Single Trust Fund and Registered Fund will distribute its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. A Single Trust Fund or Registered Fund may also make other distributions from time to time.

For each Registered Fund, all distributions of income are automatically reinvested in additional securities of the Fund. For Fiera Canadian Bond Fund and Loomis Sayles Global Diversified Corporate Bond Fund, all distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

The distribution policy section of each Fund profile categorizes the Fund for purposes of the following description.

Class Funds

Distributions will consist of capital gains, return of capital or dividends.

- **Dividend:** The Fund will make fixed distributions of ordinary dividends on a monthly basis. To the extent that a capital gains dividend is necessary to reduce the overall tax liability of the Corporation, a component of the monthly distribution may be categorized as a capital gains dividend. The Fund may also declare an additional annual capital gains dividend.
- **Return of Capital:** The Fund will make fixed distributions comprised of a return of capital on a monthly basis. To the extent that the Corporation is required to declare capital gains dividends and Canadian taxable dividends to reduce the overall tax liability of the Fund, a component of the monthly distribution may be categorized as a capital gains dividend or as an ordinary dividend. The Fund may also declare an additional annual capital gains dividend.
- **Compound Growth:** The Fund may declare capital gains dividends and/or ordinary dividends to reduce the overall tax liability of the Corporation.
- **Capital Gains:** The Fund may declare capital gains dividends annually in December to the extent that a capital gains dividend is necessary to reduce the overall tax liability the Corporation (up to the increase in net asset value per share for the calendar year of such share). To the extent that the Fund is required to distribute ordinary dividends, the Fund will declare ordinary dividends in December.
- **Inter-Fund:** The Fund may declare dividends annually, which will consist of varying proportions of ordinary dividends and capital gains dividends.

For each of the Tax Classes, all dividends and return of capital distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

Also, due to tax changes that affect the taxation of a switch between Tax Classes and Class Funds, the Corporation may make other distributions from time to time. The distribution policy of each of the Funds is described below.

Fund Expenses Indirectly Borne by Investors

This section provides details of the expenses of the Funds that are indirectly paid by investors. As noted in Part A of this simplified prospectus under the heading "*Fees and Expenses*", each class and series of securities of a Fund is responsible for the operating expenses that relate to that particular class or series and for its proportionate share of the operating expenses that are applicable to all the classes or series. These expenses are paid out of the assets of each Fund.

This section gives you a hypothetical example to help you compare the indirect cost of investing in the Fund with the indirect cost of investing in other mutual funds. These costs are paid out of a Fund's assets. While you don't pay them directly, they have the effect of lowering the Fund's returns. The information in the chart is for the series of the Fund that have been issued to investors and have completed a financial year. The table indicates the cumulative fees and expenses you would have paid if:

- You made an initial investment of \$1,000 (without the payment of any sales charge);
- The total annual return for the Fund was 5% each year; and
- The management expense ratio of the Fund in each year during the 10-year period was equal to the management expense ratio for the last completed financial year.

Fiera Investments absorbed a significant portion of certain Funds' operating expenses during the past financial year and as a result, the management expense ratio would have been higher in respect of those Funds had it not absorbed those costs. No management fees are charged to the Funds in respect of Series I securities.

See the heading "*Fees and Expenses*" in Part A of this simplified prospectus for further information relating to the costs of investing in the Funds.

Fiera Canadian Bond Funds

- **Fiera Canadian Bond Fund** (for all investors, both taxable and registered)
- **Fiera Canadian Bond Class** (for taxable investors)

Sub-Advisor	J. Zechner Associates Inc.

What Do Each of the Funds Invest In?

Investment Objective

- Each of the Funds pursues a steady flow of income while preserving capital primarily through investment in Canadian fixed income securities.
- Fiera Canadian Bond Fund will invest directly in fixed income securities such as bonds issued or guaranteed by Canadian governments, corporate debentures, mortgage-backed and asset backed securities with maturity dates in excess of one year.
- Fiera Canadian Bond Class seeks to achieve the investment objective through the investment of substantially all its portfolio assets in units of Fiera Canadian Bond Fund.
- Any change to the investment objective of a Fund must be approved by a majority of the votes cast at a meeting of the Fund's securityholders.

Investment Strategies

Fiera Canadian Bond Fund

- The Sub-Advisor will use investment strategies analyzing the expected direction of interest rates, the relative value between various terms to maturity, the relative value of individual issues, the relative value of different bond market sectors and the relative value between Canadian, provincial and corporate bonds.
- The Fund may invest up to 10% of the cost of its net assets in preferred shares.
- The Fund may invest up to 50% of the cost of its net assets in foreign securities.
- The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See "*Income Tax Considerations for Investors – Portfolio Turnover*".
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
- In addition to the specific use by the Fund of derivatives as described above, the Fund may use derivatives for both hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.

Fiera Canadian Bond Class

- Fiera Canadian Bond Class will invest in units of Fiera Canadian Bond Fund as discussed in Part A of this simplified prospectus. See "*Fund-on-Fund Arrangements*".

What Are the Risks of Investing in the Funds?

Each Fund is subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*"

Specifically, the Funds are subject to those risks described under the following sub-headings:

- Equity Investments Risks;
- General Risks;
- Fixed Income Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks (not applicable to Fiera Canadian Bond Fund); and
- Other Investment Risks (other than Income Trust Risk, Short Selling Risk and Depositary Receipt Risk).

Who Should Invest in the Funds?

- You should consider the Funds if you are seeking primarily conservative longer term fixed income returns and preservation of your capital.
- Taxable investors may purchase Fiera Canadian Bond Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Taxable investors and registered investors may purchase Fiera Canadian Bond Fund. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of the Fixed Income Fund.
- You should consider the Funds if **you have a low tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment over the short-term).
- Switching from one class to another class of Fiera Canadian Bond Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera Canadian Bond Fund

The Fund distributes any net income quarterly (in March, June, September, December) and any net realized capital gains and any remaining income in December. Distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

Fiera Canadian Bond Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.03	\$0.36	return of capital
Dividend	\$0.03	\$0.36	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. Such distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". The table assumes a \$1000 investment, 5% annual appreciation and the last fiscal year's management expense ratio.

Portfolio Manager	Fiera Investments LP
Sub-Advisor	Loomis, Sayles & Company, L.P.

What Do Each of the Funds Invest In?

Investment Objective

- Each of the Funds pursues a steady flow of income and the potential for capital gains primarily through investment in fixed income securities issued by Canadian and foreign corporations.
- Loomis Sayles Global Diversified Corporate Bond Fund will invest directly in fixed income securities such as corporate debentures, mortgage-backed and asset backed securities with maturity dates more than one year and/or bonds issued or guaranteed by Canadian governments.
- Loomis Sayles Global Diversified Corporate Bond Class seeks to achieve the investment objective through the investment of substantially all its portfolio assets in units of Loomis Sayles Global Diversified Corporate Bond Fund.
- Any change to the investment objective of a Fund must be approved by a majority of the votes cast at a meeting of the Fund's securityholders.

Investment Strategies

Loomis Sayles Global Diversified Corporate Bond Fund

- The Sub-Advisor employs a value-driven, benchmark-aware approach implemented within a risk-budgeting framework. The investment process seeks to create a diversified portfolio with undervalued and preferably discount securities across relevant risk factors, including sector, country, currency, curve and specific credit.
- The Fund is actively managed and uses a research-driven strategy in selecting sectors and securities as its primary return sources. Country or currency of issue allocations, and yield curve positioning are typically secondary sources of excess return.
- The Fund invests primarily in investment grade securities.
- The Fund may invest up to 20% of its assets in securities of below investment grade credit quality. Investment grade fixed income securities are securities rated at least BBB- (Standard & Poor's Ratings Services), Baa3 (Moody's Investors Services, Inc.), or BBB- (Fitch Ratings) or if unrated, determined by the Loomis Sayles to be equivalent. If the ratings assigned to an instrument by Standard & Poor's Ratings Services, Moody's Investors Services Inc. or Fitch Ratings are not the same, the highest rating of these rating agencies will be used.
- Eligible instruments for the Fund include but are not limited to, public or private debt obligations issued or guaranteed by corporations, governments (including their agencies, instrumentalities and sponsored entities), supranational entities, partnerships and trusts. Mortgage-backed, asset-backed, convertible, preferred, hybrid, or equity instruments issued by any of the above-named entities. Such obligations may be issued at fixed, variable, adjustable or zero-coupon rates.

- The Fund may invest in instruments issued or guaranteed by Canadian or foreign issuers worldwide, including emerging markets securities.
- The Fund will not invest more than 20% of its assets in mortgage-backed securities and asset backed securities.
- The Fund will not invest more than 25% of its assets in convertible bonds.
- The Fund will not invest more than 5% of its total assets in equities and other equity-type securities.
- The Fund may invest up to 10% of its assets in bank loans.
- The Fund may invest up to 95% of its assets in foreign fixed income securities.
- The Fund may use derivatives for both hedging and non-hedging purposes. This could include swaps, futures, forward contracts and options. The Fund may engage in the credit derivatives market by entering into, among other things, credit default swaps in order to sell and buy protection.
- The Fund may use derivatives for hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus. The Fund may use derivatives to seek to hedge some or all its foreign currency exposure back to the Canadian dollar, but may cease hedging such exposure or increase or decrease the amount of its hedge at any time in the discretion of the portfolio manager.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
- Given the style of the Fund, portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See "Income Tax Considerations for Investors – Portfolio Turnover".

Loomis Sayles Global Diversified Corporate Bond Class

- Loomis Sayles Global Diversified Corporate Bond Class will invest in units of Loomis Sayles Global Diversified Corporate Bond Fund as discussed in Part A of this simplified prospectus. See "*Fund-on-Fund Arrangements*".

What Are the Risks of Investing in the Funds?

Each Fund is subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*"

Specifically, the Funds are subject to those risks described under the following sub-headings:

- Equity Investments Risks;
- General Risks;
- Fixed Income Investments Risks;
- Foreign Investments Risks;

- Company Structure Risks (not applicable to Loomis Sayles Global Diversified Corporate Bond Fund); and
- Other Investment Risks (other than Short Selling Risk).

Who Should Invest in the Funds?

- You should consider the Funds if you are seeking a diversified investment in global corporate bonds with a focus on a steady flow of income and the potential for capital gains.
- Taxable investors may purchase Loomis Sayles Global Diversified Corporate Bond Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Taxable investors and registered investors may purchase Loomis Sayles Global Diversified Corporate Bond Fund. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Fixed Income Fund.
- You should consider the Funds if **you have a low tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Switching from one class to another class of Loomis Sayles Global Diversified Corporate Bond Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Loomis Sayles Global Diversified Corporate Bond Fund

The Fund distributes any net income quarterly (in March, June, September, December) and any net realized capital gains and remaining income in December. Distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

Loomis Sayles Global Diversified Corporate Bond Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.03	\$0.36	return of capital
Dividend	\$0.03	\$0.36	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment

performance and should not be confused with “yield” or “income”. You should not draw conclusions about the Fund’s investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. Such distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading “*Distribution Policy*”.

Portfolio Manager	Loomis, Sayles & Company, L.P.

What Does the Fund Invest In?

Investment Objective

- The Fund seeks high current income with a secondary objective of capital growth through investment primarily in U.S. income producing securities.
- Any change in the investment objective of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's unitholders.

Investment Strategies

- Under normal market conditions, the Fund will invest substantially all of its assets in income producing securities (including below investment grade securities or "**junk bonds**") with a focus on U.S. corporate bonds, convertible securities, foreign debt instruments, including those in emerging markets and related foreign currency transactions, and U.S. government securities. Below investment grade fixed-income securities are rated below investment grade quality (i.e. none of the three major ratings agencies (Moody's Investors Service, Inc., Fitch Investors Services, Inc. or Standard and Poor's Ratings Group, have rated the securities in one of its top four rating categories) or, if the security is unrated, are determined by the Portfolio Manager to be of comparable quality.
- The Fund may invest in preferred stocks.
- The Fund may invest up to 5% of its assets in dividend paying common stocks.
- The Fund may invest up to 40% of its assets in below investment grade securities.
- The Portfolio Manager may shift the Fund's assets among various types of income-producing securities based upon changing market conditions. The Portfolio Manager performs its own extensive credit analyses to determine the creditworthiness and potential for capital appreciation of a security.

- The Portfolio Manager uses a flexible approach to identify securities in the global marketplace with characteristics including discounted price compared to economic value, undervalued credit ratings with strong or improving credit profiles and yield premium relative to its benchmark (although not all the securities selected will have these attributes).
- In deciding which securities to buy and sell, the Portfolio Manager will consider, among other things, the financial strength of the issuer, current interest rates, current valuations, the Portfolio Manager's expectations regarding future changes in interest rates and comparisons of the level of risk associated with particular investments with the Portfolio Manager's expectations concerning the potential return of those investments.
- The Portfolio Manager seeks to buy bonds that offer a positive yield advantage over the market and, in its view, have room to increase in price. It may also invest to take advantage of what the Portfolio Manager believes are temporary disparities in the yield of different segments of the market for U.S. government securities. The Portfolio Manager has maximum flexibility to find opportunities in a wide range of markets. This flexible approach provides the Fund with access to a wide array of investment opportunities. Typically, the three key sectors that the Portfolio Manager focuses upon are U.S. corporate issues (including convertible securities), foreign debt securities and U.S. government securities. The Portfolio Manager maintains a core of the Fund's investments in corporate bond issues and shifts its assets among other income-producing securities as opportunities develop. The Fund generally seeks to maintain a high level of diversification as a form of risk management.
- In connection with its principal investment strategies, the Fund may also invest in securities issued pursuant to Rule 144 under the U.S. Securities Act of 1933 ("**Rule 144A securities**"), structured notes, zero-coupon bonds, pay-in-kind bonds, mortgage-related securities, stripped securities and futures, swaps (including credit default swaps) and foreign currency transactions for hedging and investment purposes. The Portfolio Manager may elect not to hedge currency risk, which may cause the Fund to incur losses that would not have been incurred had the risk been hedged. Except as provided above, the Fund is not limited in the percentage of its assets that it may invest in these instruments. Rule 144A securities are privately offered securities that can be resold only to certain qualified institutional buyers pursuant to Rule 144A under the U.S. Securities Act of 1933. Rule 144A offerings are typically used to offer debt and preferred stock, although can be used for common stock. The Fund will not invest in Rule 144A securities until it has attained the status of a qualified institutional buyer for purposes of U.S. securities legislation.
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may use derivatives for hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus. The Fund may use derivatives to seek to hedge some or all its foreign currency exposure back to the Canadian dollar, but may cease hedging such exposure or increase or decrease the amount of its hedge at any time in the discretion of the portfolio manager.
- The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See "*Income Tax Considerations for Investors – Portfolio Turnover*".

What Are the Risks of Investing in this Fund?

The Fund is subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*"

Specifically, the Fund is subject to those risks described under the following sub-headings:

- Equity Investments Risks;
- Fixed Income Investments Risks;
- General Risks;
- Foreign Investments Risks; and
- Other Investment Risks.

Who Should Invest in this Fund?

- You should consider this Fund if you are seeking income and capital appreciation from fixed income markets primarily outside Canada.
- This Fund may be purchased by all investors, both taxable and registered investors. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Single Trust Fund.
- You should consider this Fund if **you have a low tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment over the short-term).

Distribution Policy

The Fund distributes any income and any capital gains to the extent necessary to eliminate any tax liability of the Fund in each calendar year. The Fund will make fixed distributions of \$0.42 annually (comprised of \$0.035 monthly paid at the end of each calendar month) and if required make an additional annual distribution in December. Any net income earned by the Fund in excess of the monthly distribution may be distributed to securityholders from time to time.

Individual distributions may consist of interest income, foreign source income, Canadian ordinary dividends, other income and capital gains to the extent necessary to eliminate any tax liability to the Fund. To the extent the fixed distributions paid during the year exceed income and capital gains of the Fund, the excess portion will be designated as a return of capital.

Distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne By Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". What Does the Fund Invest In?

Investment Objective

- The Fund seeks to provide a combination of income and capital appreciation through investment primarily in U.S. equity securities and will attempt to reduce volatility through the sale of index call options and the purchase of index put options.
- Any change to the investment objective of the Fund must be approved by a majority of votes cast at a meeting of Fund's securityholders.

Investment Strategies

- Under normal circumstances, the Fund invests in a broadly diversified portfolio of common stocks that replicates a broad-based securities market index, while also selling index call options and purchasing index put options.
- Writing index call options reduces the Fund's volatility, provides steady cash flow and is an important source of the Fund's return, although it also reduces the Fund's ability to fully profit from increases in the value of its equity portfolio.
- The Fund also buys index put options, which can protect the Fund from a significant market decline that may occur over a short period of time. The value of an index put option generally increases as the prices of the stocks constituting the index decrease, and decreases as those stocks increase in price. From time to time, the Fund may reduce its holdings of put options, resulting in an increased exposure to a market decline.

- The combination of the diversified stock portfolio, the steady cash flow from the sale of index call options and the downside protection from index put options is intended to provide the Fund with the majority of the returns associated with equity market investments while exposing investors to less risk than other equity investments.
- The Fund may invest in companies with small, medium or large market capitalizations.
- Equity securities purchased by the Fund may include U.S. exchange-listed common stocks, Exchange Traded Funds ("**ETFs**"), American Depositary Receipts ("**ADRs**"), which are securities issued by a U.S. bank that represents interests in foreign equity securities, and interests in real estate investment trusts ("**REITs**").
- The Fund invests in a broadly diversified stock portfolio that replicates a broad-based equity market index, designed to support the Fund's index option based risk management strategy.
- The Fund continuously writes index call options, typically on a broad-based securities market index, on the full value of its broadly diversified stock portfolio. As the seller of the index call option, the Fund receives cash (the "**premium**") from the purchaser. The purchaser of an index call option has the right to any appreciation in the value of the index over a fixed price (the "**exercise price**") on a certain date in the future (the "**expiration date**"). If the purchaser does not exercise the option, the Fund retains the premium. If the purchaser exercises the option, the Fund pays the purchaser the difference between the value of the index and the exercise price of the option. The premium, the exercise price and the value of the index determine the gain or loss realized by the Fund as the seller of the index call option. The Fund can also repurchase the call option prior to the expiration date, ending its obligation. In this case, the difference between the cost of repurchasing the option and the premium received will determine the gain or loss realized by the Fund.
- The Fund may buy index put options in an attempt to protect the Fund from a significant market decline that may occur over a short period of time. The value of an index put option generally increases as stock prices (and the value of the index) decrease and decreases as those stocks (and the index) increase in price. Typically, the Fund will not spend at any time more than 5% of its net asset value to purchase index put options.
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may invest up to 30% of its assets in securities of other exchange traded funds managed by other mutual fund managers including our affiliates or associates.
- The Fund may invest in non-U.S. securities traded in U.S. markets (through ADRs or stock traded in U.S. dollars). The Fund may enter into repurchase agreements and/or hold cash and cash equivalents.
- The Fund will invest in derivatives, such as forward contracts, to seek to hedge substantially all its foreign currency exposure back to the Canadian dollar on that portion of the Fund's foreign dollar denominated portfolio investments that are allocated to Series A (Hedged) and Series F (Hedged) securities. While this strategy may not achieve a perfect hedge of the foreign currency exposure for Series A (Hedged) and Series F (Hedged) securities, Series A (Hedged) and Series F (Hedged) securities will generally have a rate of return that is based on the performance of the Fund's portfolio investments excluding the performance attributable to the foreign currency fluctuations relative to the Canadian dollar. The currency hedging strategy of the Hedged Class of the Fund (i.e. to seek to hedge substantially all its foreign currency exposure) can only be changed with the approval of a majority of securityholders of

the Hedged Class of the Fund at a meeting called for such purpose. No currency hedging activity will take place within the portion of the Fund's foreign dollar denominated portfolio investments that are allocated to Series A, Series F and Series I securities.

What Are the Risks of Investing in the Fund?

The Fund is subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*"

Specifically, the Fund is subject to those risks described under the following sub-headings:

- Equity Investments Risks;
- Foreign Investments Risks;
- General Risks; and
- Other Investment Risks.

Derivatives are used for Series A (Hedged) and Series F (Hedged) securities to hedge against foreign currency exposure and as a result Series A (Hedged) and Series F (Hedged) securities will be subject to additional derivatives risk, a category of other investment risks, than units in other series of the Fund. Series A (Hedged) and Series F (Hedged) securities will be subject to less foreign currency risk than units of other series of the Fund because their foreign currency exposure is hedged. While the hedging strategy may not achieve a perfect hedge of the foreign currency exposure for Series A (Hedged) and Series F (Hedged) securities, these securities will generally have a rate of return that is based on the performance of the Fund's portfolio investments, excluding the performance attributable to foreign currency fluctuations relative to the Canadian dollar.

As a result of this hedging strategy, the portfolio turnover rate of the Fund is expected to be higher. The increased trading costs are allocated to Series A (Hedged) and Series F (Hedged) and therefore may lower its returns. Please see "*Portfolio Turnover*" on page 49 for a discussion on the tax consequences to securityholders.

As at May 31, 2019, an investor held 33.8% of the securities of Gateway Low Volatility U.S. Equity Fund. See Large Investor Risk.

Over the 12-month period preceding May 31, 2019, from time to time this Fund held more than 10% of its net assets in securities of an issuer. It invested as much as 26.68% in securities of iShares Core S&P 500 ETF. See Concentration Risk.

Who Should Invest In This Fund?

- You should consider this Fund if you want a combination of income and capital appreciation with potentially less volatility (as a result of the use of an index option based risk management strategy) than a traditional portfolio consisting solely of equity securities.
- This Fund may be purchased by all investors, both taxable and registered investors. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Fiera Single Trust Fund.
- The Fund is not appropriate for investors with a short-term investment horizon.

- You should consider this Fund **if you have a low to medium tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Series A (Hedged) and Series F (Hedged) securities are for securityholders who want to gain exposure to U.S. investments but wish to minimize exposure to fluctuations in the U.S. dollar relative to the Canadian dollar.

Distribution Policy

The Fund distributes any income and any capital gains to the extent necessary to eliminate any tax liability of the Fund in each calendar year. The Fund will make fixed distributions of \$0.50 annually (comprised of \$0.0416 monthly paid at the end of each calendar month) and if required make an additional annual distribution in December. Any net income earned by the Fund in excess of the monthly distribution may be distributed to securityholders from time to time.

Individual distributions may consist of interest income, foreign source income, Canadian ordinary dividends, other income and capital gains to the extent necessary to eliminate any tax liability to the Fund. To the extent the fixed distributions paid during the year exceed income and capital gains of the Fund, the excess portion will be designated as a return of capital.

Distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne By Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". The table assumes a \$1000 investment, 5% annual appreciation and the last fiscal year's management expense ratio.

Portfolio Manager	Fiera Investments LP
Sub-Advisor	J. Zechner Associates Inc.

What Do Each of the Funds Invest In?

Investment Objective

- The Funds pursue a steady flow of income primarily through investment in Canadian preferred shares.
- Fiera Canadian Preferred Share Class invests directly in preferred shares.
- Fiera Canadian Preferred Share Registered Fund seeks to achieve the investment objective through the investment of substantially all its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Fiera Canadian Preferred Share Class.
- Any change to the investment objective of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's shareholders.

Investment Strategies

Fiera Canadian Preferred Share Class

- The Sub-Advisor considers the credit quality of preferred share issuers, the attributes of individual preferred share issues and the expected direction of dividend yields. The Sub-Advisor seeks to invest in preferred shares that provide attractive value relative to available preferred share types, issuers and issues. The Sub-Advisor also considers the relative attractiveness of preferred shares to other fixed income alternatives.
- Although the Fund is expected to primarily invest in preferred share securities the Sub-Advisor may at times utilize other fixed income securities including money market securities and government bonds, preferred share ETFs, agency and/or corporate bonds to a maximum of 40% of the portfolio.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
- The Fund may invest up to 20% of the cost of its net assets in foreign securities.
- The Fund may use derivatives for both hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.

Fiera Canadian Preferred Share Registered Fund

- Fiera Canadian Preferred Share Registered Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera Canadian Preferred Share Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*".

What Are the Risks of Investing in these Funds?

Each of the Funds is subject to certain of the risks described in detail in Part A of the simplified prospectus under the heading "***What are the general risks of investing in a mutual fund?***"

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks; and
- Other Investment Risks (other than Income Trust Risk, Short Selling Risk and Depositary Receipt Risk).

Who Should Invest in these Funds?

- You should consider these Funds if you want exposure to dividend income through a diversified portfolio of Canadian preferred shares.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera Canadian Preferred Share Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera Canadian Preferred Share Registered Fund and Series F shares of Dividend and Return of Capital classes of Fiera Canadian Preferred Share Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a low to medium tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera Canadian Preferred Share Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera Canadian Preferred Share Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera Canadian Preferred Share Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.0425	\$0.51	return of capital
Dividend	\$0.0425	\$0.51	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". The table assumes a \$1000 investment, 5% annual appreciation and the last fiscal year's management expense ratio.

Sub-Advisor	Cidel Asset Management Inc.

What Do Each of the Funds Invest In?

Investment Objectives

- Each Fund seeks to provide a combination of capital preservation, income generation and long term capital growth primarily through investment in a diversified portfolio of Canadian securities.
- Fiera Strategic Balanced Class pursues the investment objective primarily through investment in publicly traded common and preferred equity and income trust securities and in government issued or guaranteed bonds, corporate debentures, mortgages, REITs, convertible debentures, asset backed securities and treasury bills.
- Fiera Strategic Balanced Registered Fund seeks to achieve the investment objective through the investment of substantially all its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Fiera Strategic Balanced Class.
- Any change to the investment objective of a Fund must be approved by a majority of votes cast at a meeting of Fund's securityholders.

Investment Strategies

Fiera Strategic Balanced Class

- The Sub-Advisor seeks to invest in a broadly diversified portfolio of fixed income investments and equity securities of companies with attractive cash flow and valuation profiles and a track record of returning rising levels of cash flow to securityholders with a conservative bias.
- The Sub-Advisor seeks to invest in companies with quality management, a practice of increasing dividends or share buybacks, and identifiable growth opportunities.
- The Sub-Advisor utilizes a blend of interest rate anticipation, yield curve management, sector allocation, and credit analysis to reduce volatility and generate income and more consistent returns with a view to meeting the Fund's investment objectives.
- For the equity securities component, the Sub-Advisor follows a security selection process consisting of company screening, bottom up fundamental research/valuation and a final decision-making phase based on cash flow analysis portfolio and risk management considerations.
- For the fixed income component, the Sub-Advisor seeks to be diversified by industry sectors, types of issues, as well as individual issuers.
- The Fund may invest up to 50% of the cost of its net assets in foreign securities.
- The Fund may also use derivatives for hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in short selling subject to the conditions and limits set out in Part B to the simplified prospectus of the Funds.

- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund. These transactions will only be made with parties that are considered to be creditworthy.

Fiera Strategic Balanced Registered Fund

- Fiera Strategic Balanced Registered Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera Strategic Balanced Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*".

What Are the Risks of Investing in the Funds?

Each of the Funds is subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*"

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks;
- Exchange Transaction Risks; and
- Other Investment Risk.

Who Should Invest in these Funds?

- You should consider these Funds if you want a combination of equity and fixed income investments and you are comfortable with the risks of equity and fixed income securities.
- You should consider these Funds if you want a core Canadian balanced investment.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera Strategic Balanced Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera Strategic Balanced Registered Fund and Series F shares of Dividend and Return of Capital classes of Fiera Strategic Balanced Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.

- You should consider these Funds if **you have a low to medium tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera Strategic Balanced Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera Strategic Balanced Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera Strategic Balanced Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.04	\$0.48	return of capital
Dividend	\$0.04	\$0.48	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading “*Fund Expenses Indirectly Borne by Investors*”. Portfolio Manager	Fiera Investments LP
Sub-Advisors*	Galibier Capital Management Ltd. (equity portion) J. Zechner Associates Inc. (fixed income portion)

*In respect of Fiera Intrinsic Balanced Class only.

What Do Each of the Funds Invest In?

Investment Objectives

- Each Fund seeks to provide a combination of capital preservation, income generation and long-term capital growth primarily through investment in a diversified portfolio of Canadian securities.
- Fiera Intrinsic Balanced Class pursues the investment objective primarily through investment in publicly traded Canadian equity and income trust securities and in government issued or guaranteed bonds, corporate debentures, mortgage and asset backed securities and treasury bills.
- Fiera Intrinsic Balanced Class may invest in fixed income and income trust securities directly, or indirectly through the use of derivatives, to provide the Fund, with an investment return similar to a direct investment, less the derivative costs. The method of investment by the Fund in fixed income and income trust securities will be determined primarily based upon maximizing the tax efficiency of Fiera Investments Capital Corporation.
- Fiera Intrinsic Balanced Registered Fund seeks to achieve the investment objective through the investment of substantially all of its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Fiera Intrinsic Balanced Class.
- Any change to the investment objective of a Fund must be approved by a majority of votes cast at a meeting of Fund's securityholders.

Investment Strategies

Fiera Intrinsic Balanced Class

- For the equity portion of the Fund, Galibier follows a valuation driven, bottom up investment process. Galibier seeks underpriced securities by using fundamental research to determine a security's underlying intrinsic value. Securities offering a discounted market price to intrinsic value are considered for the portfolio.
- For the fixed income portion of the Fund, Zechner uses investment strategies analyzing the expected direction of interest rates, the relative value between various terms to maturity, the relative value of individual issues and the relative value of different bond market sectors.
- The Fund's investments in equity and fixed income securities are actively managed and each will range between 25% and 75% of the Fund's assets, depending on Galibier's assessment of economic and market factors. For purposes of such asset allocation, preferred shares will be considered fixed income securities.
- The Fund may invest up to 30% of the cost of its net assets in foreign securities.

- The Fund may also use derivatives for hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in short selling as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
- The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See *"Income Tax Considerations for Investors – Portfolio Turnover"*.

Fiera Intrinsic Balanced Registered Fund

- Fiera Intrinsic Balanced Registered Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera Intrinsic Balanced Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See *"Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus"*.

What Are the Risks of Investing in the Funds?

Each of the Funds is subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading *"What are the general risks of investing in a mutual fund?"*

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks; and
- Other Investment Risk.

Who Should Invest in these Funds?

- You should consider these Funds if you want a combination of equity and fixed income investments and you are comfortable with the risks of equity and fixed income securities.
- You should consider these Funds if you want a core Canadian balanced investment.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera Intrinsic Balanced Class. See the heading *"Purchases, Switches and Redemptions"* under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera Intrinsic Balanced Registered Fund and Series F shares of Dividend and Return of Capital classes of

Fiera Intrinsic Balanced Class. See the heading “*Purchases, Switches and Redemptions*” under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.

- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a low to medium tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera Intrinsic Balanced Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera Intrinsic Balanced Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera Intrinsic Balanced Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.03	\$0.36	return of capital
Dividend	\$0.035	\$0.42	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund’s investment performance and should not be confused with “yield” or “income”. You should not draw conclusions about the Fund’s investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading “*Distribution Policy*”.

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading “*Fund Expenses Indirectly Borne by Investors*”. Portfolio Manager	Fiera Investments LP
Sub-Advisor	Cidel Asset Management Inc.

What Do Each of the Funds Invest In?

Investment Objectives

- Each Fund seeks to provide a combination of current cash flow and long term capital growth primarily through investment in a diversified portfolio of Canadian equity securities.
- Fiera Canadian Dividend Class pursues the investment objective primarily through investment in publicly traded Canadian equity and income trust securities.
- Fiera Canadian Dividend Class may invest in income trust securities directly, or indirectly through the use of derivatives, to provide the Fund, with an investment return similar to a direct investment, less the derivative costs. The method of investment by the Fund in income trust securities will be determined primarily based upon maximizing the tax efficiency of Fiera Investments Capital Corporation.
- Fiera Canadian Dividend Registered Fund seeks to achieve the investment objective through the investment of substantially all of its portfolio assets in non-publicly offered debt and shares of Inter-Fund class shares of Fiera Canadian Dividend Class.
- Any change to the investment objective of a Fund must be approved by a majority of votes cast at a meeting of the Fund's securityholders.

Investment Strategies

Fiera Canadian Dividend Class

- The Sub-Advisor follows a core value/income investment style for this Fund.
- The Sub-Advisor's stock selection process consists of quantitative screening, bottom up fundamental research/valuation and a final decision-making phase based on cash flow analysis and risk management considerations.
- The Fund seeks out primarily dividend paying Canadian companies with consideration given to company fundamentals in areas which typically include valuation, balance sheet strength, future earnings prospects, earnings volatility, dividend yield and/or dividend growth potential.
- The Fund may invest up to 30% of the cost of its net assets in foreign securities.
- The Fund may use derivatives for hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in short selling as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.

- The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See "*Income Tax Considerations for Investors – Portfolio Turnover*".

Fiera Canadian Dividend Registered Fund

- The Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera Canadian Dividend Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*".

What Are the Risks of Investing in the Funds?

Each of the Funds is subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*"

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks;
- Exchange Transaction Risks; and
- Other Investment Risks.

Who Should Invest in these Funds?

- You should consider these Funds if you are seeking long term appreciation through capital and distribution growth of the underlying portfolio and you are comfortable with the risks associated with equity investments.
- You should consider these Funds if you want exposure to a core Fund that is eligible to invest primarily in Canadian equities, income trusts and other equity like securities.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera Canadian Dividend Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera Canadian Dividend Registered Fund and Series F shares of Dividend and Return of Capital classes of Fiera Canadian Dividend Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.

- Taxable investors and registered investors of Series F shares may only purchase shares of Fiera Canadian Dividend Class. See the heading “*Purchases, Switches and Redemptions*” under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may only purchase Fiera Canadian Dividend Registered Fund and Series F of Fiera Canadian Dividend Class. See the heading “*Purchases, Switches and Redemptions*” under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a low to medium tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera Canadian Dividend Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera Canadian Dividend Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera Canadian Dividend Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.035	\$0.42	return of capital
Dividend	\$0.035	\$0.42	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund’s investment performance and should not be confused with “yield” or “income”. You should not draw conclusions about the Fund’s investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound

Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the Introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". The table assumes a \$1000 investment, 5% annual appreciation and the last fiscal year's management expense ratio.

Portfolio Manager	Fiera Investments LP

Sub-Advisor*	Galibier Capital Management Ltd.
--------------	----------------------------------

*In respect of Fiera Intrinsic Growth Class only.

What Do Each of the Funds Invest In?

Investment Objective

- Each Fund seeks to provide long term capital growth primarily through investment in a diversified portfolio of Canadian and U.S. equity securities.
- Fiera Intrinsic Growth Registered Fund seeks to achieve the investment objective through the investment of substantially all of its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Fiera Intrinsic Growth Class.
- Any change in the investment objective of a Fund must be approved by a majority of the votes cast at a meeting of the Fund's security holders.

Investment Strategies

Fiera Intrinsic Growth Class

- The Sub-Advisor follows a valuation driven, bottom up investment process. The Sub-Advisor seeks to invest in underpriced securities by using fundamental research to determine a security's underlying intrinsic value. Securities offering a discounted market price to intrinsic value are considered for the Fund.
- To be included in the Fund, a stock must pass the Sub-Advisor's rigorous research and valuation process, which calculates the intrinsic value for each stock incorporating projections of 3 to 5-year future earnings, cash flow and balance sheet structure.
- The benchmark weighting between Canadian and U.S. Holdings in the Fund's portfolio will be 75% Canadian / 25% U.S. However, depending upon the Sub-Advisor's assessment of the markets, the U.S. weighting may fluctuate from 0 - 50% and the Canadian weighting from 50 - 100%.
- The Fund may invest up to 50% of the cost of its net assets in foreign securities.
- The Fund may also use derivatives for hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in short selling as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income.

Fiera Intrinsic Growth Registered Fund

- Fiera Intrinsic Growth Registered Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera Intrinsic Growth Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*".

What Are the Risks of Investing in these Funds?

Each of the Funds is subject to certain of the risks described in detail in Part A of the simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*".

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks; and
- Other Investment Risks.

Who Should Invest in these Funds?

- You should consider these Funds if you are seeking long term capital growth from your investment and you are comfortable with the risks associated with equity investments.
- You should consider these Funds if you want exposure to primarily Canadian and U.S. equities.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera Intrinsic Growth Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera Intrinsic Growth Registered Fund and Series F shares of Dividend and Return of Capital classes of Fiera Intrinsic Growth Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a medium tolerance for risk** (i.e., you are willing to accept fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera Intrinsic Growth Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera Intrinsic Growth Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera Intrinsic Growth Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.055	\$0.66	return of capital
Dividend	\$0.055	\$0.66	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". Portfolio Manager	Fiera Investments LP
Sub-Advisor	Ziegler Capital Management, LLC

What Do Each of the Funds Invest In?

Investment Objective

- Each Fund seeks to provide a combination of current cash flow and long term capital growth primarily through investment in a diversified portfolio of dividend paying US equity securities.
- Fiera U.S. Dividend Class pursues the investment objective through direct investment primarily in U.S. equity securities, including American depositary receipts.
- Fiera U.S. Dividend Registered Fund seeks to achieve the investment objective through the investment of substantially all its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Fiera U.S. Dividend Class.
- Any change to the investment objective of a Fund must be approved by a majority of votes cast at a meeting of Fund's security holders.

Investment Strategies

Fiera U.S. Dividend Class

- The Sub-Advisor employs a bottom up security selection process which seeks to invest in dividend paying stocks that provide attractive fundamental value and demonstrate high quality earnings growth relative to their sector peers.
- The Sub-Advisor selects the dividend yielding stocks from the universe of US stocks with market capitalizations over \$1 billion and removes all companies that do not pay a dividend. Ziegler then uses additional screens to identify dividend paying stocks with characteristics such as strong cash flows, high earnings quality, and growth potential among others. Stocks are ranked within GICS (Global Industry Classifications Standards) by dividend yield with preference generally given to stocks with yields that exceed the average of its industry sector. The Sub-Advisor uses qualitative fundamental analysis as well as additional earnings and dividend quality screens to remove candidates that do not appear to have the cash flow to support the dividend over the long term. The Sub-Advisor generally targets a Fund dividend yield that is approximately 50% higher than that of the Russell 1000 Value benchmark before trading fees and expenses, but market conditions may cause the Fund's yield advantage to deviate from the 50% target.
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may use derivatives for hedging and non-hedging purposes as described in the Introduction to Part B of this simplified prospectus.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
- Each Fund, in anticipation of, or in response to adverse market conditions, for cash management purposes, for defensive purposes or for purposes of a merger or other transaction, may temporarily hold no more than 20% of its assets in cash, money market instruments, securities of affiliated money market funds, preferred securities, bonds or other debt securities. As a result, the Fund may not be fully invested in accordance with its fundamental investment objective and may not participate in stock market advances or declines to the same extent as if fully invested in equity securities.

Fiera U.S. Dividend Registered Fund

- Fiera U.S. Dividend Registered Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera U.S. Dividend Class in accordance with the investment parameters discussed in Part A of the simplified prospectus.

What Are the Risks of Investing in these Funds?

Each of the Funds are subject to certain of the risks described in detail in Part A of the simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*".

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks; and
- Other Investment Risks.

Who Should Invest in these Funds?

- You should consider these Funds if you are seeking current cash flow and long term capital growth from your investment and you are comfortable with the risks associated with equity investments.
- You should consider these Funds if you want exposure to a U.S. equity fund focused on dividend paying stocks.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera U.S. Dividend Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera U.S. Dividend Registered Fund and Series F shares of Dividend and Return of Capital classes of Fiera U.S. Dividend Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a low to medium tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera U.S. Dividend Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera U.S. Dividend Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera U.S. Dividend Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.085	\$1.02	return of capital
Dividend	\$0.085	\$1.02	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the Introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". *In respect of Fiera U.S. Growth Class only.

What Do Each of the Funds Invest In?

Investment Objective

- Each Fund seeks to provide long term capital growth primarily through investment in a diversified portfolio of U.S. equity securities.
- Fiera U.S. Growth Registered Fund seeks to achieve the investment objective through the investment of substantially all its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Fiera U.S. Growth Class.
- Any change in the investment objective of a Fund must be approved by a majority of the votes cast at a meeting of the Fund's security holders.

Investment Strategies

Fiera U.S. Growth Class

- Under normal circumstances, the Fund invests at least 80% of its assets in equity investments of large and mid-capitalization companies. The Fund generally defines large capitalization companies as those with a market capitalization over \$10 billion at the time of purchase, and mid-capitalization companies as those with market capitalization between \$1 billion and \$10 billion, at the time of purchase.
- In implementing its main strategies, the Fund invests primarily in a broad portfolio of common stocks of companies within the Russell 1000 Growth Index that the Sub-Advisor believes have characteristics such as attractive valuations, high quality and/or strong momentum that should lead to relative out performance. In identifying high quality securities, the Sub-Advisor looks for profitable companies with sustainable earnings and disciplined management. In identifying securities that have strong momentum, the Sub-Advisor looks for securities which have prices and/or earnings that have been increasing and that the Sub-Advisor believes will continue to increase.
- The portfolio turnover of the Fund is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See "*Income Tax Considerations for Investors - Portfolio Turnover*".
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may use derivatives for hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income.

Fiera U.S. Growth Registered Fund

- Fiera U.S. Growth Registered Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera U.S. Growth Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*".

What Are the Risks of Investing in these Funds?

Each of the Funds is subject to certain of the risks described in detail in Part A of the simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*".

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks; and
- Other Investment Risks.

Who Should invest in these Funds?

- You should consider these Funds if you are seeking long term capital growth from your investment and you are comfortable with the risks associated with equity investments.
- You should consider these Funds if you want exposure to U.S. equities.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera U.S. Growth Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera U.S. Growth Registered Fund and Series F shares of Dividend and Return of Capital classes of Fiera U.S. Growth Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a medium tolerance for risk** (i.e., you are willing to accept fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera U.S. Growth Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera U. S. Growth Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera U.S. Growth Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.075	\$0.90	return of capital
Dividend	\$0.075	\$0.90	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading "*Fund Expenses Indirectly Borne by Investors*". Portfolio Manager	Fiera Investments LP

Sub-Advisor	Cidel Asset Management Inc.
-------------	-----------------------------

What Do Each of the Funds Invest In?

Investment Objective

- Each Fund seeks to provide long term capital growth primarily through investment in a diversified portfolio of global equity securities.
- Fiera Core Global Equity Class invests directly in global equity securities.
- Fiera Core Global Equity Registered Fund seeks to achieve the investment objective through the investment of substantially all its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Fiera Core Global Equity Class.
- Any change in the investment objective of a Fund must be approved by a majority of the votes cast at a meeting of the Fund's security holders.

Investment Strategies

Fiera Core Global Equity Class

- The Sub-Advisor seeks to invest in companies with attractive cash flow and valuation profiles, a track record of returning rising levels of cash flow to shareholders and identifiable growth opportunities.
- The Sub-Advisor follows security selection process consisting of company screening, bottom up fundamental research/valuation and a final decision-making phase based on perceived margin of safety and portfolio and risk management considerations.
- The portfolio is expected to typically consist of 30 to 40 global equity holdings primarily from developed countries but may include holdings from developing countries.
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may use derivatives for both hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.
- The Fund may engage in securities lending, repurchase and reverse repurchase transactions to earn additional income for the Fund.
- The portfolio turnover is expected to be moderate to high, which may result in increased transaction expenses and the realization of capital gains. See "*Income Tax Considerations for Investors – Portfolio Turnover*".

Fiera Core Global Equity Registered Fund

- Fiera Core Global Equity Registered Fund invests in a combination of non-publicly offered debt and Inter-Fund class shares of Fiera Core Global Equity Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See "*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*".

What Are the Risks of Investing in these Funds?

Each of the Funds is subject to certain of the risks described in detail in Part A of the simplified prospectus under the heading "*What are the general risks of investing in a mutual fund?*".

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks;
- Exchange Transaction Risks; and
- Other Investment Risks.

Who Should Invest in these Funds?

- You should consider these Funds if you are seeking long term capital growth from your investment and you are comfortable with the risks associated with equity investments.
- You should consider these Funds if you want exposure to global equities.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Fiera Core Global Equity Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Fiera Core Global Equity Registered Fund and Series F shares of Dividend and Return of Capital classes of Fiera Core Global Equity Class. See the heading "*Purchases, Switches and Redemptions*" under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a low to medium tolerance for risk** (i.e., you are willing to accept some fluctuations in the market value of your investment).
- Switching from one class to another class of Fiera Core Global Equity Class or to another Class Fund is no longer a tax-deferred transaction.

Distribution Policy

Fiera Core Global Equity Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may

include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Fiera Core Global Equity Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.07	\$0.84	return of capital
Dividend	\$0.07	\$0.84	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "Distribution Policy".

Fund Expenses Indirectly Borne by Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading "Fund Expenses Indirectly Borne by Investors". Portfolio Manager	Fiera Investments LP

Sub-Advisor*	Harris Associates L.P.
--------------	------------------------

*In respect of Oakmark U.S. Equity Class only.

What Do Each of the Funds Invest In?

Investment Objective

- The Funds seek long-term capital appreciation primarily through investment in a diversified portfolio of common stocks of U.S. companies.
- The Oakmark U.S. Equity Registered Fund will seek to achieve the investment objective through the investment of substantially all of its portfolio assets in non-publicly offered debt and Inter-Fund class shares of the Oakmark U.S. Equity Class.
- Any change to the investment objective of a Fund must be approved by a majority of the votes cast at a meeting of the Fund's shareholders.

Investment Strategies

Oakmark U.S. Equity Class

- The Fund generally invests in the securities of larger capitalization companies.
- The Sub-Advisor uses a value investment philosophy in selecting equity securities. This value investment philosophy is based upon the belief that, over time, a company's stock price converges with the Sub-Advisor's estimate of its intrinsic value. By "**intrinsic value**", the Sub-Advisor means an estimate of the price a knowledgeable buyer would pay to acquire the entire business. The Sub-Advisor believes that investing in securities priced significantly below intrinsic value presents the best opportunity to achieve the Fund's investment objective.
- The Sub-Advisor uses the value investment philosophy to identify companies that it believes have discounted stock prices compared to the companies' intrinsic value. In assessing such companies, the Sub-Advisor looks for the following characteristics, although the companies selected may not have all of these attributes: (1) free cash flows and intelligent investment of excess cash; (2) earnings that are growing and are reasonably predictable; and (3) high level of company management ownership.
- In making its investment decisions, the Sub-Advisor uses a "**bottom-up**" approach focused on individual companies, rather than focusing on specific economic factors or specific industries. To facilitate its selection of investments that meet the criteria described above, the Sub-Advisor uses independent in-house research to analyze each company. As part of this selection process, the Sub-Advisor's analysts typically visit companies and conduct other research on the companies and their industries.
- Once the Sub-Advisor determines that a stock is selling at a significant discount compared to the Sub-Advisor's estimate of the company's intrinsic value and that the company has one or more of the additional qualities mentioned above, the Sub-Advisor may consider buying that stock for the Fund. The Sub-Advisor usually sells a stock when the price approaches its estimated intrinsic value. This means the Sub-Advisor sets specific "buy" and "sell" targets for each stock the Fund holds. The Sub-Advisor monitors each portfolio holding and adjusts these price targets as warranted to reflect changes in a company's fundamentals.

- The Sub-Advisor believes that holding a relatively small number of stocks allows its “best ideas” to have a meaningful impact on the Fund’s performance. Therefore, the Fund’s portfolio typically holds thirty to sixty stocks rather than hundreds, and a higher percentage of the Fund’s total assets may also be invested in a particular sector or industry.
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may use derivatives for both hedging and non-hedging purposes as described in the introduction to Part B of this simplified prospectus.

Oakmark U.S. Equity Registered Fund

- Oakmark U.S. Equity Registered Fund will invest in a combination of non-publicly offered debt and Inter-Fund class shares of Oakmark U.S. Equity Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See “*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*”.

What Are the Risks of Investing in these Funds?

Each of the Funds are subject to certain of the risks described in detail in Part A of the simplified prospectus under the heading “*What are the general risks of investing in a mutual fund?*”.

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks; and
- Other Investment Risks

Who Should Invest in these Funds?

- You should consider these Funds if you are seeking long-term capital appreciation from your investment and you are comfortable with the risks associated with equity investments.
- You should consider these Funds if you want exposure to U.S. equities.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Oakmark U.S. Equity Class. See the heading “*Purchases, Switches and Redemptions*” under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.
- Non-taxable investors or registered investors may purchase all series of Oakmark U.S. Equity Registered Fund and Series F shares of Dividend and Return of Capital classes of Oakmark U.S. Equity Class. See the heading “*Purchases, Switches and Redemptions*” under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.

- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a medium tolerance for risk**.
- Switching from one class to another class of Oakmark U.S. Equity Class or to another Class Fund is no longer a tax-deferred transaction.

As at May 31, 2019, an investor held 10.5% of the securities of Oakmark U.S. Equity Class. See Large Investor Risk.

Distribution Policy

Oakmark U.S. Equity Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are reinvested automatically reinvested in additional securities of the Fund.

Oakmark U.S. Equity Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.06	\$0.72	return of capital
Dividend	\$0.06	\$0.72	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". You should not draw conclusions about the Fund's investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive cash distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading "*Distribution Policy*".

*In respect of Oakmark International Equity Class only.

What Do Each of the Funds Invest In?

Investment Objectives

- The Funds seek to provide long-term capital appreciation primarily through investment in a diversified portfolio of common stocks of non-U.S. companies.
- Oakmark International Equity Registered Fund will seek to achieve the investment objective through the investment of substantially all of its portfolio assets in non-publicly offered debt and Inter-Fund class shares of Oakmark International Equity Class.
- Any change to the investment objective of a Fund must be approved by a majority of votes cast at a meeting of the Fund's securityholders.

Investment Strategies

Oakmark International Equity Class

- The Fund will invest in non-U.S. markets throughout the world, including emerging markets. Ordinarily, the Fund will invest in the securities of at least five countries outside of the U.S. There are no geographic limits on the Fund's non-U.S. investments.
- The Fund may invest in securities of large, mid, and small-capitalization companies.
- The Fund uses a value investment philosophy in selecting equity securities. This value investment philosophy is based upon the belief that, over time, a company's stock price converges with the Sub-Advisor's estimate of the company's intrinsic value. By "**intrinsic value**", the Sub-Advisor means an estimate of the price a knowledgeable buyer would pay to acquire the entire business. The Sub-Advisor believes that investing in securities priced significantly below what it believes is a company's intrinsic value presents the best opportunity to achieve the Fund's investment objective.
- The Sub-Advisor uses the value investment philosophy to identify companies that have discounted stock prices compared to what the Sub-Advisor believes are the companies' intrinsic value. In assessing such companies, the Sub-Advisor looks for the following characteristics, although the companies selected may not have all of these attributes: (1) free cash flows and intelligent investment of excess cash; (2) earnings that are growing and are reasonably predictable; and (3) high level of company management ownership.
- In making its investment decisions, the Sub-Advisor uses a "**bottom-up**" approach focused on individual companies, rather than focusing on specific economic factors or specific industries. To facilitate its selection of investments that meet the criteria described above, the Sub-Advisor uses independent, in-house research to analyze each company. As part of this selection process, the Sub-Advisor's analysts typically visit companies and conduct other research on the companies and their industries.
- Once the Sub-Advisor determines that a stock is selling at a significant discount compared to the Sub-Advisor's estimate of the company's intrinsic value and that the company has one or more of the additional qualities mentioned above, the Sub-Advisor may consider buying that stock for the Fund. The Sub-Advisor usually sells a stock when the price approaches its

estimated intrinsic value. This means the Sub-Advisor sets specific “buy” and “sell” targets for each stock the Fund holds. The Sub-Advisor monitors each portfolio holding and adjusts these price targets as warranted to reflect changes in a company’s fundamentals.

- The Sub-Advisor believes that holding a relatively small number of stocks allows its “best ideas” to have a meaningful impact on the Fund’s performance. Therefore, the Fund’s portfolio typically holds thirty to sixty stocks rather than hundreds, and a higher percentage of the Fund’s total assets may also be invested in a particular region, sector or industry.
- The Fund may invest up to 100% of its assets in foreign securities.
- The Fund may engage in short selling as described in the introduction to Part B of this simplified prospectus.

Oakmark International Equity Registered Fund

- Oakmark International Equity Registered Fund will invest in a combination of non-publicly offered debt and Inter-Fund class shares of Oakmark International Equity Class in accordance with the investment parameters discussed in Part A of this simplified prospectus. See “*Purchases, Switches and Redemptions - Classes and Series Not Available for Purchase under this Prospectus*”.

What Are The Risks Of Investing In The Funds?

Each of the Funds are subject to certain of the risks described in detail in Part A of this simplified prospectus under the heading “*What are the general risks of investing in a mutual fund?*”

Specifically, the Funds are subject to those risks described under the following sub-headings:

- General Risks;
- Fixed Income Investments Risks;
- Equity Investments Risks;
- Foreign Investments Risks;
- Company Structure Risks; and
- Other Investment Risks

Who Should Invest In These Funds?

- You should consider these Funds if you are seeking long-term capital growth from your investments and you are comfortable with the risks associated with equity investments.
- You should consider these Funds if you want exposure to equities outside of the U.S.
- Taxable investors and registered investors purchasing Series F shares of Dividend and Return of Capital classes may purchase Oakmark International Equity Class. See the heading “*Purchases, Switches and Redemptions*” under Part A for a discussion of the issues an investor should consider in selecting the appropriate series and class of a Class Fund.

- Non-taxable investors or registered investors may purchase all series of Oakmark International Equity Registered Fund and Series F shares of Dividend and Return of Capital classes of Oakmark International Equity Class. See the heading “*Purchases, Switches and Redemptions*” under Part A for a discussion of the issues an investor should consider in selecting the appropriate series of a Registered Fund.
- The Funds are not appropriate for investors with a short-term investment horizon.
- You should consider these Funds if **you have a medium tolerance for risk** (i.e., you are willing to accept fluctuations in the market value of your investment).
- Switching from one class to another class of Oakmark International Equity Class or to another Class Fund is no longer a tax-deferred transaction.

As at May 31, 2019, an investor held 27.5% of the securities of Oakmark International Equity Registered Fund. See Large Investor Risk.

Distribution Policy

Oakmark International Equity Registered Fund

The Fund distributes its net income annually. This income may consist of any of interest income, Canadian dividend income, foreign source income and other fully taxed income, in varying proportions, and may include capital gains to the extent that it is necessary to eliminate the overall tax liability of the Fund. All distributions of income are automatically reinvested in additional securities of the Fund.

Oakmark International Equity Class

The Fund will make the following fixed monthly distributions per security for each of the following Tax Classes:

	Monthly Rate	Annual Rate	Tax Character
Return of Capital	\$0.045	\$0.54	return of capital
Dividend	\$0.045	\$0.54	ordinary dividends

The amount of the monthly distribution may be adjusted without notice throughout the year as market conditions change.

The tax characterization of these distributions is not guaranteed. A portion of the monthly distributions may be designated as a capital gains dividend or an additional capital gains dividend may be declared. In the case of Return of Capital class, a portion of the monthly distributions may be designated as ordinary dividends.

If the fixed distributions distributed to you are greater than the net increase in the value of your investment in the applicable securities, these distributions will erode the value of your original investment. A fixed distribution does not necessarily reflect the Fund’s investment performance and should not be confused with “yield” or “income”. You should not draw conclusions about the Fund’s investment performance from the amount of this distribution.

The Fund distributes any additional ordinary dividends in December and any capital gains dividends in December or within 60 days after December 31 to all holders including holders of all series of Compound Growth class. All distributions are automatically reinvested in additional securities of the Fund, unless you tell us in writing that you prefer to receive distributions.

You should consult your tax advisor regarding the tax implications of receiving distributions on your securities.

A general description of the distribution policy of each of the Funds is described in the introduction to Part B of this document under the heading “*Distribution Policy*”.

Fund Expenses Indirectly Borne By Investors

The information provided below and the assumptions used are as described in the introduction to Part B of this document under the heading “*Fund Expenses Indirectly Borne by Investors*”. The table assumes a \$1000 investment, 5% annual appreciation and the last fiscal year’s management expense ratio.
